# THE BEST FROM PRINTED ONLINE PRODUCT DATA

Many of our customers still use our printed product catalog to get an overview of our product range. But when it comes to comparing technical device details, finding suitable accessories or, for example, downloading 3D CAD models, www.leuze.com is the right address.

There you will find all detailed product information at a glance, just as clearly arranged as in this catalog. With the product selector, you simply select the desired sensor and send a corresponding query directly to our experts. If you already know what you need, enter the

### SIMPLY AND QUICKLY TO THE RIGHT SENSOR, SUITABLE ACCESSORIES AND PRODUCT INNOVATIONS

#### OUR NEW WEBSHOP WILL CONVINCE YOU

Ordering is now even easier and faster. Around the clock, visitors can select the right product from Leuze electronic's entire product line in our new webshop, www.leuze-shop.com, in just a few clicks. Our convenient online product selector helps you find the optimum product for your application.

Buying sensors has never been easier!

## RODUCT NOW IS TOO!

### WHAT THE LEUZE ELECTRONIC WEBSHOP HAS TO OFFER YOU

Select technical features to find the right product quickly and easily with our convenient product selector

Simple and fast payment by credit card

Clear product comparisons which show the differences between products make the selection easier

Many products are available directly from stock

All technical information and corresponding accessories at the press of one button

The entire product line is available online

Download data sheets. 3D CAD drawings and much more

Benefit from frequent special offers in our webshop

We have been awarded the Trusted Shops Quality Label for secure online shopping

# WE ARE THE SENSOR PEOPLE

For more than 50 years, Leuze electronic has stood for innovative and efficient sensor solutions in the area of factory automation worldwide. Our range of products extends from switching and measuring sensors, identification and data transmission systems to intelligent image processing systems and solutions for safety at work. Our devices operate optically, inductively, with ultrasonics or via RFID, depending on which technology is appropriate for your application.

With 18 of our own subsidiaries and 42 sales partners around the world, our customers can reach us quickly and easily everywhere. To accomplish this, we produce our sensors on four continents and can thereby always guarantee product availability.

Regardless of when and where the competence of the sensor people happens to be needed at the moment. We are the right partner for both standard applications as well as for custom,

18 subsidiaries and 42 sales partners ensure global availability.

high-end solutions. Through an expanded sales and service network, our competent consultation and our reliable customer service, you can count on us to be at your side around the world.

## OUR **PROMISE**TO YOU

### YOUR SENSOR BUSINESS – SIMPLER AND MORE EFFICIENT

Many companies say they are "customer-oriented" – at Leuze electronic, we go a step further.

We offer specific and measurable added value in the areas of USABILITY, APPLICATION KNOW-HOW and SERVICE – to make our customers more successful. These areas are our yardstick for new product developments, innovative service offerings and extensive market expertise.

#### SMARTER PRODUCT USABILITY

With regard to our product developments, we systematically place emphasis on the especially good usability of all devices. To this end, simple mounting and alignment are taken into account – just as the uncomplicated integrability of the sensors in existing fieldbus systems and easy configuration, e.g. via a web browser, are.

#### SMARTER APPLICATION KNOW-HOW

Whoever can do it all, can do nothing right. Which is why we concentrate on selected target sectors and applications. There, we are specialists and know all aspects inside out. For this purpose, we optimize our solutions and offer a comprehensive product range that makes it possible for our customers to obtain the absolute best solutions from a single source.

#### SMARTER CUSTOMER SERVICE

The technical and personal proximity to our customers, and a skilled, straightforward handling of queries and problems, are among our strengths – and will remain so. Consequently, we will continue to expand our service offerings and, indeed, also forge ahead in new directions to persistently redefine the utmost in customer service. Whether on the phone, in the Internet or on-site with our customers – regardless of when and where the expertise of the sensor people is needed at any time.

Katrin Rieker, Sales Methods, Processes, Tools

#### **SMARTER PRODUCT USABILITY**

## WE CREATE REAL ADDED VALUE

#### FIVE FEATURES TYPICAL OF LEUZE ELECTRONIC

All Leuze electronic products follow our "smarter product usability" principle – this alone guarantees definite added value for use in your application. We have split this added value into five concrete areas to give you a quick and clear overview of the benefits.

#### easy handling.

We give this designation to products that can convince with intelligent ideas for mounting and alignment or clever solutions for reliable and simple operation. This includes, e.g., technologies such as the intelligent *omni*mount fastening concept, the especially large and bright *bright* vision light spot for simple alignment or active ambient light suppression  $A^2LS$ .

#### powerreserve.

Of what use is the most powerful sensor if just minimal deviations in distance or dirt prevent the device from properly functioning? We use different technologies depending on the device in order to ensure a maximum function reserve in the devices. This improves your flexibility and your processes run more stable.

#### availability control.

System standstills due to soiled sensors need not happen. Devices with this functionality issue a warning message in good time before, for example, there is a loss in performance and sensors fail due to soiling. As a result, the systems can be cleaned in a timely manner and costly system standstills avoided.

#### think modular.

Are you looking for a device that is as individually tailored to your requirements as possible? With our **think** modular concept, you can choose various equipment features from select devices and thereby assemble the right function range yourself.

#### integrated connectivity.

A sensor, irrespective of how it operates, is always just a small part of a complex control system. For this reason, the maximum compatibility with common fieldbus environments is a basic requirement of all of our developments. Product names that include integrated connectivity or the italic "i" designate all devices that are equipped with extensive, integrated interfaces and which greatly simplify implementation for you.

#### SMARTER APPLICATION KNOW-HOW

## WE CAN'T DO EVERYTHING. WE DO RIGHT

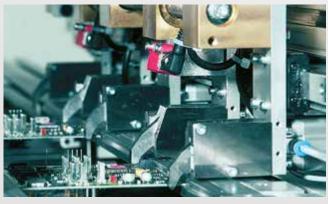

#### TAILOR MADE FOR OUR FOCUS INDUSTRIES

Sensors have become a fixed part of all areas of factory automation. Without these clever helpers, no robot can orient itself, no high-bay warehouse can transport goods and no bottle can be filled. The requirements of the individual applications and industries vary so widely, however, that a great deal of experience is needed in order to develop the most efficient solutions.

During product development, we therefore concentrate on finding solutions to specific tasks from our focus industries. We know the boundary conditions here exactly and, as a result, can develop devices specifically according to our customers' requirements.

■ Conveyor/storage systems

Automotive industry

■ Packaging industry

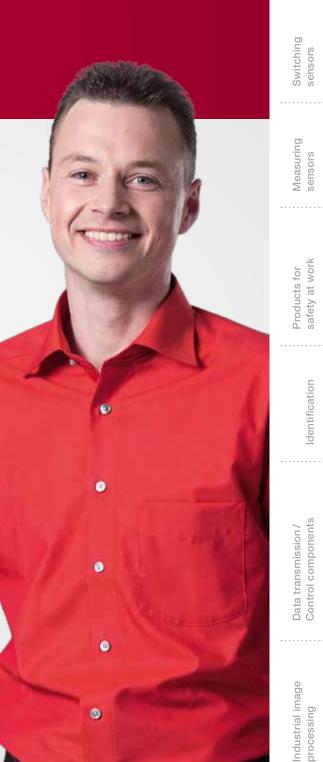

■ Robotics/handling

Machine tools

Laboratory analysis

Thomas Merk, Head of Application Support + Servicemanagement

#### **SMARTER CUSTOMER SERVICE**

# OUR MOST IMPORTANT PROFESSIONAL CUSTO

#### WE ARE YOUR SENSOR PEOPLE

It is for good reason that we are known in the industry as the sensor people. We have known for years that a technically demanding endeavor such as the sensor business can only function if we are reliable partners to our customers. Here, it is about much more than technical high performance in the products – it is about a

high level of knowledge about applications and technical interactions and the constant willingness to provide assistance to our customers whenever they need it. Also part of this is a well-versed support department, such as the global presence of competent contact persons and the 24/7 availability of our customer help desk.

#### Training & support

- Product and standards training
- Application consulting
- Safety consulting
- Safety engineering

#### After sales services

- 24h helpline (in selected countries)
- Inspection database
- Repairs and device replacement service
- On-site service

#### Field services

- Technical field service
- Start-up support
- Safety inspections
- Stopping time measurement

#### Online services

### **SWITCHING SENSORS**

#### EVERYTHING IN VIEW FOR PROPER SWITCHING

In this area, you will find sensor solutions that detect an object optoelectronically, ultrasonically or inductively and output a robust switching signal. Select here from a large number of different operating principles and designs.

"It is precisely in the area of switching sensors where a purely technical distinction between devices on the market is difficult, that factors such as installation, alignment, commissioning and exchangeability are often decisive efficiency criteria when selecting a provider. Our development objective of "smarter product usability" addresses exactly these points and is clearly demonstrated in many of our technical details."

Oliver Bunz, Technical Head of Product Center Binary Switching Sensors

### / OPTICAL SENSORS

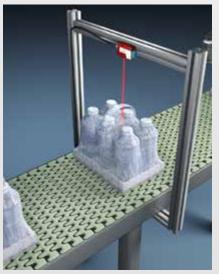

### WE USE LIGHT TO PROVIDE SOLUTIONS TO MANY DIFFERENT PROBLEMS

One of our core competencies are sensors that perform their detection tasks with light in a wide range of forms. For all applications that are to be solved in this way, we are able to offer you a reliable and efficient solution from our extensive product line.

## witching

Measuring sensors

## //PHOTOELECTRIC SENSORS/ DIFFUSE SENSORS, CUBIC HOUSING

#### THE ONLY THING STANDARD HERE IS THE HOUSING SHAPE

The products in this area are characterized by their cubic design. With their various mounting options, they cover a wide range of installation situations. Here, you will find reliable sensors with different operating principles for a variety of detection tasks in a wide range of environmental conditions.

#### /// **2** series

With the various miniature sensors of the 2 series – from diffuse sensor to throughbeam sensor – you are fully prepared for a range of different applications. The miniature sensors show their strengths above all in situations with limited installation space, e.g., in the areas of handling technology and robotics.

Direct access to the online product selector at www.leuze.com/en/br2

#### Throughbeam sensors

With their very small light spot, these classic throughbeam photoelectric sensors are predestined for the reliable detection of small parts. Their miniature format also allows them to be mounted in constrained spaces.

#### LSR<sub>2</sub>

With the LSR 2 throughbeam photoelectric sensor, large operating ranges or high function reserves are possible depending on the application. They feature a PinPoint LED for producing a small, homogeneous and highly visible light spot.

#### Benefits:

- Large ranges
- High function reserves possible
- PinPoint LED for producing a small, homogeneous and highly visible light spot
- Ideally suited for the detection of small parts

#### **Retro-reflective sensors**

Through the use of polarized light, these photoelectric sensors can even reliably detect objects with glossy surfaces.

#### PRK 2

With the PRK 2 retro-reflective photoelectric sensor, large operating ranges or high function reserves are possible depending on the application. They feature glass optics and polarized light for reliable switching behavior with glossy surfaces.

#### Benefits:

- Large ranges
- High function reserves possible
- PinPoint LED for producing a small, homogeneous and highly visible light spot
- Ideally suited for the detection of small parts
- Glass optics and polarized light for reliable switching behavior with glossy surfaces

#### Diffuse sensors with background suppression

These sensors score big thanks, in particular, to their small light spot and good background suppression. They thereby detect even the smallest components without being influenced by objects in the background.

#### HRTR 2

The HRTR 2 miniature diffuse reflection sensor convinces with a very small, homogeneous and laser-like light spot. The background suppression, which is permanently set to various ranges, allows even dark objects to be reliably detected against a light background.

#### Benefits:

- Miniature diffuse reflection sensors with visible red light
- Homogeneous light beam with very small laser-like light spot
- Very good background suppression

#### /// 3 series

The versatile range of models in the 3 series enables use in a variety of applications, such as in packaging technology, handling technology and productronics. In their performance class, these sensors offer the greatest range of features of all competitors and impress with large ranges and improved function reserves. Refined technologies for spurious and extraneous light suppression and for fast alignment and commissioning round out the advantages.

Direct access to the online product selector at www.leuze.com/en/br3

#### Throughbeam sensors

Reliable, standard photoelectric sensors with large function reserves and simple commissioning.

#### LSR 3B

The LSR3B throughbeam photoelectric sensor offers reliable object detection independent of the environmental conditions. The transmitter is optionally available with activation input of the receiver with warning output for increased availability.

#### Benefits:

- High function reserve
- Transmitter with small, homogeneous light spot by means of pin-point LED
- Transmitter optionally with activation input
- Warning output (optional for the receiver) for increased availability

#### **Retro-reflective sensors**

In this area you will find a wide range of sensors that function according to the reflection principle including special sensors for the detection of transparent media, sensors for extremely small components or for combination with a polished, metallic surface as reflector.

#### **PRK 3B**

Reliable sensor with a high function reserve primarily for small, misaligned reflectors and environments with heavy soiling.

#### Benefits:

- Reliable object detection with small, mis-adjusted reflectors
- Reliable object detection with large range
- Reliable object detection with heavy soiling

#### **PRKL 3B.22**

The world's first laser autocollimator in this size, specially designed for the detection of parts as small as 0.1 mm.

#### Benefits:

- Reliable detection of objects with a diameter ≥ 0.1 mm
- Object detection through slits, holes and gaps with extremely small dimensions
- Especially designed for the detection of fast events and small parts

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

#### PRK 3B.42 / RKR 3B.42

Specially designed for the detection of transparent media such as glass, PET (PRK devices) and foils thinner than 20  $\mu m$  (RKR devices). The lockable teach button and the teach input enable simple adjustment.

#### Benefits:

- Particularly suited for highly transparent PET and glass bottles as well as foils
- Easy adjustment via lockable teach button or teach input

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

#### **PRKL 3B.42**

The laser retro-reflective photoelectric sensor for detecting and counting glass bottles – especially in the case of small gaps between the objects.

#### Benefits:

- For highly transparent full and empty bottles as well as foils
- Detection or counting of highly transparent objects
- Especially in the case of small gaps between the objects

## Accessorie

#### **RKR 3B.x1**

For applications in which no reflector can be mounted, this photoelectric sensor is especially well suited for switching on a metallic background as an alternative to a reflector.

#### Benefits:

- Sensor with unpolarized red light for switching on a polished metal plate as reflector
- Extra large light spot for high angle tolerance

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

DC

#### **Energetic diffuse sensor**

An economical sensor for standard applications in which there are no special requirements on background suppression.

#### RTFR 3B

This model is suited for detection distances of up to 400 mm. Fading suppresses objects in the background.

#### Benefits:

- Fading object suppression in background
- Potentiometer for range adjustment
- High switching frequency for detection of fast events

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
50108495	RTFR 3B/66-S8	00.42 m 00.45 m	LED, red	Connector, M8, 4-pin, metal	Switching frequency: 1,000 Hz; Digital switching output 1: transistor, push-pull, light switching; Digital switching output 2: transistor, push-pull, dark switching (PNP)/light switching (NPN), DC, 270 ° potentiometer, fading
50108498	RTFR 3B/6-S8.3	0 0.42 m 0 0.45 m	LED, red	Connector, M8, 3-pin, metal	Switching frequency: 1,000 Hz; Digital switching output 1: transistor, push-pull, light switching, DC, 270 $^\circ$ potentiometer, fading

Detailed information on the typical detection range can be found in the respective data sheet (online)

#### RTR 3B

If larger ranges are needed for standard applications, this energetic diffuse reflection sensor with range adjustment is the best choice.

#### Benefits:

- Large ranges up to 750 mm
- Potentiometer for range adjustment
- High switching frequency for detection of fast events

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
50108505	RTR 3B/66-S8	0 0.7 m 0 0.75 m	LED, red	Connector, M8, 4-pin, metal	Switching frequency: 1,000 Hz; Digital switching output 1: transistor, push-pull, light switching; Digital switching output 2: transistor, push-pull, dark switching, DC, 270 ° potentiometer
50108506	RTR 3B/66	0 0.7 m 0 0.75 m	LED, red	Cable, 2,000 mm, 4-wire	Switching frequency: 1,000 Hz; Digital switching output 1: transistor, push-pull, light switching; Digital switching output 2: transistor, push-pull, dark switching, DC, 270 ° potentiometer

Detailed information on the typical detection range can be found in the respective data sheet (online)

#### Diffuse sensors with background suppression

These sensors are suited for the reliable detection of objects against a background. Available in a variety of special designs, the 3B series offers robust and efficient solutions, even for tricky applications such as the detection of objects with colored structure, objects with openings or highly polished surfaces.

#### HRT(R) 3B

Sensor with red light or infrared light with very good b/w detection thresholds and reliable switching nearly independent of the background.

#### Benefits:

- Exact range adjustment through 8-turn potentiometer
- Also available with infrared light (HRT 3B)

Typ. operating range with a black/white error < 10 %

#### HRTL 3B

Compact laser sensor for the reliable detection of small parts and highly precise positioning in fast processes. Models are available in laser classes 1 and 2.

#### Benefits:

- Especially designed for the detection of fast events and small parts
- For applications with high demands on positioning and reproducibility
- Standard design in laser class 1
- Extended detection range with very good b/w behavior in laser class 2

Typ. operating range with a black/white error < 10 %

#### HRTR 3B-(X)L

With its very large light spot, this sensor type is suitable for the detection of objects with openings, holes and grooves.

#### Benefits:

- Especially designed for the detection of objects with openings, holes and grooves
- Also for detecting transparent foils and bottles

Typ. operating range with a black/white error < 10 %

#### HRTR 3B-S

Sensor for demanding detection tasks with small, homogeneous light spot, very good background suppression and excellent b/w detection thresholds for reliable switching on glossy objects and objects with colored structure.

#### Benefits:

- Small, homogeneous light spot by means of pin-point LED
- Exact range adjustment through 8-turn potentiometer

# /// **5** series

The 5 series photoelectric sensors, with their compact cubic design, are always the right choice when powerful and robust standard detection is needed, e.g., in conveyor or packaging technology. The integrated M3 metal threaded sleeves and the cable outlet, which is available either pointing downward or to the rear, open many options, particularly in situations with limited installation space. From a technological perspective as well, the 5 series - with a large range, large brightVision® light spot and active A2LS extraneous light suppression – offers everything one expects in a modern photoelectric sensor.

Direct access to the online product selector at www.leuze.com/en/br5

# Throughbeam sensors

Compact, cubic throughbeam photoelectric sensor for constrained spaces with proven technical features.

#### L5

The throughbeam principle makes possible the reliable detection of even flat objects with a high function reserve and reduces the risk of a system standstill. Deactivation inputs enable testing of the sensor. In addition, optimized beam geometry and the highly visible brightVision® light spot simplify alignment.

- High function reserve
- Simple alignment by means of optimized beam geometry
- Simple detection of flat objects
- Transmitter deactivation for testing and networking

# **Retro-reflective sensors**

Compact retro-reflective photoelectric sensors for constrained spaces, on transport systems for example.

# PRK5

A polarization filter ensures the reliable suppression of direct reflections and, together with the high function reserve of the sensor, enables reliable detection. In addition, optimized beam geometry and the highly visible brightVision® light spot simplify alignment. Also available in versions with teach button for the detection of containers with semi-transparent packaging.

#### Benefits:

- Homogeneous light spot for safe switching behavior and easy alignment
- Safe suppression of direct reflection due to polarization filter
- For the detection of containers with semi-transparent packaging with teach function

# **Energetic diffuse sensor**

Compact cubic diffuse sensor for standard detection tasks. This sensor performs detection directly on an object and requires no reflector.

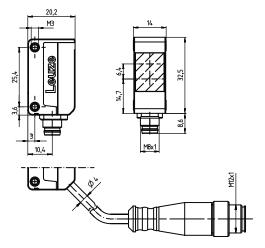

#### ET5 / FT5

These red light sensors in the compact plastic housing facilitate robust object detection for homogeneous or similar objects. Through the simple sensitivity adjustment with 2-level teach (object/background), they are particularly flexible in use. These sensors feature the A²LS active ambient light suppression and easy alignment through brightly visible brightVision® light spot. For greater color independence of the objects, also available with infrared.

- Energetic diffuse reflection sensor with light/dark switching
- Range adjustment via teach-in
- Simple mounting with integrated M3 metal threaded sleeves
- Compact installation possible due to cable outlet at the rear or bottom
- Full control through green and yellow indicator LEDs and complementary outputs
- Robust plastic housing acc. to IP 67 for industrial application
- Infrared version for higher color independence

#### /// **8** series

This extensive series offers a wide variety of operating principles and functions in a sturdy metal housing with very compact dimensions. With degrees of protection of IP 67 and IP 69K, the sensors are well suited for a range of industrial applications with glass pane, e.g., in packaging technology or special-purpose machinery manufacture, particularly in rough conditions. The turning device plug simplifies integration in constrained spaces.

Direct access to the online product selector at www.leuze.com/en/br8

### Throughbeam sensors

Reliable throughbeam photoelectric sensors with visible red light for a wide variety of industrial applications.

### LS 8

Powerful throughbeam photoelectric sensors with visible red light suitable for applications in packaging systems.

#### Benefits:

- Push-pull or NPN/PNP outputs immune to interference
- M12 turning connector or cable connection
- With adjustable focal point
- Sensitivity adjustment with potentiometer

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

# **PRK 8.4x**

Retro-reflective photoelectric sensor specially designed for single-lane bottle transport and transparent media.

### Benefits:

- Autocollimation principle for transparent media
- Tracking function in the event of contamination
- Sensitivity adjustment with potentiometer or teach-in
- Push-pull switching outputs immune to interference
- M12 turning connector or cable connection

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
50037134	PRK 8/66.41-S12	0 2 m 0 2.4 m	LED, red	Connector, M12, 5-pin, metal	Application: detection of highly transparent bottles, detection of highly transparent foils and glass panes; Switching frequency: 1,500 Hz; Digital switching output 1: transistor, push-pull, light switching (PNP)/dark switching (NPN); Digital switching output 2: transistor, push-pull, dark switching (PNP)/light switching (NPN), DC, multiturn potentiometer, autocollimation
50037135	PRK 8/66.42-S12	0 2 m 0 2.4 m	LED, red	Connector, M12, 5-pin, metal	Application: detection of highly transparent bottles, detection of highly transparent foils and glass panes; Switching frequency: 1,000 Hz; Digital switching output 1: transistor, push-pull, light switching (PNP)/dark switching (NPN); Digital switching output 2: transistor, push-pull, dark switching (PNP)/light switching (NPN), DC, multiturn potentiometer, autocollimation, teach input, tracking function

# **Diffuse sensors**

Powerful diffuse reflection sensor with visible red light.

# (I)RTR 8 / VRTR 8

These diffuse sensors feature a visible red light and are perfectly suited for rough environmental conditions. In addition, models with foreground suppression (VRTR 8) are available.

#### Benefits:

- Push-pull, PNP outputs or AS-Interface IO
- Range adjustment with potentiometer
- M12 turning connector or cable connection
- Visible red light

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

# Diffuse sensors with background suppression

Diffuse reflection sensor with background suppression and visible red light or infrared light.

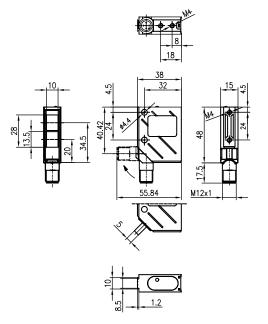

### (I)HRT 8 / HRTL 8 / HRTR 8

Powerful diffuse reflection sensors with multiturn potentiometer, specially designed for detecting glossy objects.

- Detection of shining objects
- Adjustable background suppression via multiturn potentiometer
- Push-pull or NPN/PNP outputs immune to interference
- M12 turning connector or cable connection
- High switching frequency

# /// 10 series

The diffuse sensors of series 10 have been specially developed for the reliable and precise detection of different materials under varying conditions. Operation of the sensor is intuitive and, thanks to the large buttons, extremely simple. The maximum range of up to 8,000 mm makes the sensor an ideal solution for many different applications. The series offers a large selection of functions and models.

Direct access to the online product selector at www.leuze.com/en/br10

# Diffuse sensors with background suppression

High-performance diffuse sensor with background suppression for different materials and large range.

# HT10

The HT10 is a diffuse sensor with background suppression, based on propagation time measurement, with a max. operating range of 8,000 mm. The switching point is virtually material-independent up to 3,500 mm. The sensor allows reliable detection of both glossy and less-reflective objects at extreme angles. The HT10 is optimized for positioning tasks, compartment occupation check, shelf-positioning and feed-through monitoring. Thanks to the high tolerance limit, the sensor also offers high availability in changing environmental conditions or with varying reflective materials.

- Laser class 1 with visible red light
- Optionally, up to 3 switching outputs
- Reliable detection of dark, glossy and colored objects
- Recess for M4 bolts or nuts on both sides
- Space-saving, rotatable M12 connection, cable outlet or pigtail
- Large control buttons
- Status LED visible from above and from front
- Additional configuration options via I/O-Link and Sensor Studio
- Compact housing
- 25 m device model
- Device model with window function
- Device model with external teach input

# /// 18 series

These retro-reflective photoelectric sensors in coated metal housing with glass optics were designed specially for detecting transparent PET and glass bottles, plastic foils as well as flat glass. The patented tracking process extends the cleaning interval many times over; short response times and minimal jitter ensure reliable control of fast processes. The versatile fastening options with integrated thread facilitate mounting and the models with aligned abeam optics make alignment unnecessary. The configuration via IO-Link allows a flexible, simple adjustment of the device.

Direct access to the online product selector at www.leuze.com/en/br18

# **Retro-reflective sensors**

Polarized and unpolarized retro-reflective photoelectric sensors with autocollimation optics for the detection of foils and transparent media are available. In line with application requirements, 3 different types of adjustment options (270° potentiometer, teach button, 11-turn potentiometer) and IO-Link versions can be ordered.

#### (P)RK18B / (I)PRK 18

Polarized and unpolarized retro-reflective photoelectric sensors for the reliable detection of highly transparent bottles, foils and glass panes.

#### Benefits:

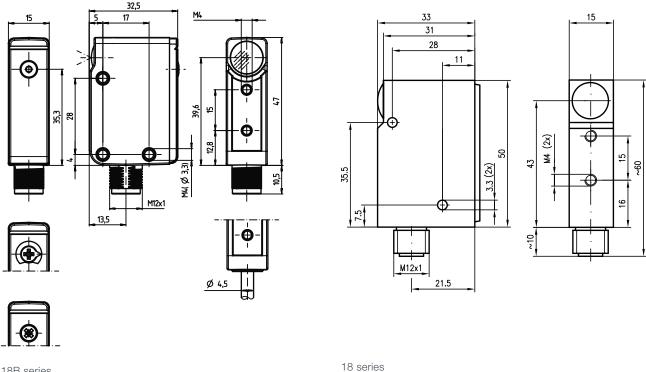

- Reliable detection of containers for single bottles
- Precisely adjustable switching point via 270 ° potentiometer, teach button, 11-turn potentiometer
- Coated with chemical nickel
- Models with high optical accuracy available thanks to calibrated optical system
- Large temperature compensation
- Tracking for contamination compensation
- Front and side mounting systems with M4 thread

# SMARTER PRODUCT USABILITY It's the accessories that make our range of products complete. We place great value on, e.g., flexible mounting solutions and simple integration through variable connection technology, alignment aids and innovative mounting systems. Pre-configured and pre-mounted systems also facilitate fast and simple commissioning of, e.g., muting systems for applications in safety at work.

Discover our extensive line of accessories on the web at: www.leuze.com/en/accessories

# /// 25 series

This series covers all operating principles – from the throughbeam photoelectric sensor to the scanner with background suppression – and have been optimized for a wide range of different applications, especially in intralogistics and packaging technology. Degree of protection IP 67 and IP 66 as well as the active suppression of extraneous light enable use in a wide range of industrial sectors. A number of different options, such as activation input or warning output, facilitate a high level of process reliability and, thus, system availability.

Direct access to the online product selector at www.leuze.com/en/br25

# Throughbeam sensors

The photoelectric sensors of this series offer a high function reserve and are suited for use in rough, industrial environments.

# **LSR 25B**

The standard LSR 25B throughbeam photoelectric sensor convinces with its large range and its versatile options for increasing process reliability (warning, testing).

#### Benefits:

- Photoelectric sensor with very high function reserve
- Suitable for use in rough, industrial environment
- Various options for increasing the process reliability (warning, test activation)

### **Retro-reflective sensors**

In addition to normal polarized retro-reflective photoelectric sensors, the 25B series with variants is ideally suited for the reliable detection of stretch-wrapped pallets or for very precise positioning.

# (I)PRK 25B / PRK 25

The standard (I)PRK 25B retro-reflective photoelectric sensor ensures high system availability, even under extreme environmental conditions. Additional functions, such as warning and activation, further increase process reliability.

#### Benefits:

- High system availability under extreme environmental conditions
- Additional functions, e. g. warning, activation, for increasing the process reliability

# (I)PRK 25B.3

The (I)PRK 25B.3 retro-reflective photoelectric sensor is optimized for use in the areas of material flow, intralogistics and packaging technology. It is particularly well suited for the reliable detection of stretch-wrapped pallets, foil-wrapped objects or laminated surfaces.

#### Benefits:

- Optimized for use in the areas of material flow/intralogistics and packaging technology
- Reliable function even with stretch-wrapped pallets

#### **PRKL 25B**

The PRKL 25B laser retro-reflective photoelectric sensor offers reliable detection of small parts and objects, even at large ranges. Its optimum light beam propagation predestines it for positioning and counting applications.

#### Benefits:

- Reliable detection of small parts/objects
- Optimum light beam propagation for positioning and counting applications

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

# **Energetic diffuse sensor**

An economical sensor for standard applications in which there are no special requirements on background suppression.

#### RTFR 25B

With its fading function, the RTFR 25B diffuse reflection sensor is able to suppress objects in the background. The range is set electrically by means of a potentiometer.

#### Benefits:

- Fading object suppression in background
- Short response behavior for detecting fast events
- Electrical range adjustment via potentiometer

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

# Diffuse sensors with background suppression

These sensors are suited for the reliable detection of objects against a background. Available in a variety of special designs, the 25B series offers robust and efficient solutions, even for tricky applications such as the detection of extremely dark objects or objects with colored structure or objects with openings. An additional indicator LED signals the switching state, even in covered installation situations.

#### **HRT 25B**

The HRT 25B infrared diffuse sensor with background suppression reliably detects even very dark surfaces. It combines large ranges with an above-average function reserve.

- Universal application
- Reliable with materials/surfaces having low reflectance
- Mechanical adjustment of range
- Background suppression
- Additional status LEDs on the front side of the sensor

# **HRTR 25B**

The HRTR 25B universal red light diffuse sensor with background suppression combines reliable detection and good background suppression with great ease of use.

Switching sensors / Optical sensors // Photoelectric sensors/diffuse sensors, cubic housing

- Brightly visible brightVision® light spot
- Mechanical adjustment of range
- Background suppression
- Additional status LEDs on the front side of the sensor

#### HRTR 25B-XL

With its large light spot, the HRTR 25B-XL diffuse reflection sensor with background suppression is well suited for the reliable detection of meshed containers, such as lattice boxes.

#### Benefits:

- Optimized light spot for reliable detection of meshed containers
- Reliable positioning on glossy, metallic surfaces with openings (e. g. slide bolts)
- Brightly visible brightVision® light spot
- Additional status LEDs on the front side of the sensor

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

#### **HRTR 25B-S**

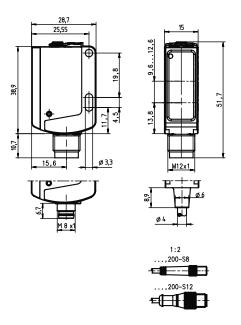

With its focused light spot, the HRTR 25B-S diffuse reflection sensor with background suppression is ideally suited for the reliable detection of objects with glossy surfaces and with surfaces that have colored structure. This makes it the sensor of choice for complex applications, such as in packaging technology.

- Focused light spot for the reliable detection of objects with glossy and inconsistently structured surfaces
- High switching frequency and short response time for detection of fast events
- Additional status LEDs on the front side of the sensor

Further reflective tapes can be found on our website

# /// 28 series

The 28 series sensors are reliable, powerful photoelectric sensors that are predestined for many standard detection tasks in materials handling, packaging technology and machines for special applications. They offer large ranges and numerous technical highlights, such as the highly visible brightVision® light spot for simple alignment or the front- and plug-side M18 mounting option, at an absolutely convincing, economical price. Moreover, the fiber-reinforced, cubic plastic housing with rating and the IP 67 A²LS active suppression of extraneous light facilitate especially robust detection, even in rough industrial environments.

Direct access to the online product selector at www.leuze.com/en/br28

# Throughbeam sensors

Solid, cubic throughbeam photoelectric sensor for standard detection tasks with transmitter and receiver.

#### **L28**

The throughbeam principle makes possible the reliable detection of even flat objects with a high function reserve and reduces the risk of a system standstill. Deactivation inputs enable testing of the sensor. In addition, optimized beam geometry and the highly visible brightVision® light spot simplify alignment.

- High function reserve
- Simple alignment by means of optimized beam geometry
- Simple detection of flat objects
- Transmitter deactivation for testing and networking

# **Retro-reflective sensors**

Solid, cubic, polarized retro-reflective photoelectric sensor for installation situations in which a retro-reflector can be used.

#### PRK28

A polarization filter ensures the reliable suppression of direct reflections and, together with the high function reserve of the sensor, enables reliable detection. In addition, optimized beam geometry and the highly visible brightVision® light spot simplify alignment.

#### Benefits:

- Homogeneous light spot for safe switching behavior and easy alignment
- Safe suppression of direct reflection due to polarization filter

# **Energetic diffuse sensor**

Sturdy cubic diffuse sensor for standard detection tasks. This sensor performs detection directly on an object and requires no reflector.

#### ET28 / FT28

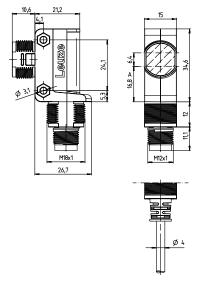

These red light sensors in the solid plastic housing facilitate robust object detection for homogeneous or similar objects. Through the simple sensitivity adjustment with 2-level teach (object/background), they are particularly flexible in use. These sensors feature the A²LS active ambient light suppression and quick and easy alignment through brightly visible brightVision® light spot.

#### Benefits:

- Energetic diffuse reflection sensor with light/dark switching
- Range adjustment via teach-in
- Universal option for M18 hole mounting at the front and connector side
- Easy through-hole assembly with anti-rotation protection for mounting nuts on the housing
- Full control through green and yellow indicator LEDs and complementary outputs
- Robust plastic housing acc. to IP 67 for industrial application

#### /// 46 series

With high performance reserves and large ranges, these sensors with plastic housing are ideal for use in conveyor and storage systems, in the wood-processing industry and in specialpurpose machinery manufacture. The extended series of sensors, with large lenses, degrees of protection IP 67 and IP 69K, and the patented autocontrol function reserve warning, opens many application fields.

# Throughbeam sensors

Reliable photoelectric sensor with large range, optimized beam geometry for simple alignment, robust switching behavior and maximum functional reliability. Available in red light or with infrared light.

#### **LSR 46B**

The red light throughbeam sensor features a very high function reserve and a switching state display that is visible over the entire range.

#### Benefits:

- Switching state display clearly visible up to the max. range
- Robust behavior thanks to optimized beam geometry
- Several range variants can be selected
- Simple alignment and check through SAT 5 alignment aid

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

DC. small light spot (S)

<sup>▶</sup> transmitter / ◀ receiver

#### **L46C**

The throughbeam photoelectric sensor with red light/ infrared light is characterized by high function reserve.

# Benefits:

- Switching state indicator visible from all sides
- Additional display behind the cover pane that is highly visible even at large distances
- High switching frequency for exact switching behavior
- Red light and infrared model
- Model for parallel operation of light axes
- Simple alignment and check through ARH46 + SAT 5 alignment aids

#### **Retro-reflective sensors**

Due to their extremely wide function reserves in several operating ranges, reliable retro-reflective photoelectric sensors with red light ensure high system availability.

# **RK46C VarOS**

Retro-reflective photoelectric sensor with broad, powerful light-band for the reliable detection of objects with variable shape and openings.

# Benefits:

- Wide, homogeneous detection band
- 2 teachable sensitivity levels
- Standard sensor dimensions
- Automatic sensitivity readjustment for max. function reserve
- Easy tune for optimization of sensitivity adjustment (detection of small objects)
- Light/dark switching via teach
- Use as muting sensor (reliable detection of packages or objects wrapped in foil)

# **PRK 46B / PRK 46C**

This retro-reflective photoelectric sensor for large operating ranges offers high function reserves for reliable object detection even with small, soiled or misaligned reflectors.

#### Benefits:

- Maximum function reserve within the operating range
- Reliable object detection with heavily soiled or mis-adjusted reflectors
- Adjustment option via potentiometer
- Large selection of connection variants

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

# (I)PRK 46B.2

A special type of the retro-reflective photoelectric sensor of this series is optimized for use on roller conveyors with high functional reliability especially with stretch-wrapped pallets or depolarizing foils.

#### Benefits:

- Optimized for use on roller conveyors and palletizers
- Reliable function even with stretch-wrapped pallets
- Available with warning output

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

# Diffuse sensors with background suppression

Extensive selection of diffuse reflection sensors which utilize background suppression to deliver reliable results even with changing backgrounds. In addition to red light and infrared types, as well as laser photoelectric sensors, solutions are also offered with IO-Link for format changeover, as well as special types.

# (I)HRT 46B / HT 46CI

Optimized, infrared diffuse sensor for the reliable detection of dark and glossy objects at large ranges and very small black/white error.

#### Benefits:

- Very high function reserve
- Very small black/white error
- Optimized for glossy and dark objects
- Several range variants available
- Versions with warning output available

Typ. operating range with a black/white error < 10 %

# HRTR 46B / HT 46C

Universal, red light sensor, either with mechanical adjustment or teach-in function or teach input. The sensor is equipped with an extra bright light spot for very simple alignment.

#### Benefits:

- Models with mechanical adjustment or teach button
- Models with remote teach via teach line
- Several operating ranges available
- Very visible, bright light spot
- Designs with protection against manipulation by means of a lockable button

# HRTR 46B-Teach (2 switching points)

This sensor features two individually adjustable switching points and can be configured via the teach button or the integrated IO-Link interface. The optimum solution for simple, 2-point controls or format changeovers.

#### Benefits:

- Output of 2 individually adjustable switching points
- Intelligent configuration and diagnostics via IO-Link interface
- Quick format conversions by adjusting the range in millimeters via the interface
- Optimum price/performance ratio for 2-point controls

68

#### **HRTR 46B-S**

Special solution for the reliable detection of even objects with colored structure against a background. Typical applications are found in the wood and packaging industries.

#### Benefits:

- Small light spot and very good fading
- Reliable detection of objects with colored structure located in front of a background
- Optimized for applications in the wood and packaging industries
- Typical actuation distances: 100 300 mm

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

Typ. operating range with a black/white error < 10 %

# Reference sensor

The reference sensor employs a detection process patented by Leuze. With this process, the sensor is taught against a fixed background – the reference. Like a retro-reflective photoelectric sensor, the sensor returns a switching signal if the reference is no longer detected. The sensor is the optimum solution for demanding detection tasks for which no reflector can be mounted.

# HRTR 46B-Teach

Reliable detection of glossy, dark or partially transparent objects from above over a conveying belt or other fixed background (e.g., machine base). Commissioning via teach-in. The sensor can be optimally adjusted to the application via the IO-Link interface.

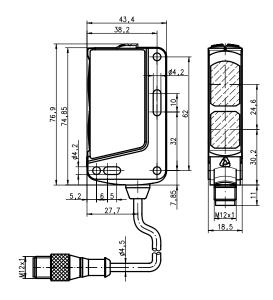

#### Benefits:

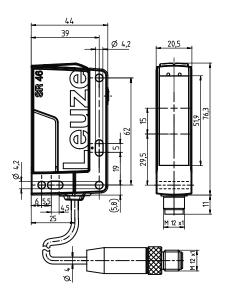

- Very reliable detection of glossy, dark or partially transparent objects
- Quick commissioning through teach-in
- Intelligent configuration and diagnostics via IO-Link interface

#### /// 49C series

This series in a plastic housing convinces in all operating principles through a particularly rugged design. Main features are: the terminal compartment accessible from the front, the switching contact (Relay/MOSFET with high switching power) and the large voltage range from 20–250 V AC/DC as well as degrees of protection IP 67 and 69K.

Direct access to the online product selector at www.leuze.com/en/br49c

# Throughbeam sensors

Throughbeam photoelectric sensors with particularly high function reserve and operating ranges of up to 120 m using visible red light or infrared light and featuring numerous options.

### L49C

The L49C was developed for very reliable object detection at large operating ranges and rough environments.

#### Benefits:

- Very good visibility of the status LED
- Optimized beam geometry for large operating ranges
- Terminal compartment with spring terminals offer time-saving connection
- Simple alignment with SAT 5 alignment aid
- Optics heating for outdoor use or for prevention of fogging

# **Retro-reflective sensors**

Polarized retro-reflective photoelectric sensors with visible red light for large operating ranges of 24 m and function reserve with additional functions.

# (P)RK49C

Reliable detection of glossy or shrink-wrapped objects with/ without polarization filter using red light or infrared light over a large distance.

#### Benefits:

- Especially high function reserve
- Use of standard reflectors
- Potential-free relay outputs for connection of long cables
- MOSFET-output for high switching frequencies

# Diffuse sensors with background suppression

Very powerful diffuse sensors with background suppression and large range.

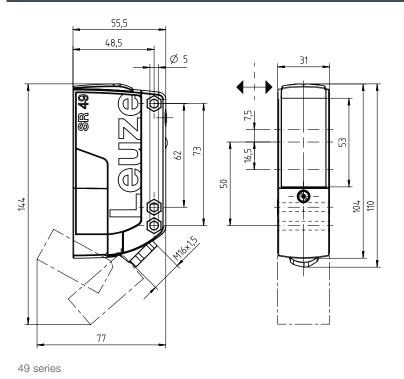

### **HT49C**

Sensor with background suppression, red light and infrared model, clamp connection, AC/DC supply.

- Large range
- High function reserve
- Exact object detection, independent of surface structure (minimal black-white error)

#### /// 53 series

Theses sensors were specially designed for sensitive hygiene applications, e.g., in pharmaceutical, cosmetic and food industries. Their housing is consistently designed for preventing bacterial carry-overs with its scratch resistant and non-diffusive plastic screen. The unique fastening concept, which consists of a mounting trunnion with 12 mm diameter and G6 fit, ensures a gas-tight connection between sensor and machine.

#### Throughbeam sensors

These stainless steel throughbeam photoelectric sensors in HYGIENE design are specially suited for use in challenging environments.

#### **LSR 53**

These photoelectric sensors have a large operating range and feature a visible red light spot for easy alignment.

#### Benefits:

- 316L stainless steel housing in HYGIENE-Design
- Enclosed optics design prevents bacterial carry-overs
- ECOLAB and CleanProof+ tested
- A<sup>2</sup>LS Active Ambient Light Suppression
- High switching frequency for detection of fast events

Part no.		Operating range [m] Op. range limit [m]	Light source	Connection	Description

## **Retro-reflective sensors**

Polarized and unpolarized retro-reflective photoelectric sensors for transport systems, for exact positioning as well as models for detection of PET and glass bottles and plastic foils are available. In addition, there is a laser device specially designed for the detection of small parts.

#### PRK(L) 53.22

Polarized retro-reflective photoelectric sensors with visible red light in stainless steel housing in the HYGIENE design.

#### Benefits:

- 316L stainless steel housing in HYGIENE-Design
- Enclosed optics design prevents bacterial carry-overs
- ECOLAB and CleanProof+ tested
- High switching frequency for detection of fast events
- Easy adjustment via lockable teach button or teach input

#### Diffuse sensors with background suppression

These diffuse sensors with precise adjustment via multiturn potentiometer are designed for particularly reliable switching. With models that work on nearly any background, optimized versions for highly glossy objects and objects with colored structures as well for the detection of gaps and openings are available.

#### **HRTL 53 / HRTR 53**

PRK 53.42 / RKR 53.42

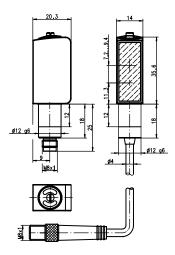

polarized design for foils (RKR devices).

Depending on the design, these sensors offer a large range or small light spots for the reliable detection of glossy, structured objects. A model with elongated light spot specially produced for transparent objects or objects with openings is also available for delivery.

- 316L stainless steel housing in HYGIENE-Design
- Enclosed optics design prevents bacterial carry-overs
- ECOLAB and CleanProof+ tested
- Exact range adjustment via 8-turn potentiometer
- Collimated light beam propagation with small beam diameter permits identical switching behavior within the specified detection range

#### /// 55 series

This stainless steel sensor series show their strength particularly in the wet areas of your production line. With the innovative WASH-DOWN design, it is possible to thoroughly clean the entire system with all common cleaning agents and processes. The non-diffusive and chemically-stable materials prevent bacterial carry-overs and ensure the functional capability of the systems for years to come. The fact that their fastening systems are compatible to those of the standard series makes integration easier.

Direct access to the online product selector at www.leuze.com/en/br55

### Throughbeam sensors

Stainless steel throughbeam photoelectric sensors in the WASH-DOWN design with standard hole pattern for use in wet areas. Also available as version for the detection of highly transparent media.

#### **LSR 55**

Models with 3 different connections specially designed for detection of fast events are available for delivery. The enclosed optics design reliably prevents bacterial carry-overs.

#### Benefits:

- 316L stainless steel housing in WASH-DOWN-Design
- Enclosed optics design prevents bacterial carry-overs
- ECOLAB and CleanProof+ tested
- Scratch resistant and non-diffusive plastic front cover
- High switching frequency for detection of fast events
- Version available for the detection of highly transparent media

#### **Retro-reflective sensors**

Polarized and unpolarized retro-reflective photoelectric sensors for transport systems, for object positioning as well as autocollimation models for bottle and foil detection are available for delivery. In addition, there are laser devices with higher switching frequency specially designed for the detection of small parts.

## **PRK(L) 55**

Polarized retro-reflective photoelectric sensors available with red light in V4A/316L and as laser models. The autocollimation function ensures precise detection of even highly-glossy objects.

#### Benefits:

- Enclosed optics design prevents bacterial carry-overs
- ECOLAB and CleanProof+ tested
- Scratch resistant and non-diffusive plastic front cover
- A<sup>2</sup>LS Active Ambient Light Suppression
- High switching frequency for detection of fast events
- Easy adjustment via lockable teach button or teach input

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

## SMARTER APPLICATION KNOW-HOW

Take a look at our product clips: www.leuze.com/en/product-clips

Polarized and unpolarized retro-reflective photoelectric sensors especially for the detection of highly transparent bottles, foils (RKR devices) and glass panes (PRK devices) are available.

PRK 55.42 / RKR 55.42

- Particularly suited for thin, highly transparent foils with thickness < 20 µm</li>
- Enclosed optics design prevents bacterial carry-overs
- ECOLAB and CleanProof+ tested
- Scratch resistant and non-diffusive plastic front cover
- High switching frequency for detection of fast events
- May also be used with glass reflectors (TG)
- Easy adjustment via lockable teach button or teach input

#### Diffuse sensors with background suppression

These light scanners with precise adjustment via multiturn potentiometer are designed for particularly reliable switching and can be used on nearly any background. Other models are optimized for highly-glossy and structured objects as well as the detection of grids and gaps.

#### **HRTL 55 / HRTR 55**

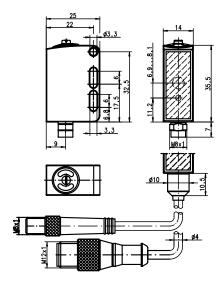

Depending on the design, these sensors offer a large range or small light spots for the reliable detection of even glossy, structured objects. Models with elongated light spot for transparent objects or objects with openings are also available for delivery. A model with V-optics for polished object surfaces is also available.

- Enclosed optics design prevents bacterial carry-overs
- ECOLAB and CleanProof+ tested
- Scratch resistant and non-diffusive plastic front cover
- Exact range adjustment via 8-turn potentiometer
- Very good black/white behavior and reliable switching, even on glossy objects and objects with colored structure
- Small, homogeneous light spot for detecting small parts
- A<sup>2</sup>LS Active Ambient Light Suppression
- High switching frequency for detection of fast events

50123899	REF 6-A-9x9	Rectangular	9 mm × 9 mm	Self-adhesive	Plastic
50123861	REF 6-A-14x45	Rectangular	15 mm × 45 mm	Self-adhesive	Plastic
50110192	REF 6-A-50x50	Rectangular	50 mm × 50 mm	Self-adhesive	Plastic

Further reflective tapes can be found on our website

#### /// 95 series

Series 95 is available as throughbeam photoelectric sensors, retro-reflective photoelectric sensors and diffuse sensors in versions used for PET, foil and glass detection. Moreover, the sturdy housing with degree of protection IP 67 / IP 69K and the A<sup>2</sup>LS active ambient light suppression facilitate especially reliable detection, even in rough industrial environments.

Direct access to the online product selector at www.leuze.com/en/br95

## Throughbeam sensors

Throughbeam photoelectric sensors with glass optics and high function reserve using visible red light or infrared light.

#### **LS 95**

Sturdy throughbeam photoelectric sensors with high function reserve using visible red light or infrared light. The series has complementary switching outputs for light/dark switching as a control function.

#### Benefits:

- Activation input and warning output
- Sensitivity adjustment via multiturn potentiometer
- Complementary switching outputs for light/dark switching or as a control function

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
50034509	► LSR 95/2.8 SE-L.1	0 12 m 0 18 m	LED, red	Connector, M12, 4-pin, stainless steel	DC, activation input

<sup>►</sup> transmitter / ◀ receiver

## **Retro-reflective sensors**

These retro-reflective photoelectric sensors with glass optics are available with visible red light or infrared light.

#### (I)PRK 95

Reliable retro-reflective photoelectric sensors with function reserves for high system availability. The sensitivity adjustment is performed via multiturn potentiometer.

#### Benefits:

- With autocollimation principle
- Sensitivity adjustment via multiturn potentiometer
- Activation input and warning output
- Version with focus at 100 mm

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

82

#### **PRK 95.4**

Retro-reflective photoelectric sensors for reliable detection of transparent media (e. g. clear glass, PET, foil)

#### Benefits:

- User controlled sensitivity adjustment for transparent objects
- Autocollimation principle for transparent media
- Activation input and warning output

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
50025609	PRK 95/44 L.4	01.8 m 03 m	LED, red	Connector, M12, 4-pin, stainless steel	Application: detection of highly transparent bottles, detection of highly transparent foils and glass panes; Switching frequency: 1,000 Hz; Digital switching output 1: transistor, PNP, light switching; Digital switching output 2: transistor, PNP, dark switching, DC, multiturn potentiometer, autocollimation
50027095	PRK 95/A L.4	01.8 m 03 m	LED, red	Connector, M12, 4-pin, stainless steel	Application: detection of highly transparent bottles, detection of highly transparent foils and glass panes, multiturn potentiometer, autocollimation, AS-Interface IO

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

## **Energetic diffuse sensor**

Diffuse sensors are transmitter and receiver in one and react to the light reflected by the object to be detected, and therefore do not need a separate reflector. The switching distance possible depends on the reflection properties of the object.

## IRK(R) 95 / RKR 95

Diffuse sensors using red light or infrared light with operating range adjustable via potentiometer. The exact adjustment is performed via multiturn potentiometer.

#### Benefits:

- Very good black/white behavior
- Exact adjustment via multiturn potentiometer
- Warning output
- PNP outputs for light/dark switching

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
50025612	IRKR 95/44-250 L	0.01 0.25 m 0.01 0.4 m	LED, red	Connector, M12, 5-pin, stainless steel	Switching frequency: 1,000 Hz; Digital switching output 1: transistor, PNP, light switching; Digital switching output 2: transistor, PNP, dark switching; Digital switching output 3: transistor, PNP, $\mathbf{U}_{\mathrm{B}}$ switching, DC, multiturn potentiometer, warning output

### Diffuse sensors with background suppression

These sturdy diffuse sensors with adjustable background suppression are available with visible red light or infrared light. They are suited for many applications.

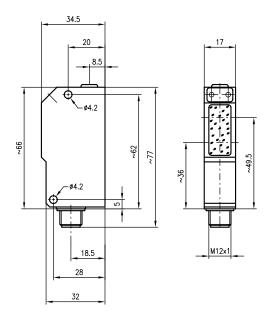

## FRK(R) 95

These sensors feature a very good black/white behavior and are particularly well-suited for glossy surfaces.

- Sensor with adjustable background suppression using visible red light or infrared light
- Very good black/white behavior
- Optimized for glossy/inclined surfaces
- Models with focused light beam
- NPN/PNP outputs for light/dark switching

#### /// 96 series

Regardless of operating principle, regardless of whether metal or plastic housing, regardless of whether DC or AC supply – the sensors of this series are all-rounders. With their large optical surface, IP 67 or IP 69K safety class and optional optics heating, they will win you over with their reliable detection with high function reserves, large operating ranges and a multitude of options under rough environmental conditions.

Direct access to the online product selector at www.leuze.com/en/br96

## Throughbeam sensors

Throughbeam photoelectric sensors with particularly high function reserve using visible red light or infrared light and numerous options.

#### **LS 96**

Sturdy throughbeam photoelectric sensors with high function reserve using visible red light or infrared light for standard applications. Models with optics heatings are also available for delivery.

- Complementary outputs for standard applications and a wide range of input and output variants for optimal adaptation to the application
- Versatile options with warning output, activation input and switching delay
- Models with optics heating for use at low temperatures

#### **Retro-reflective sensors**

Polarized and unpolarized retro-reflective photoelectric sensors with particularly high function reserve using visible red light or infrared light and other options.

#### (P)RK 96

Polarized and unpolarized retro-reflective photoelectric sensors with large operating range using visible red light. Extensive input/output models for optimal adaptation to the application. The product range also contains sensors for detection of transparent objects (e. g. clear glass, PET, foil).

#### Benefits:

- Complementary outputs for standard applications and a wide range of input and output variants for optimal adaptation to the application
- Connection via comfortable terminal compartment up to 1.5 mm<sup>2</sup> or metal M12 connector
- Multiple options with warning output, activation input, switching delays and optics heating for use at low temperatures

#### PRK 96-183x / PRK 96-185x

Polarized retro-reflective photoelectric sensors with large operating range and red light especially for the detection of highly transparent foils.

#### Benefits:

- Autocollimation principle allows use at zero distance and provides a constant function reserve across the entire operating range
- Visible red light
- Complementary outputs, sensitivity adjustment and delay before start-up for optimal adaptation to the application
- Connection via comfortable terminal compartment up to 1.5 mm² or metal M12 connector
- Preset sensitivities for differentiation between brown, green and clear glass

## **Energetic diffuse sensor**

Energetic diffuse sensors with large range.

#### **RT 96**

Reliable diffuse sensors with potentiometer for range adjustment for the minimal short range.

#### Benefits:

- Range adjustment via potentiometer
- Complementary switching outputs and delay before start-up for optimal adaptation to the application
- Minimal short range
- Connection via M12 connector or terminal compartment

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

## Diffuse sensors with background suppression

Powerful diffuse sensors with background suppression for particularly large operating range.

#### **HRT 96**

Diffuse sensors with adjustable background suppression using visible red light and infrared light with versatile options such as switching delays, activation input and optics heating.

- Complementary switching outputs, exact mechanical range adjustment and delay before start-up for optimal adaptation to the application
- Connection via comfortable terminal compartment up to 1.5 mm² or metal M12 connector
- Multiple options with switching delays, activation input and optics heating for use at low temperatures
- Up to 3 teachable programmable switching points
- Arbitrary ranges teachable

#### HRT(I)L 96B

Laser diffuse sensor with large detection range for universal application (visible red light or infrared light). The time lock prevents inadvertent changes to switching points.

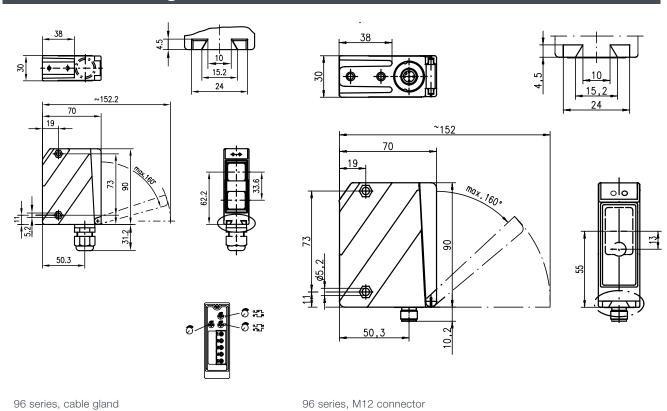

Switching sensors / Optical sensors // Photoelectric sensors/diffuse sensors, cubic housing

- Light propagation time measurement makes use possible under difficult environmental conditions (brightness, light, interfering contours)
- Extremely simple operation, teachable switching points and teach input
- Time lock prevents unintentional changing of the switching
- Optimized for positioning applications and reliable object detection (e.g. compartment occupation check, shelf positioning, collision protection)
- Diagnostics function
- Sensors in laser class 1 and 2 available

Further reflective tapes can be found on our website

# //PHOTOELECTRIC SENSORS/DIFFUSE SENSORS, CYLINDRICAL HOUSING

## TO KEEP YOUR PROCESS RUNNING SMOOTHLY

The common characteristic of sensors from this area is their cylindrical design. This facilitates extremely simple and fast mounting in the system.

## /// 318 plastic series

Our 318B series of photoelectric sensors is proof that affordable and functional do not have to be a contradiction in terms. A robust plastic sleeve, reliable detection behavior and the intelligent omni-mount mounting process for M18 hole mounting make these sensors the first choice for standard detection tasks in many areas of application.

Direct access to the online product selector at www.leuze.com/en/br318-k

#### Throughbeam sensors

The photoelectric sensors of this series offer a high function reserve and are suited for use in rough, industrial environments.

■ High function reserve ■ Simple alignment by means of optimized beam geometry ■ Simple detection of flat objects

Benefits:

## The L318B throughbeam photoelectric sensor offers simple alignment with its optimized beam geometry. It is also suitable for the simple detection of flat objects. Deactivation inputs enable testing of the sensor. The simple fine adjustment with omni-mount, the embedded mounting option and variants with axial and angled optics round out the portfolio.

#### **Retro-reflective sensors**

Through the use of polarized light, these photoelectric sensors can even reliably detect objects with glossy surfaces.

#### **PRK318B**

Reliable suppression of direct reflections through polarization filter and optimized beam path for fast commissioning.

The simple fine adjustment with omni-mount, the embedded mounting option and variants with axial and angled optics round out the portfolio.

#### Benefits:

- High function reserve
- Safe suppression of direct reflection due to polarization filter
- Series connection possible (Daisy Chain)

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

## Energetic diffuse sensor

These sensors perform detection directly on an object and require no reflector. Versions are available that have been optimized for various distances.

#### ET318B / FT318B

These sensors facilitate robust object detection for homogeneous or similar objects. Through the simple sensitivity adjustment with 2-level teach (object/background), they are particularly flexible in use. The sensors with visible red light feature the A<sup>2</sup>LS active ambient light suppression and easy alignment through brightly visible brightVision® light spot. For greater color independence of the objects, also available with infrared.

- Energetic diffuse reflection sensor with light/dark switching
- Range adjustment via teach-in
- Axial and 90 ° light beam gate for flexible integration
- Simple fine adjustment with omni-mount
- Embedded mounting option
- Full control through green and yellow indicator LEDs and complementary outputs
- Robust plastic housing acc. to IP 67 for industrial application

## Diffuse sensors with background suppression

These diffuse reflection sensors with background suppression and highly visible red light spot are well-suited for detection of fast events thanks to their high switching frequency.

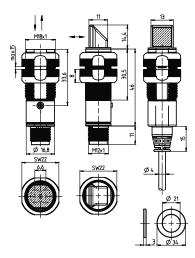

## **HRTR 318**

Diffuse sensors with very short, robust housing with straight optics and active ambient light suppression.

- Exact background suppression, electronically adjustable
- Nearly color-independent object detection
- Clearly visible red light spot
- High switching frequency for detection of fast events
- A<sup>2</sup>LS Active Ambient Light Suppression
- Very short, robust cylindrical stainless steel or plastic housing with straight optics

## Throughbeam sensors

Throughbeam photoelectric sensors with long operating range in red laser light and straight optics.

## LS(L) 318

Throughbeam photoelectric laser sensors in stainless steel housing in cylindrical M18 design.

#### Benefits:

- Sensitivity adjustment via potentiometer
- Fixed beam geometry, convergent
- Activation input for testing and interlinking of the sensor
- Complementary switching outputs for light/dark switching or as a control function

## **Retro-reflective sensors**

Polarized retro-reflective photoelectric sensors with straight optics and very short construction for application in limited spaces.

## **PRKL 318**

Polarized and unpolarized laser retro-reflective photoelectric sensors in sturdy stainless steel housing in cylindrical M18 design. LED and laser devices are available.

#### Benefits:

- Sturdy cylindrical stainless steel housing M18x1, degree of protection IP 67 for industrial application
- Sensitivity adjustment via potentiometer
- Fixed beam geometry, convergent
- Complementary switching outputs for light/dark switching or as a control function

#### /// 328 series

The 328 series photoelectric sensor family unifies the sturdiness of a stable stainless steel metal thread in the plastic housing with high functionality, all at a low price. With their reliable detection behavior, the versatile mounting options thanks to extensive accessories and models with axial and angled optics, these sensors are the perfect choice for standard detection tasks in many challenging areas of application.

## Throughbeam sensors

The photoelectric sensors of this series offer a high function reserve and are suited for use in industrial environments with their metal thread in the plastic housing.

#### L328

The L328 throughbeam photoelectric sensor in the sturdy plastic housing with metal thread simplifies alignment thanks to optimized beam geometry. It is also suitable for the simple detection of flat objects. The simple fine adjustment and deactivation inputs for testing the sensor round out the portfolio of these sensors.

#### Benefits:

- High function reserve
- Simple alignment by means of optimized beam geometry
- Simple detection of flat objects

## Retro-reflective sensor

These retro-reflective photoelectric sensors with metal thread can reliably detect objects even with glossy surfaces through the use of polarized light.

#### **PRK328**

Reliable blanking of direct reflections by the polarization filter, an optimized beam path for quick commissioning and simple fine adjustment (teach) characterize these sensors in the sturdy plastic housings with metal thread.

#### Benefits:

- High function reserve
- Safe suppression of direct reflection due to polarization filter
- Sensitivity adjustment by means of teach button
- Series connection possible (Daisy Chain)

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

#### **Energetic diffuse sensor**

These sturdy sensors with metal thread in the plastic housing perform detection directly on an object and do not require a reflector. Versions are available for various distances as well as specifically for the paper industry. For even easier use, available with preset ranges.

## ET328 / FT328

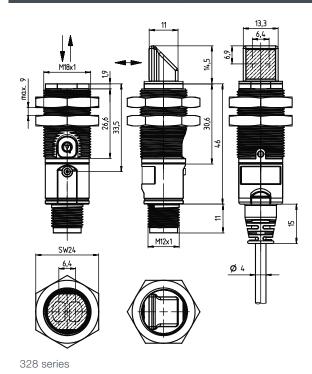

These red light sensors in the sturdy plastic housing with metal thread facilitate robust object detection. The simple adjustment to the object through the teach button with two levels makes installation a piece of cake. These sensors feature the A<sup>2</sup>LS active ambient light suppression and easy alignment through brightly visible brightVision® light spot. Also available with preset range and infrared light for higher color independence.

- Energetic diffuse reflection sensor with light/dark switching
- Range adjustment via teach-in
- Preset ranges (FT 100 mm/ET 400 mm) for easier use
- Axial and 90° light beam gate for flexible integration
- Sturdy plastic housing with stainless steel threaded sleeve with cylindrical M18 design
- Full control through green and yellow indicator LEDs and complementary outputs
- High color independence
- Special model available for paper label detection

## SMARTER CUSTOMER SERVICE

Accessories

#### /// 412 series

The extremely compact M12 design of the 412 series opens many interesting applications, e.g., in assembly and handling technology or packaging technology.

Direct access to the online product selector at www.leuze.com/en/br412

#### Throughbeam sensors

Short and compact throughbeam photoelectric sensors with visible red light.

#### LS 412

Throughbeam photoelectric sensors with visible red light in cylindrical M12 design.

#### Benefits:

- Slim and short cylindrical metal housing M12
- Sensitivity adjustment for optimum adaptation to the application
- Light/dark switching via control cable

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
5008143	1 SET LS 412M/P-S12	06 m 08 m	LED, red	Connector, M12, 4-pin, metal	Switching frequency: 500 Hz; Digital switching output 1: transistor, PNP, light/dark reversible, DC, 270 ° potentiometer, article set
5008143	2 LS 412M/P	06 m 08 m	LED, red	Cable, 2,000 mm, 4-wire	Switching frequency: 500 Hz; Digital switching output 1: transistor, PNP, light/dark reversible, DC, 270 ° potentiometer

Both products consist of transmitter and receiver

## **Retro-reflective sensors**

Short and compact retro-reflective photoelectric sensors with visible red light and polarization filter.

#### **PRK 412**

Retro-reflective photoelectric sensor in slim metal housing is well-suited for detection of fast events thanks to the high switching frequency.

## Benefits:

- High switching frequency for detection of fast events
- Slim and short cylindrical metal housing M12
- Light/dark switching via control cable

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
50081407	PRK 412M/P-S12	0.15 1.3 m 0.15 1.6 m	LED, red	Connector, M12, 4-pin, metal	Switching frequency: 700 Hz; Digital switching output 1: transistor, PNP, light/dark reversible, DC, 270 ° potentiometer
50081408	PRK 412M/P	0.15 1.3 m 0.15 1.6 m	LED, red	Cable, 2,000 mm, 4-wire	Switching frequency: 700 Hz; Digital switching output 1: transistor, PNP, light/dark reversible, DC, 270 ° potentiometer

Detailed information on operating ranges in combination with reflectors can be found in the respective data sheet (online)

#### **Energetic diffuse sensor**

Short and compact energetic diffuse sensors with visible red light.

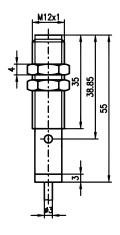

#### **RT 412**

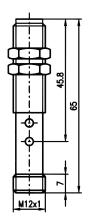

Energetic retro-reflective photoelectric sensor with visible red light in cylindrical M12 design for detection of fast events.

- High switching frequency for detection of fast events
- Slim and short cylindrical metal housing M12
- Light/dark switching via control cable

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
50081409	RT 412M/P-200-S12	0 0.2 m 0 0.4 m	LED, red	Connector, M12, 4-pin, metal	Switching frequency: 700 Hz; Digital switching output 1: transistor, PNP, light/dark reversible, DC, 270 $^\circ$ potentiometer
50081410	RT 412M/P-200	00.2 m	LED, red	Cable, 2,000 mm, 4-wire	Switching frequency: 700 Hz; Digital switching output 1: transistor, PNP light/dark reversible, DC, 270 ° notentiometer

#### /// 618 series

With its full-metal housing, this M18 design makes no compromises in terms of maximum robustness.

Direct access to the online product selector at www.leuze.com/en/br618

#### Throughbeam sensors

Sturdy throughbeam photoelectric sensors with infrared light.

#### **LS 618**

Throughbeam photoelectric sensors with infrared light and light/dark switching via control cable.

#### Benefits:

- Sturdy metal housing in cylindrical M18 design
- Sensitivity adjustment for optimum adaptation to the application
- Dual LED display for easy commissioning
- M12 connector for fast installation

Part no.	Part description	Operating range [m] Op. range limit [m]	Light source	Connection	Description
50038451	SET LS 618/4-S12	010 m 012 m	LED, infrared	Connector, M12, 4-pin, metal	Switching frequency: 500 Hz; Digital switching output 1: transistor, PNP, light/dark reversible, DC, 270 ° potentiometer, article set

Set consists of transmitter and receiver

## Retro-reflective sensors

Retro-reflective photoelectric sensors with red light in sturdy metal housing.

#### **PRK 618**

Retro-reflective photoelectric sensor with light/dark switching via control cable.

#### Benefits:

- Sturdy metal housing in cylindrical M18 design
- Sensitivity adjustment for optimum adaptation to the application

## Reflectors

#### Standard reflectors

Part no.	Part description	Design	Reflective surface	Fastening	Material
50081283	TKS 20X40	Rectangular	16 mm × 38 mm	Through-hole mounting, adhesive	Plastic
50023525	TKS 30X50	Rectangular	27 mm × 44 mm	Through-hole mounting, adhesive	Plastic
50022816	TKS 100X100	Rectangular	96 mm × 96 mm	Through-hole mounting, adhesive	Plastic

Dimensional tolerances for all specified dimensions: ± 0.2 mm Further standard reflectors can be found on our website

## **//SENSORS FOR POTENTIALLY EXPLOSIVE AREAS**

## **DETECT WITHOUT RISK**

The use of optoelectronic sensors in potentially explosive areas requires specially protected devices. Our extensive product line offers powerful sensors in all common technologies.

#### /// 92 series

The 92 Ex series sensors are available as diffuse reflection sensors, retro-reflective photoelectric sensors or throughbeam photoelectric sensors and reliably detect objects at distances of 300 mm up to 12 m. The intrinsically safe sensors transmit switching signals to the VS 403 isolated switching amplifier by way of the NAMUR interface. The temperature class for explosive gas areas is T6; for explosive dust areas it is 80 °C.

#### Benefits:

- Compact construction with robust diecast zinc housing and glass optics for protection against environmental influences
- Switching output acc. to IEC 60947-5-6 (NAMUR)
- EU type examination certificate DMT 03 ATEX E 029 for zone 1/21
- Large range from 0.3 to 12 m

## /// 55 series

The sensors are developed for all category 3G and 3D applications. With their small dimensions, they fit even in constrained spaces. The sensors and the protective housing are made of stainless steel and are also suitable for demanding operating conditions. Currently available are retroreflective photoelectric sensors and diffuse sensors with background suppression. The temperature class for explosive gas areas is T4; for explosive dust areas it is 70 °C.

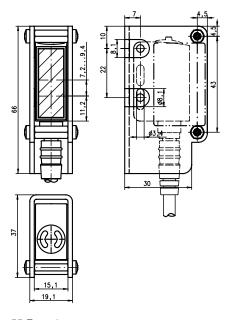

## Benefits:

- Diffuse reflection sensor with visible red light and adjustable background suppression
- Stainless steel device housing and protective housing
- Exact range adjustment via 8-turn potentiometer
- Very good black/white behavior and reliable switching nearly independent of the object or background properties
- Fast alignment through brightVision®
- A<sup>2</sup>LS Active Ambient Light Suppression

## /// 46 series

Due to their high function reserve, these devices are used for reliable detection even with heavy soiling in category 3G and 3D applications. The product spectrum encompasses familiar operating principles such as throughbeam photoelectric sensor, retroreflective photoelectric sensor or diffuse sensor with background suppression. The temperature class for explosive gas areas is T4; for explosive dust areas it is 90 °C.

#### Benefits:

- Diffuse sensor with adjustable background suppression through multiturn potentiometer
- Reliable detection of light and dark, as well as inclined or sloped surfaces
- Fast connection through Ultra-Lock<sup>™</sup> fast locking
- Complementary switching outputs for optimal adaptation to the application
- Warning output for increased availability
- A<sup>2</sup>LS Active Ambient Light Suppression

## /// 96 series

These sensors were specially designed for applications that require large ranges in categories 3G and 3D. The product line covers all operating principles. The temperature class for explosive gas areas is T4; for explosive dust areas it is 70 °C.

## Benefits:

- Diffuse sensor with adjustable background suppression using visible red light
- Robust metal housing with shock-resistant optical window, degree of protection IP 67/ IP 69K for industrial application
- Complementary switching outputs
- Range adjustment and delay before start-up
- Connection via comfortable terminal compartment

## / INDUCTIVE SWITCHES

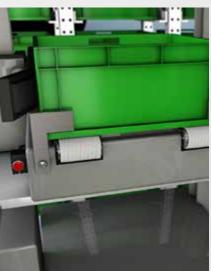

## RELIABLE DETECTION OF METALLIC PARTS

In automation technology, not just optical applications, but many other applications are predestined for inductive sensors. An array of designs, short reaction times and large ranges make our inductive sensors the right solutions for practically all fields of application in industrial automation. Depending on the environment or requirement in which they are used, other selection criteria such as AC/DC, reduction factor 1 or all-metal are available.

## //STANDARD SENSORS, CUBIC HOUSING

## SMALL DESIGNS FOR BIG REQUIREMENTS

These standard cubic sensors can be universally applied for a wide variety of detection tasks. Cubic designs are available in both plastic and metal housings.

## /// IS 288

With a laterally aligned sensor field, space and cost-saving integration is possible.

Using our special supports, the sensors can even be mounted in the groove of an ITEM profile.

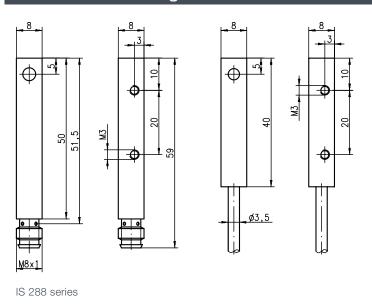

#### Benefits:

- Laterally aligned sensor field for space and hence cost-saving integration
- Short response times for reliable detection in dynamic processes to increase machine productivity

## /// IS 240

With its cubic design, this sensor is ideal for lateral mounting on conveying belts.

## Benefits:

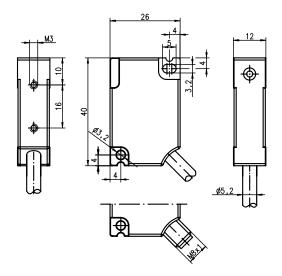

- Cubic construction for simple mounting on the side
- Quick and easy installation and commissioning saves mounting times and guarantees the highest availability
- Wider ranges offer high functional reliability
- Very clearly visible status display for reliable detection and commissioning even at long distances

IS 240 series

#### /// IS 244

With a sensor field that can be aligned in five directions, this compact sensor sees almost everything. Versions with M12 connector or convenient terminal compartment leave nothing to be desired.

#### Benefits:

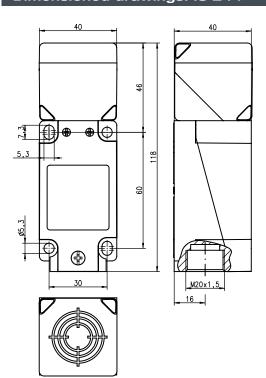

- Sensor field can be oriented in five directions for flexible mounting and simplified machine construction
- Status displays visible from all sides for reliable detection and commissioning
- Models with comfortable terminal compartment or M12 connector

# //STANDARD SENSORS, CYLINDRICAL HOUSING

## ROBUST SENSORS IN CYLINDRICAL DESIGN

The reliable detection of metal objects in a robust metal housing is the versatile area of application of these sensors. In addition to the design, the range Sn is an important selection criterion. Various switching outputs and connection options are available to suit a wide range of applications.

#### /// IS 208

With a diameter of just 8 mm, this small standard sensor can be custom-integrated in applications.

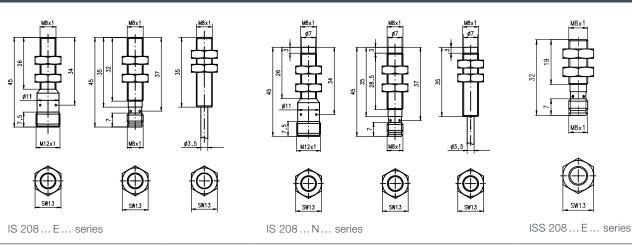

#### Benefits:

- Large ranges allow you to choose a smaller construction and thus save space and costs for the mechanical machine parts
- The sensor can be mounted at a greater distance from moving parts. This helps to avoid damage and ensures the machine availability
- The high sensitivity of the sensors makes them the inexpensive solution for special applications, e.g. for close-range detection of small parts

## /// IS 212

Even this standard design with M12 external thread has its special features: Increased ranges with a small design save space and money.

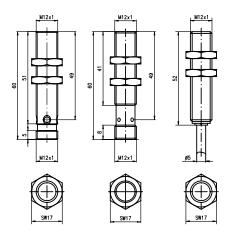

#### Benefits:

- Large ranges allow you to choose a smaller construction and thus save space and costs
- The sensor can be mounted at a greater distance from moving parts
- The high sensitivity of the sensors makes them the inexpensive solution for special applications, e.g. for close-range detection of small parts
- Sturdy all-metal housing for permanent operation

## /// IS 230

With a scanning range of up to 40 mm, this series in the M30 design opens the greatest possible flexibility during mounting.

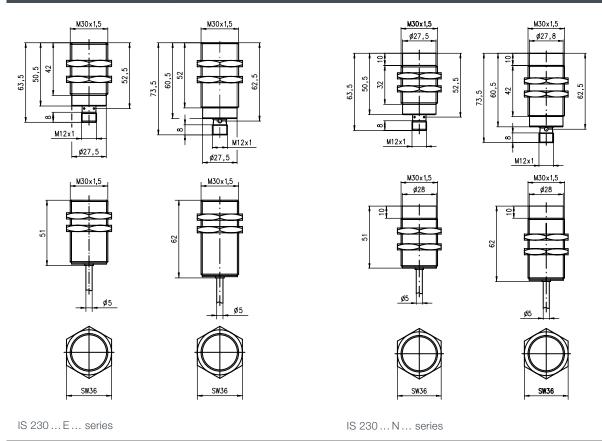

#### Benefits:

- Wide spectrum of available ranges enables application in limited spaces
- The sensor can be mounted at a greater distance from moving parts
- The high sensitivity of the sensors makes them the inexpensive solution for special applications, e. g. for close-range detection of small parts
- Sturdy all-metal housing for permanent operation

#### /// Sensors with reduction factor 1

Sensors with this feature provide a constant scanning range Sn, independent of the material – regardless of whether iron, stainless steel or copper. It can be used with objects made of different materials, or with very thin metal foils.

## (€

#### Benefits:

- Constant material-independent range Sn
- For various metals and thin foils

## **//ALL STAINLESS STEEL SENSORS**

## STAINLESS STEEL V2A / V4A SENSORS

Our inductive sensors made of stainless steel provide an optimal solution for use in environments with higher requirements on the housing material. Variants for the Food & Beverage area (316L) are also available.

## /// IS 208

V2A sensor for extreme environmental conditions and material-independent switching distance (reduction factor 1).

#### Benefits:

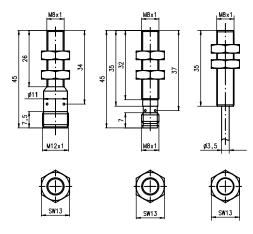

- Sturdy all-metal housing for high, permanent machine availability
- Housing of stainless steel V2A with degrees of protection IP 68 and IP 69K
- Switching distance independent of object property (reduction factor 1)

Direct access to the online product selector at www.leuze.com/en/is208

## Dimensioned drawings: IS 208

IS 208 ... E ... series

## /// IS 212

With their robust housing made of stainless steel, these sensors withstand even aggressive cleaning processes encountered in food and pharmaceutical production.

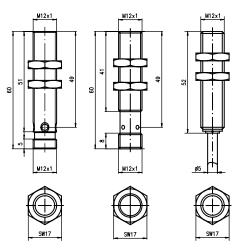

#### Benefits:

- Sturdy stainless steel housing for high, permanent machine availability
- Housing of stainless steel 316L with degree of protection IP 69K for food & beverage applications as well as V2A housing material with degree of protection IP 68/ IP 69K
- Large ranges on stainless steel objects for reliable detection of machine parts, e.g. on packaging machinery in the foodstuffs sector
- Switching distance independent of object property (reduction factor 1)

IS 218 ... N ... series

With a switching distance of up to 40 mm, this series in the M30 stainless steel design offers the greatest possible flexibility during mounting.

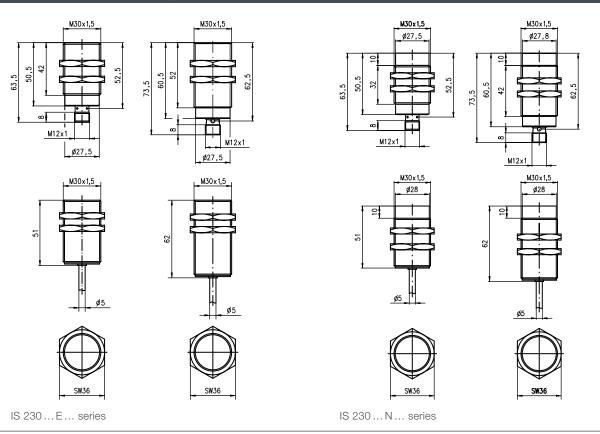

#### Benefits:

- Sturdy all-metal housing for high, permanent machine availability
- Housing of stainless steel 316L with degree of protection IP 69K for food & beverage applications as well as V2A housing material with degree of protection IP 68/ IP 69K
- Large ranges on stainless steel objects for reliable detection of machine parts, e. g. on packaging machinery in the foodstuffs sector
- Switching distance independent of object property (reduction factor 1)

## //MINIATURE SENSORS

## SPACE IN THE SMALLEST SYSTEM

For constrained spaces and special applications, Leuze electronic offers miniature sensor versions in a wide range of designs.

## /// IS 255

This subminiature sensor in a cubic housing measuring just 5×5 mm doesn't need to hide.

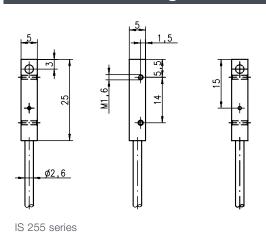

#### Benefits:

- Laterally aligned sensor field for space and hence cost-saving integration
- Short response times for reliable detection in dynamic processes

Direct access to the online product selector at www.leuze.com/en/is255

Part no.	Part description	Operating range Sa Typ. operating range limit Sn	Switching frequency	Type of installation	Switching output 1	Description	Connection	Material

#### /// IS 204

A cylindrical sensor with a diameter of just 4 mm fits in every system.

#### Benefits:

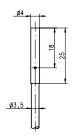

- Very small construction for integration in extremely confined spaces
- Large ranges offer broad application flexibility and sufficient function reserves for reliable detection even of different metals
- Short response times for reliable detection in dynamic processes

Direct access to the online product selector at www.leuze.com/en/is204

## / ULTRASONIC SENSORS

## THE ALL-ROUNDERS AMONG THE SENSORS

Ultrasonic sensors are used whenever optical systems reach their limits. Hence, partially and fully transparent or extremely dark objects can be detected just as easily as objects with reflecting surfaces or objects in dusty, vaporous or humid environments.

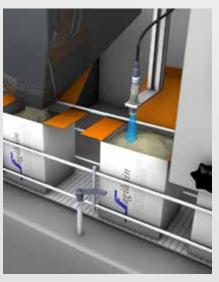

Ultrasonic sensors, cubic housing

**Page 139** 

Ultrasonic sensors, cylindrical housing

Page 142

# //ULTRASONIC SENSORS, CUBIC HOUSING

## SPECIALISTS FOR REFLECTIVE SURFACES

Our ultrasonic sensors in the cubic design feature a very good background suppression based on the reliable runtime measurement. Due to the largely surface-independent switching behavior, they are particularly well-suited for sound-reflecting materials.

#### /// 18 series

This ultrasonic sensor features a high sound pressure and is thus suitable even for air transport systems.

#### Benefits:

- Detection of narrow gaps
- Reliable object detection even in humid and foggy environment
- Metal housing
- Sensitivity adjustment via step switch
- Insensitive to dust

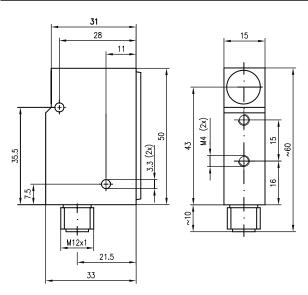

Direct access to the online product selector at www.leuze.com/en/br18u

Operating range: over the whole temperature range, measured object ≥ 20×20 mm<sup>2</sup>

## Dimensioned drawings: 18 series

18 series

## /// 420 series

From narrow to wide, this diffuse reflection ultrasonic sensor offers three different opening angles and sound lobes.

## Benefits:

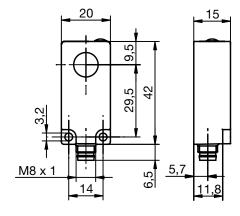

- Small ultrasonic sensor in plastic housing with degree of protection IP 67
- Various opening angles and sound cone geometries
- Switching behavior largely independent of surface properties
- Precise switching point adjustment through teach-in on the device and via a cable
- Protection against erroneous operation by automatically locking teach button

## Product selector

Intuitive web applications for convenient product selection

"Our goal is to further focus our performance and offer our customers something that they can only find from the sensor people – smart sensor business"

Ann-Kathrin Waldow, Sales Methods, Processes, Tools

The appropriate product for every application: www.leuze.com/en/products

# //ULTRASONIC SENSORS, CYLINDRICAL HOUSING

## EXPERTS IN CYLINDRICAL DESIGN

The cylindrical ultrasonic sensors with particularly thin sound cone are specially designed for the detection of small objects or objects in very small openings and for distance, height and dimension measurements of objects in many different areas of application.

#### /// 412 series

The cylindrical M12 design with two different opening angles ensures high flexibility during installation and use.

#### Benefits:

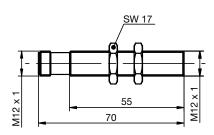

- Metal housing M12
- Precise switching point adjustment via line teach
- Especially narrow sound cone available

Direct access to the online product selector at www.leuze.com/en/br412u

## Dimensioned drawings: 412 series

412 series

Short design, teachable and up to 2 independent switching outputs are the key features of this series. Also optionally available with angled head, which enables a sound outlet at 90  $^{\circ}$  to the longitudinal axis of the M18 sensor. Versions available with temperature compensation and IO-Link.

#### Benefits:

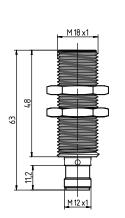

- Precise switching point adjustment through teach or via IO-Link
- One teach button per switching output
- Models with temperature compensation
- Operating mode setting and configuration via IO-Link (multiplex, parallel, throughbeam)
- Small dead zone at long range

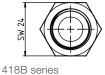

Direct access to the online product selector at www.leuze.com/en/br418u

## Dimensioned drawings: 418 series

## /// 430 series

Whenever large ranges are needed, the M30 sensors from the 430 series are the right choice. Two separate switching outputs can be set independently by means of teach button or IO-Link. A total of 10 of these sensors can be easily synchronized with a cable.

#### Benefits:

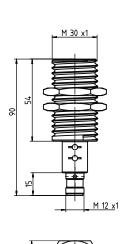

- Particularly compact design: M30
- Precise switching point adjustment through teach or via IO-Link
- One teach button per switching output
- Operating mode setting and configuration via IO-Link (multiplex, parallel, throughbeam)
- High accuracy through temperature compensation
- Small dead zone at long range

# / FIBER OPTIC SENSORS

## HOW TO BEND LIGHT AROUND A CORNER

With the use of fiber optics and appropriate amplifiers, the area of application of optoelectronic sensors is considerably expanded. The flexible fiber optics with various head shapes can be integrated in nearly any system design. The detection range is dependent on the fiber optics and amplifiers used.

Amplifiers Page 147

# vitching

## **//AMPLIFIERS**

## SIMPLE SETUP AND CONTROL

The optical fibers are plugged into the amplifier. Depending on the model, the ranges of the fibers and the available functions vary.

## /// LV461

The series satisfies all basic requirements: 20-turn potentiometer for high-resolution sensitivity adjustments, 2 switches for light/dark switching and for selecting between larger range or higher switching frequency.

(€

#### Benefits:

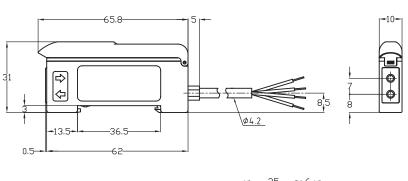

- Mode changeover: range / response time
- Light/dark switching
- 20-turn potentiometer for sensitivity adjustment

Direct access to the online product selector at www.leuze.com/en/lv461

LV 461 fiber optic amplifier

## /// LV462

The series has a 4-digit display for displaying the switching threshold. The setting is made with the AutoSet function or manually with the  $\pm$  button. A switch for light/dark switching and simple menu functions for setting the range and various timing functions complement the device features.

#### Benefits:

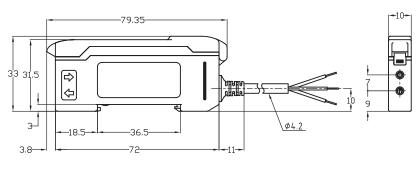

- 4-digit display
- High dynamics
- Time functions configurable on the device
- Sensitivity levels configurable on the device
- Light/dark switching
- Easy sensitivity adjustment via AutoSet function

LV 462 fiber optic amplifier

## /// LV463

The high-performance LV463B fiber optic amplifier convinces with its extensive setting options for operating ranges, sensitivities and time functions. The signal value, and at the same time the switching threshold, are shown on two easy-to-read displays. Three different teach modes considerably simplify configuration. Also available as IO-Link variant.

Direct access to the online product selector at www.leuze.com/en/lv463

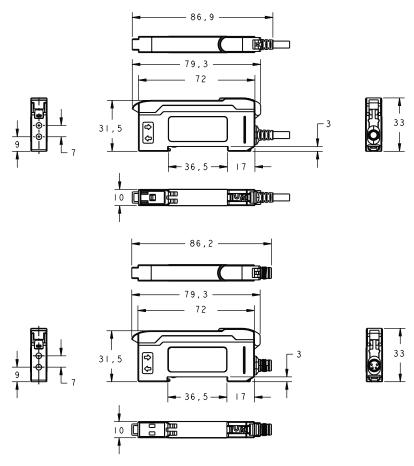

#### Benefits:

- Double display to show signals and switching thresholds in parallel
- 3 different teach modes for fast sensor setting
- Extensive configuration options, e. g. for operating range, sensitivity or time functions
- Internal multiplex operation of up to six units for preventing mutual interference
- Also available as IO-Link variant

## **//FIBER OPTICS**

## PLASTIC OR GLASS - DEPENDING ON THE AREA OF APPLICATION

For simple integration, each is available in a range of different designs and fiber optics cross sections.

## /// Plastic fiber optics

Plastic fiber optic cables are available for reflective operation or for the throughbeam principle. The selection is made depending on the design of the fiber head and the functional characteristics of the fibers. A very wide selection of different fiber optics are available, including with bend protection.

## Benefits:

- Large selection of fiber optics
- Fiber optics with injection-molded bending protection
- Fiber optics with lateral optics
- Cross-section converter
- Fiber optics with V-optics
- Attachment lens for greater ranges or higher precision

## /// Glass fiber optics

For applications with high temperature resistance, glass fiber optics are often used. The selection is made depending on the design of the fiber head and the sheathing material.

## Benefits:

- Wide variety of types of glass fiber optics
- Mechanically robust metal sheathing designs, partially from corrosion-proof stainless steel
- Use also possible at high temperatures
- Special solutions for vacuum-sealed light feed-throughs

Direct access to the online product selector at www.leuze.com/en/glass-fo

# / FORKED SENSORS

## NOTHING GETS PAST THESE FORKS

Sensors of this series combine transmitter and receiver into a single device and therefore feature high operational safety. They are characterized by simple mounting without alignment work as well as high sensitivity. The sensors are used for detecting small parts or for detecting labels and print marks, even on transparent foils.

## Forked sensos for object detection

Page 156

## Forked sensors for label detection

Page 158

# //FORKED SENSOS FOR OBJECT DETECTION

## MAXIMUM PRECISION FOR THE SMALLEST PARTS

The design of these sensors makes them the ideal choice for the detection of small parts. High sensitivities and fast reaction times facilitate simple and reliable integration of these sensors in fast automation processes.

## /// GS 04

This series, with mouth widths from 20 to 220 mm, can be optimally adapted to a given application by means of their sensitivity adjustment and light/dark switching. Laser variants can be used to reliably detect even the smallest parts.

#### Benefits:

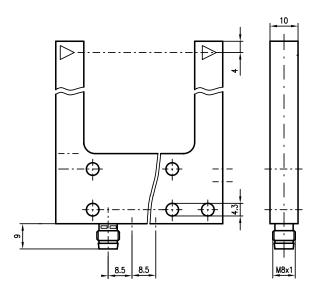

- Sensitivity adjustment and light/dark switching for optimum adaptation to the application
- Sensitivity adjustment on the back of the fork
- Robust metal housing and glass optics for protection against environmental influences
- Transmitter and receiver are installed in the same housing, therefore easy and fast mounting (complex mounting brackets and extensive alignment not necessary)

# //FORKED SENSORS FOR LABEL DETECTION

# RELIABLE DETECTION IN A WIDE RANGE OF DIFFERENT APPLICATIONS

Precise and fast detection – even at high web speeds – and the reliable detection of a wide range of material combinations and surfaces. These are the demands professional sensors must meet for labeling applications. And here we offer the right solution for every application with our wide line of different designs and operating principles, from light to ultrasonics.

#### /// GS 61

Optical forked photoelectric sensor in slim-line design with 3 mm mouth width for exact detection of labels on base material.

#### Benefits:

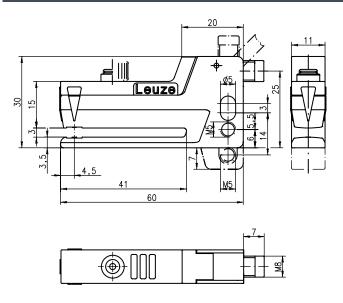

- Simple sensitivity adjustment via multiturn potentiometer or optionally via teach-in function
- Slimline-design (reduced fork height) for installation directly at the dispensing edge
- Removable operating head for comfortable potentiometer adjustment
- Smallest dimensions of all industrial forked photoelectric sensors with an excellent price / performance ratio

## **Dimensioned drawings: GS 61**

GS 61 forked sensor

## /// GS 63B

The chemically nickel-plated metal housing of this optical forked photoelectric sensor is ideal for applications in the foodstuffs sector where it is critical that no paint chipping occurs. The flat fork enables installation in a groove directly at the dispensing edge to achieve – together with the short response time – a high dispensing accuracy. With a 3 mm mouth width and 60 mm mouth depth, the sensor is also very well suited for wide labels.

#### Benefits:

- High switching frequency and short response time guarantee very good repeatability
- Easy adjustment via lockable teach button or teach input
- Slimline-design (reduced fork height) for installation directly at the dispensing edge
- ALC (auto level control) function: maximum function reserve via automatic online optimization of the switching threshold
- Warning output for indicating teach or function errors

## /// GK 14

The capacitive forked sensor is particularly well suited for transparent labels without metallic coating.

## Benefits:

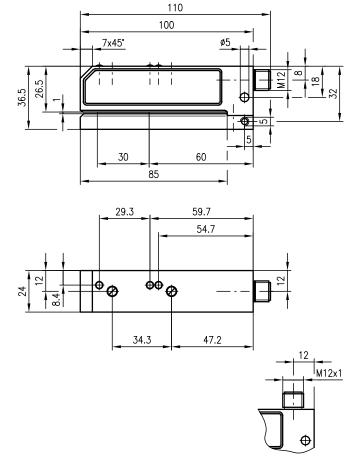

- Forked sensor for reliable detection of transparent and opaque labels
- PNP and NPN transistor output for optimum adaptation to the controller
- Robust metal housing with beveled inlet edges
- Inverting input for easy adaptation of the output signal level

GK 14 capacitive forked sensor

## /// GSU 06

This forked sensor with metal housing is very well suited for the detection of foil labels, metallic-coated foil labels and thin metal foils. A special variant for paper tear monitoring is also available.

#### Benefits:

- Reliable detection of foil labels on foil carriers or paper carriers, paper labels on paper carriers, metallic foil labels and thin metal foils
- Simple adjustment via teach-in by pressing a button or remote calibration 1
- Static PNP and NPN transistor outputs for optimum adaptation to the controller
- M8/M12 connector or cable version

Part no.	Part description	Principle of physics	Mouth width	Switching output 1	Switching output 2	Response time	Description
50039638	GSU 06/24-2-S8	Ultrasonics	2.5 mm	Transistor, PNP, switching signal in label gap	Transistor, NPN, switching signal in label gap	0.3 ms	Connector, M8, 4-pin, teach button
50040191	GSU 06/24-2	Ultrasonics	2.5 mm	Transistor, PNP, switching signal in label gap	Transistor, NPN, switching signal in label gap	0.3 ms	Cable, 2,000 mm, 5-wire, teach button
50040190	GSU 06/24D-2-S8	Ultrasonics	2.5 mm	Transistor, PNP, switching signal on label	Transistor, NPN, switching signal on label	0.3 ms	Connector, M8, 4-pin, teach button
50108819	GSU 06/24D-2,200-S12	Ultrasonics	2.5 mm	Transistor, PNP, switching signal on label	Transistor, NPN, switching signal on label	0.3 ms	Cable with connector, M12, 200 mm, 5-pin, teach button
50040192	GSU 06/24D-2	Ultrasonics	2.5 mm	Transistor, PNP, switching signal on label	Transistor, NPN, switching signal on label	0.3 ms	Cable, 2,000 mm, 5-wire, teach button

The switching frequency is dependent on the conveyor speed, label length and spacing between labels

GSU 06 ultrasonic forked sensor

## /// GSU 14D

Ultrasonic forked sensor for reliable detection and universal application. With its large mouth width, this ultrasonic forked sensor is also suitable for leaflet and booklet labels.

## Benefits:

 Reliable detection of foil labels on foil carriers, foil labels on paper carriers, paper labels on paper carriers, metallic foil labels and thin metal foils

## **Dimensioned drawings: GSU 14D**

GSU 14D ultrasonic forked sensor

## /// IGSU 14D

The model with chemically nickel-plated metal housing is ideal for applications in the foodstuffs sector where it is critical that no paint chipping occurs. With Easy Teach (press button, dispense labels, done), static teaching without loss of labels, ALC function for readjustment of the switching threshold, warning output and practical accessories, this forked sensor is always the first choice for universal label detection. And, with its large mouth width, it is also ideal for booklet and leaflet labels.

#### Benefits:

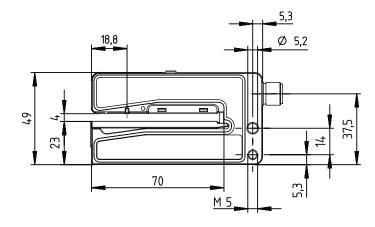

- Forked sensor for reliable detection of foil labels on foil carriers or paper carriers, paper labels on paper carriers, metallic foil labels and thin metal foils
- Model for the reliable detection of splice on paper web or plastic web
- easyTeach function: press button dispense labels – done
- ALC function (auto level control): maximum function reserve via automatic online optimization of the switching threshold

## SMARTER CUSTOMER SERVICE

24 h support

On-Call Service and technical support all around the clock

"In our Service Center in Owen, we have a lot of expert colleagues who, as sensor people, can reliably handle your questions and problems – and are happy to help you around the clock."

Simone Fischer, Customer Care Center

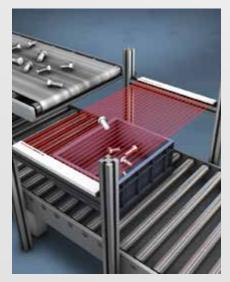

You can reach the sensor people around the clock: www.leuze.com/en/support

# / LIGHT CURTAINS

## **OBJECT DETECTION MADE EASY**

The switching light curtains from Leuze electronic are able to monitor a large measurement field and respond if sensor beams in the field are interrupted. Various resolutions and measurement field lengths enable reliable use in a variety of applications.

## /// CSL 505

The cost-optimized, CSL 505 switching light curtain is specially designed for simple applications. With its slim design, integrated evaluation unit and large opening angle for quick and simple alignment, it can be used for projection monitoring, free field monitoring and object detection.

## Benefits:

- Different measurement field lengths
- Selectable resolution
- M8 connector plug
- Slim housing
- Operating range up to 5 m
- Short cycle time
- Prefailure message (soiling)

## /// CSL 710

The CSL 710 is a switching light curtain with selectable resolution, various measurement field lengths and many useful technical details such as, e.g., a display for simple alignment.

#### Benefits:

- Operating range of up to 6 m for larger function
- Response time of 30 µs per beam for the reliable detection of fast processes
- Large, easy-to-read display in 5 languages for easy alignment and configuration
- Maximum measurement field length of nearly 3 m for measurement on large objects
- Sturdy metal housing also for use in rough industrial environments
- Connection via M12 connector for fast installation
- 4 configurable inputs or outputs

## /// CSR 780

The CSR 780 is a switching light curtain that functions according to the reflection principle and has high resolution and fast response time specifically for counting objects on machines or for ejection monitoring.

## Benefits:

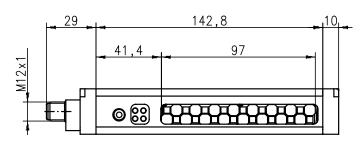

- Transmitter and receiver in one housing
- Reflection principle against a reflector
- Complete detection of small objects (e. g. 10 mm × 10 mm × 1 mm)
- Max. object speed 3.5 m/s
- Readjustment when soiled
- Warning output for prefailure message
- Time-saving adjustment by means of teach-in

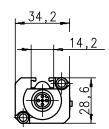

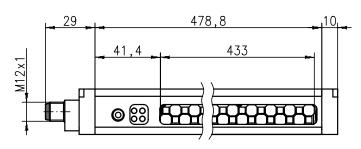

Direct access to the online product selector at www.leuze.com/en/csr780

Switching sensors

### / SPECIAL SENSORS

### RELIABLE, EVEN WHEN THINGS GET CHALLENGING

Under this heading are sensor solutions that must perform special detection tasks or which were developed for specific applications. Here you will find contrast and luminescence sensors as well as color sensors and systems for monitoring double sheets and splices as well as for overlap detection.

**Contrast sensors Page 182** 

**Page 189 Luminescence sensors** 

**Color sensors Page 191** 

### **//CONTRAST SENSORS**

#### THE CONTRAST MAKES THE DIFFERENCE

This sensor type can use various light sources - such as white light, laser-generated red light or RGB light - to very precisely detect and compare contrasts and report the results to the process with minimal signal jitter. Through the automatic selection of the right transmitter colors, various color or gray value combinations can be reliably detected.

#### /// KRT 3B

The contrast sensors of the KRT 3B series distinguish between grayscale values, enabling them to detect minimal contrasts. As a result, a check can be performed for the presence of text or imprints or so-called marks detected.

#### Benefits:

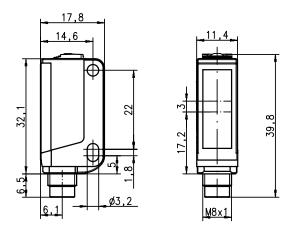

- Range 14.5 mm/ 60 mm (laser)
- Multicolor (RGB), white or laser light
- Various teach-in processes
- Switching-threshold correction via EasyTune
- Min. response time 50 µs
- Switching frequency up to 10 kHz
- Pulse stretching
- IO-Link interface

#### /// KRT 55

Wherever food, beverages, pharmaceutical products or even cosmetics are manufactured, processed and packaged, hygienic design has become a central requirement. These contrast sensors in WASH-DOWN design can withstand even more intensive cleaning and disinfection cycles. The IO-Link interface facilitates simple adaptation to complex applications.

#### Benefits:

- Stainless steel housing AISI 316L
- 13 mm range
- RGB or white light
- Various teach-in processes
- Switching-threshold correction via EasyTune
- Response time 50 µs
- Switching frequency 10 kHz
- Pulse stretching
- IO-Link interface

#### /// KRT 20

With jitter times < 7  $\mu$ s, with precise, round and small light spots, with memory bank administration and freely programmable interface, with perfect temperature compensation, these devices in a robust metal housing can handle even the fastest processes.

#### Benefits:

- Metal housing with interchangeable lenses
- 12/20 mm and 50 mm range
- Very high resolution
- Response time: 10 ms
- Switching frequency 50 kHz
- Switching and analog output
- Temperature compensation
- Pulse stretching
- Switching-threshold changeover
- Freely programmable
- Rectangular or round light-spot profile

#### /// KRT 21

With a response time of 33 µs, RGB transmitter, interchangeable lenses and other fundamental equipment details, any contrast marks are reliably detected. The simple adjustment to mark and background makes for uncomplicated commissioning.

#### Benefits:

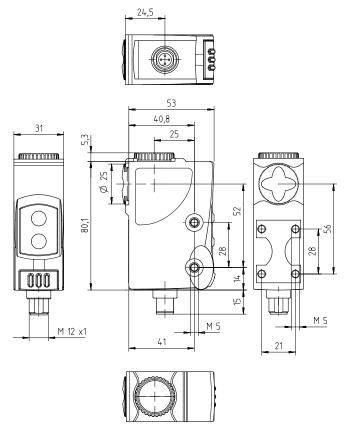

- 9 mm or 18 mm range
- Interchangeable lenses made of glass and plastic
- Multicolor (RGB) transmitter
- Static teach-in
- Response time 33 µs
- Switching frequency 15 kHz
- Pulse stretching

### **//LUMINESCENCE SENSORS**

#### I SEE WHAT YOU DON'T SEE

This sensor detects both visible as well as invisible luminescent markings. It sends the result as switching output or analog value and is used primarily for sorting and inspection tasks in areas in which other detection methods fail to supply reliable results or where the markings should not or must not be visible.

#### /// LRT 8

With various light spot profiles, filters, transmitter variants and accessories, this compact design includes everything needed for detecting luminescent objects.

#### Benefits:

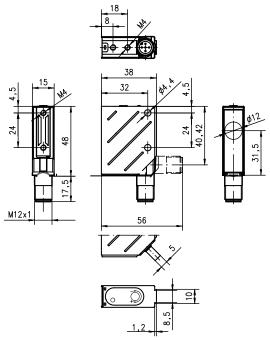

- Ranges up to 200 mm
- Very compact metal construction
- Switching frequency 1.5 kHz
- Sensitivity adjustment via potentiometer
- Turnable M12 connector
- Filter variants

Direct access to the online product selector at www.leuze.com/en/lrt8

#### **SMARTER PRODUCT USABILITY**

### **//COLOR SENSORS**

#### ALWAYS GOOD WHEN THINGS GET COLORFUL

This sensor type detects colors and compares them to a stored reference value. They are the right solution whenever the color of an object or marking can serve as a sorting or inspection criteria. Depending on the configuration and specified tolerance values of the system, the result is output as a switching signal.

#### /// CRT 20B

Thanks to extensive configuration options and 1 or 4 color channels with individually adjustable color tolerance, this series can be used for fast processes with short response times.

#### Benefits:

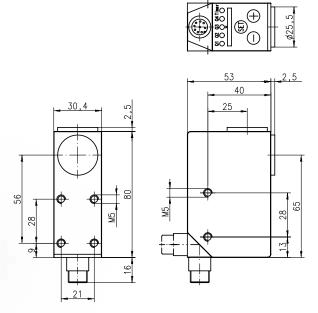

- 12.5 mm or 60 mm range
- Very robust metal construction
- Simple teach-in of up to four reference colors
- Sensitivity adjustment following teach-in
- Color tolerance separately adjustable per color channel
- Switching frequency up to 6 kHz
- Extensive configuration options
- Turnable M12 connector

#### /// CRT 448

This series with 3 color channels and the scan function for color gradients can be used flexibly in many areas of applications.

#### Benefits:

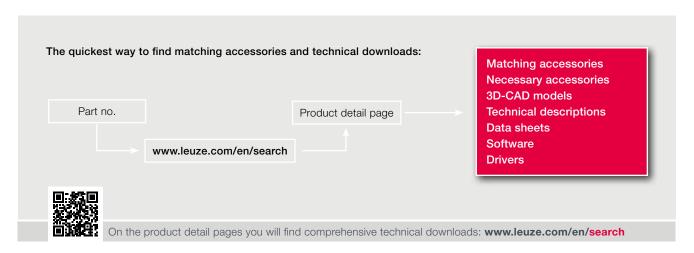

- 22 mm or 32 mm range
- Small plastic construction
- Simple teach-in of three reference colors
- Scan function for color gradients
- Color tolerance separately adjustable per color channel
- 500 Hz switching frequency
- Configuration options
- Turnable M12 connector

### **MEASURING SENSORS**

## INTELLIGENT MONITORING AND CONTROL THROUGH MEASURING SENSORS

Measuring sensors can actively check distances, position system parts and monitor other parameters in order to intelligently and independently initiate actions and, e.g., intervene in processes for control purposes. Here, you will find a large selection of technologies and designs for as efficient and fault-free system operation as possible.

/ Distance sensors	Page 196
/ Sensors for positioning	Page 210
/ 3D sensors	Page 221
/ Light curtains	Page 228
/ Measuring forked sensors	Page 237

### / DISTANCE SENSORS

#### YOUR YARDSTICK

Our distance sensors stand for maximum accuracy - over small as well as large distances. They are used everywhere geometric parameters such as height or width need to be determined. They are characterized by high resolving capacity at high measurement rates. Especially our ultrasonic sensors facilitate reliable measurement results with transparent objects – even under difficult environmental conditions.

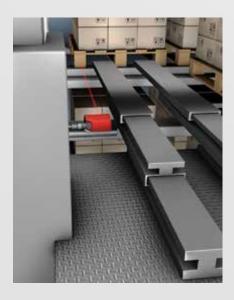

### Optical distance sensors

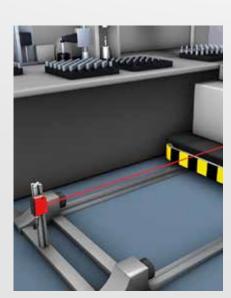

**Page 197** 

#### **Ultrasonic distance sensors**

Page 207

### LIGHTS ON - MEASUREMENT STARTS

These sensors use laser or LED light to quickly and precisely measure distances on a wide range of materials, even at large ranges.

#### /// ODSL 8

The compact laser distance sensors of this series in a compact metal housing supply reflection-independent distance information. The sensor can be quickly commissioned through teach-in.

### (€

//OPTICAL DISTANCE SENSORS

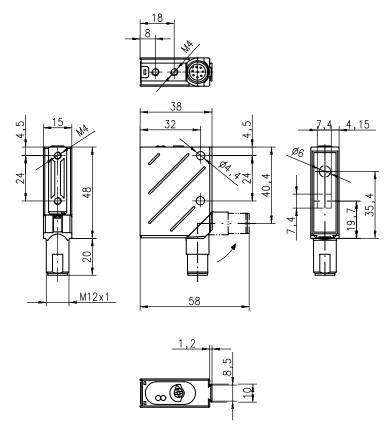

#### Benefits:

- 20 mm ... 500 mm measurement range
- Robust metal housing
- Teachable analog and switching outputs
- Turnable M12 connector

#### /// **ODSL** 9

The ODSL 9 optical distance sensors set new standards in precision and ease of use. The sensor enables accurate measurements even under difficult conditions, e.g., with glossy objects. The integrated display shows the measurement values and facilitates easy adjustment of the sensor. The distance sensors reveal their enormous potential for precision when used in combination with digital interfaces.

Direct access to the online product selector at www.leuze.com/en/odsl9

#### **ODSL 9**

This series measures very precisely even over longer distances making it suitable for the positioning of actuators and robots.

- High accuracy up to 650 mm
- Reflection-independent distance measurement
- Display for measured value display and configuration
- Analog current/voltage output
- Switching outputs adjustable with millimeter accuracy
- IO-Link, serial interface RS 232/485

#### **ODSL 9 high resolution**

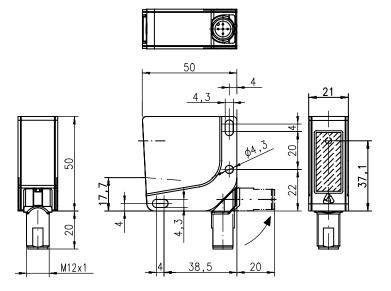

With a resolution of 0.01 mm, the sensors are designed for the contour measurement of small objects and quality control on assembly lines.

#### Benefits:

- Maximum accuracy in compact design
- Resolution 0.01 mm with a measurement range of 50 mm
- Reflection-independent distance measurement
- Display for measured value display and configuration
- Analog voltage/current output, switching outputs
- IO-Link, serial interface RS 232

#### /// ODS 10

The ODS 10 is an optical distance sensor that measures distance against a non-cooperating target and makes the information available as a measurement value. The maximum range of the device is 8,000 mm, whereby an accuracy of ±15 mm is achieved. A range of up to 25,000 mm can be achieved for distance measurements using a reflector. The level of accuracy is almost fully independent of the material.

#### Benefits:

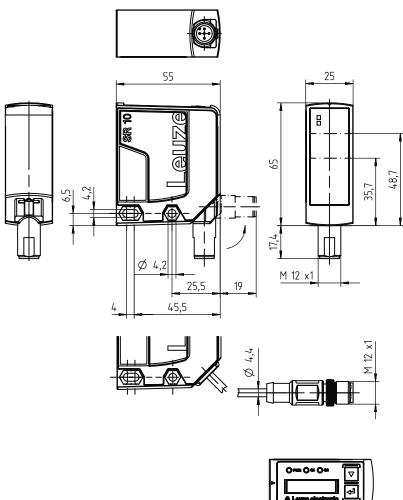

- Eye-safe laser class 1
- Reliable detection of dark, glossy and colored objects
- Recess for M4 bolts enables the installation of this device using just one tool
- No tools required for locking of nuts and screws
- Rotatable M12 connection, space-saving cable outlet or pigtail
- Large buttons enable finger operation without tools
- Status LED indicators on top and front allow detection of switching state from afar
- Configuration options via I/O-Link and Sensor Studio
- Compact housing

#### /// ODS 96B

Series ODS 96B distance sensors with large measurement ranges of 60 to 25,000 mm are suitable for many different applications and, thanks to the metal housing, are extremely robust. They measure in the ms range. The integrated display shows the measurement values and allows the sensor to be easily adapted to the measurement task. Apart from analog current/voltage interfaces and binary switching outputs, digital interfaces are also available. Digital interfaces prevent conversion losses in the sensor, control and during measurement data transfer.

Direct access to the online product selector at www.leuze.com/en/ods96b

#### **ODS(R) 96B**

Measures with either red LED light or infrared light and is suitable for large-area objects, such as bulk material.

- For measurements on objects with large surface area, e.g. bulk material, band materials, plate materials
- Robust metal housing
- High accuracy reflection-independent distance measurement
- Display for measured value display and configuration

Part no.	Part description	Measurement range	Light source Safety class	Light spot dimensions	Analog outputs	Digital switching outputs	Resolution	Measure- ment time	Description

#### **ODSL 96B-XL**

Elongated light spot for precise measurements on porous objects and objects with openings (e.g. corrugated cardboard) as well as on objects that are not aligned precisely.

#### Benefits:

Benefits:

■ Small laser light spot

■ Elongated light spot for precise measurement

Part no.	Part description	Measurement range	Light source Safety class	Light spot dimensions	Analog outputs	Digital switching outputs	Resolution	Measure- ment time	Description
50106736	ODSL 96B M/C6.XL-1200-S12	150 1,200 mm	Laser, red, 2	15 mm × 4 mm	1x, current	1x	0.1 1.5 mm (XL)	1 5 ms	Extra long light spot (XL), connector, M12, metal, 5-pin

#### ODSL(R) 96B

Even over large ranges of up to 2 m, this sensor measures in the ms range with millimeter precision. High resolving power in compact, robust design.

- For measurements in ms cycle at large ranges
- Stable and precise measurement values, even at varying temperatures and objects
- Robust: IP 67, IP 69K

Part no.	Part description	Measurement range	Light source Safety class	Light spot dimensions	Analog outputs	Digital switching outputs	Resolution	Measure- ment time	Description

#### **ODSL 96-Teach**

For simple applications, these sensors with plastic housing offer a large measurement range. The sensor can be quickly commissioned through teach-in.

#### Benefits:

- Reflection-independent distance information
- 2 teachable switching outputs (push-pull)
- Easy alignment through visible red light
- Degree of protection IP 67
- Measurement range / operating range up to 2,300 mm

Part no.	Part description	Measurement range		Light spot dimensions	Analog outputs	Digital switching outputs		Measure- ment time	Description
50101882	ODSL 96K/66-2300-S12	150 2,300 mm	Laser, red, 2	3 mm × 8 mm		2x	1.0 5.0 mm	27 ms	Connector, M12, plastic, 5-pin
50101881	ODSL 96K/V66-2300-S12	150 2,300 mm	Laser, red, 2	$3  \text{mm} \times 8  \text{mm}$	1x, voltage	2x	1.0 5.0 mm	27 ms	Connector, M12, plastic, 5-pin

#### **ODSL 96B-TOF**

Large range also with dark objects. Measurement according to the "time of flight" principle.

#### Benefits:

- Large range even with dark objects
- Various operating modes for fast or precise measurement
- Robust measurement procedure
- Very high immunity to ambient light
- Display for measured value display and configuration

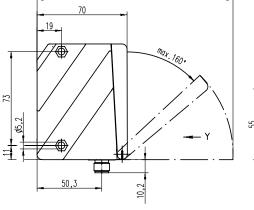

Part no.	Part description	Measurement range	Light source Safety class	Light spot dimensions	Analog outputs	Digital switching outputs	Resolution	Measure- ment time	Description

#### ODKL 96B

A visible light spot ensures easy alignment. By measuring on reflectors, ranges of up to  $25\,\mathrm{m}$  are no problem.

- Fast and easy alignment due to highly visible laser light spot
- Very high range by measuring on reflective tape
- Compact design

Part no.	Part description	Measurement range	Light source Safety class	Light spot dimensions	Analog outputs	Digital switching outputs	Resolution	Measure- ment time	Description

#### /// ODSL 30

The ODSL 30 measures distances on black objects up to 30 m away and on bright objects as far as 65 m away. The sensor resolution of 1 mm enables highly accurate measurements over the complete measurement range. The integrated display shows the measurement values and allows the sensor to be easily adapted to the measurement task. Apart from analog current/voltage interfaces and binary switching outputs, digital interfaces are also available. The distance sensors reveal their enormous potential for precision when used in combination with digital interfaces.

#### Benefits:

- Absolute measurement accuracy ± 2 mm over the entire measuring range
- Distances of 0.2–30 m on bright and black objects
- Referencing function for preventing fluctuations in measurement values
- Display for measured value display and configuration
- Ex model available

### **//ULTRASONIC DISTANCE SENSORS**

#### WHEN LIGHT ISN'T ENOUGH

With ultrasonic technology, it is possible to reliably detect even partially or completely transparent objects and to perform reliable distance measurements. In addition, measurements can be performed in dusty, hazy or humid environments.

#### /// 418 series

With its small, cylindrical design, this ultrasonic distance sensor can be integrated problem-free. The full-metal housing and temperature compensation make use possible under adverse conditions.

#### Benefits:

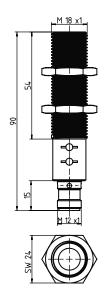

- Color and transmission independent detection of objects
- Current or voltage output configurable via PC software
- To avoid mutual interference, max. 10 sensors may be synchronized via one cable
- Sensitivity, average value calculation, reduction of the response time and outputs configurable via IO-Link
- Teach button

#### /// 430 series

The new M30 models in metal housing are much more compact and ideal for detecting levels of liquids and bulk material. High accuracy through temperature compensation.

#### Benefits:

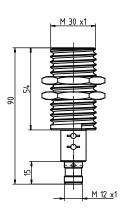

- Ideal for detection of levels of liquids, bulk material, transparent media and highly reflective objects
- Distance information largely independent of surface properties
- Current or voltage output and a switching output configurable via PC software
- To avoid mutual interference, max. 10 sensors may be synchronized via one cable
- Sensitivity, average value calculation, reduction of the response time and outputs configurable via IO-Link
- Teach button

### / SENSORS FOR POSITIONING

#### AT THE RIGHT POSITION WITH MILLIMETER ACCURACY

With moving system parts that need to automatically work together, the positioning of parts or work pieces with millimeter accuracy is of great importance. We offer devices with two operating principles. One is a laser distance measurement device that measures against a reflector and the other is a bar code positioning system that has a red light laser which determines the position and speed relative to a bar code tape.

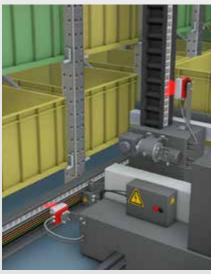

**Optical laser measurement systems** 

**Page 211** 

Bar code positioning systems

Page 215

# //OPTICAL LASER MEASUREMENT SYSTEMS

#### THE POWER OF OPTICAL LASER DISTANCE MEASUREMENT

The AMS 300i sensor calculates distances to moving system parts contact-free, fast and with absolute precision at ranges up to 300 m. In cycles lasting just milliseconds, the laser distance measuring system provides the distances required for dynamic control functions with millimeter accuracy using a unique selection of Industrial Ethernet and fieldbus interfaces.

#### /// AMS 300i

With the AMS 300i, distances of up to 300 m can be calculated with maximum accuracy and in intervals in the order of milliseconds through the use of the latest signal processors. Borderline situations are detected and indicated with the integrated, extensive functionality catalog.

#### Benefits:

- Repeatability of 1 mm, with tested absolute measurement accuracy from ± 2 mm to ± 5 mm at a range of 300 m
- Simultaneous calculation and monitoring of position and speed
- Integrated interface diversity for problem-free integration into a large array of control systems
- Red light laser for simple alignment and real-time position measurement
- Integrated intelligent mounting solution for simple alignment and fastening
- Plain-text display in 5 languages for international use
- With the PROFINET and PROFIBUS variants, a parallel SSI interface is available

### //BAR CODE POSITIONING SYSTEMS

### POSITION DATA WITHOUT LIMIT - "INFINITE", CURVE-GOING AND WITH MILLIMETER ACCURACY

The read head of the bar code positioning system is moved along a bar code tape. It calculates the absolute position data in the direction of travel with millimeter accuracy up to a distance of 10,000 m. The bar code tape is extremely simple to use and can be bonded both in straight lines and in curves. Maximum flexibility, simple mounting, transparent diagnosis as well as a large selection of integrated interfaces are the strengths of this system.

#### /// BPS 300i

The BPS 300i is the second generation of bar code positioning and sets standards both in performance characteristics and in handling. The new "availability control" function allows diagnosis to be performed during operation. The large working range of  $\pm 60 \, \text{mm}$  makes mechanical installation easier and precise measurements possible even if the distance to the tape varies.

#### Benefits:

- Availability control: To reliably prevent failures resulting from contamination, the device constantly reports its function reserve, thereby indicating possible problems due to contamination
- Easy handling: Fast, secure mounting and precise positioning of replacement devices through easy-mount mounting technology
- Absolute positioning up to 10,000 m with reproducible accuracy of ± 0.15 mm
- Maximum speed 10 m/s
- Modularity: three selectable connection technologies, heating and display

#### /// BPS 8

Our BPS 8 compact bar code positioning system convinces with its robust metal housing and turnable M12 connector.

The RS 232 or RS 485 interface allows the system to be incorporated in your system architecture. The BPS8 is available with either front beam exit or with a deflecting mirror.

#### Benefits:

- Absolute position measurement up to 10,000 m
- Curve-going, horizontally and vertically
- Degree of protection: IP 67
- Various protocols on RS 232, RS 485 via MA 8
- Reproducibility: ±1 mm
- Exact positioning at switches by means of special labels

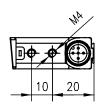

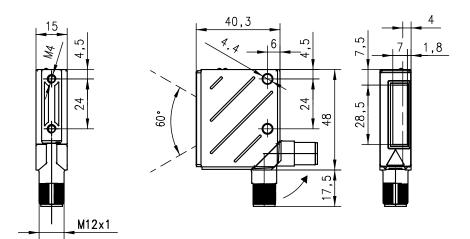

Direct access to the online product selector at www.leuze.com/en/bps8

## / 3D SENSORS

#### WOULD YOU LIKE ANOTHER DIMENSION WITH THAT?

These sensors determine height contours. 3D data can be easily generated for moving objects or by moving the sensor. The measurement data can either be output for external processing or preprocessed in the sensor for convenient object measurement or detection.

#### **Light section sensors**

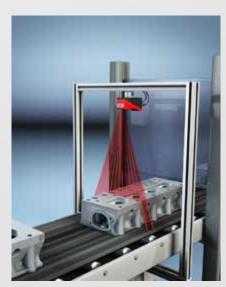

Page 222

#### Laser scanners

Page 226

## **//LIGHT SECTION SENSORS**

#### ALONG THE LINE

Light section sensors measure height profiles along a projected laser line. With these sensors, objects with high resolution can be detected quickly and reliably in 3D. Depending on the model, the function range extends from simply presence monitoring to edge measurement to 3D measurement of objects.

#### /// LPS 36

The LPS 36 profile camera is used wherever height profiles need to be determined for moving or static objects. An additional encoder port supports the generation of calibrated 3D data. This opens numerous application possibilities, such as robot guidance as well as contour/volume measurements.

#### Benefits:

- Laser measurement technology with light-section method
- Laser line 600 mm at a distance of 800 mm
- Measurement time: 10 ms
- Measurement range: 200–800 mm
- Compact construction: 160 × 74 × 56 mm
- Interface: Ethernet
- Optional: encoder input

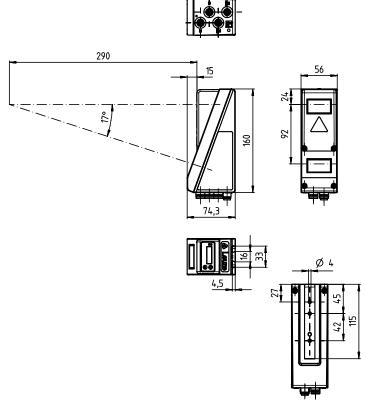

Direct access to the online product selector at www.leuze.com/en/lps36

Measurement ranges: Luminosity coefficient 6 ... 90 %, entire measurement range, at 20 °C after 30 minutes warmup time, medium range of U<sub>B</sub> Resolution: minimum and maximum value depend on measurement distance

#### **Dimensioned drawings: LPS 36**

LPS 36 line profile sensor

#### /// LES 36

The integrated edge detection of LES sensors determines the dimensions of objects or measures the exterior edges of web material products. The calibrated measurement data can easily be further processed via Ethernet, analog interface or fieldbus. Height, width and position measurements can be quickly and easily realized through configuration.

#### Benefits:

- Laser measurement technology with light-section method
- Up to 4 measurement fields in 16 inspection tasks
- Measurement time: 10 ms
- Measurement range: 200-800 mm
- Data calculation and processing directly inside the sensor
- Compact construction: 160 × 74 × 56 mm
- Interface: Ethernet, analog or fieldbus

Measurement ranges: Luminosity coefficient 6 ... 90 %, entire measurement range, at 20 °C after 30 minutes warmup time, medium range of U<sub>B</sub> Resolution: minimum and maximum value depend on measurement distance

#### **Dimensioned drawings: LES 36**

#### /// LRS 36

Line range sensors are designed to perform scanning, two-dimensional object detection along a laser line. Up to 16 objects can be simultaneously detected with one sensor. Through configuration settings, complex detection tasks can be mastered with just one sensor. Results are output via Ethernet, fieldbus interfaces or binary switching outputs. A perfect solution, e.g., for multiple track transport or completeness monitoring.

#### Benefits:

- Laser scanning using the light section method
- Up to 16 detection fields in 16 inspection tasks
- Measurement time: 10 ms
- Detection range: 200–800 mm
- Data calculation and processing directly inside the sensor
- Compact construction: 160 × 74 × 56 mm
- Interface: Ethernet, I/O or fieldbus

#### SMARTER PRODUCT USABILITY

Stable processes as a result of the largest possible function reserves

## availability control.

Early warnings in case of dirty devices prevent costly system downtime

think modular.

Freely selectable function range comprising various equipment features

## easyhandling.

Intelligent ideas for installation and alignment and easy operation of the devices

## integrated connectivity.

Integrated interface diversity for simple integration in your fieldbus

Additional usability highlights can be found at: www.leuze.com/en/products

## **//LASER SCANNERS**

#### HIGH OPERATING RANGES WITH LARGE VIEWING ANGLES

Laser scanners detect their environment using a quickly-rotating laser measurement beam. This allows objects to be detected over large distances with very large viewing angles and also enables contours to be measured.

#### /// ROD 4

Contactless laser scanners for object detection and contour measurement. A laser measurement beam is deflected a rotating mirror and covers an area of 190° with a radius of up to 65 m. The measurement contour is output via Ethernet or a serial interface. In addition, there are models for object detection in up to 4 simultaneous detection fields.

#### Benefits:

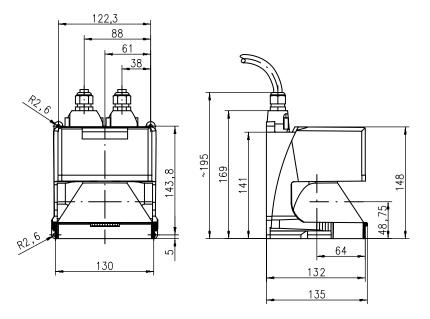

- Measurement range 0 ... 65 m, radius of detection field up to 50 m
- 7 configurable and selectable detection field pairs (near and far) for object detection
- Simple device exchange without PC by means of config. connector
- Reference contour for presence/absence checks of objects
- Independent, simultaneous monitoring of 4 detection fields
- Interference suppression in the event of particles in the air
- ROD 4-36 with heating and ROD 4-38 with heating, dust-insensitive version

## / LIGHT CURTAINS

### MANY BEAMS SEE MORE THAN ONE

Our measuring light curtains monitor a large measurement field and output measurement information from this field. Depending on the configuration and model, the devices are suitable for a variety of measurement tasks with various resolutions and can be integrated in different fieldbus environments.

#### /// CML700i

Integrated interfaces enable the quick and easy integration of these measuring light curtains into fieldbus environments without additional gateway boxes and corresponding space requirements and mounting effort. Cascade mounting with a dead zone of just 23 mm between beams, fast response times and the detection of transparent media enable e.g. continuous object tracing on a transport system. Available in this series are variants that are certified for use in potentially explosive areas of group II, category 3, zone 2 (gas) and zone 22 (dust).

#### **CML720i**

With 6 m operating range and a response time of 30 microseconds per beam, the light curtains of the CML 720i series are the perfect introduction to easy detection and measurement even of moving objects.

#### Benefits:

- Operating range of up to 6 m for larger function reserve
- Response time of 30 µs per beam for the reliable detection of fast processes
- Integrated CANopen and IO-Link interfaces for direct configuration via the control
- Large, easy-to-read display in 5 languages with robust membrane keyboard and bar graph display for easy alignment
- Maximum measurement field length of nearly 3 m for measurement on large objects
- Sturdy metal housing also for use in rough industrial environments
- Connection via M12 connector for fast installation

#### Dimensioned drawings: CML 720i Ex

CML 720i EX measuring light curtain

#### **CML730i**

In addition to its integrated interfaces and the innovative plug outlets for gapless object tracing, the CML730i measuring light curtain stands out in particular due to its range of up to 8 m and a unique measurement cycle of 10 µs per beam. In addition, it reliably detects even transparent objects up to 3.5 m.

#### Benefits:

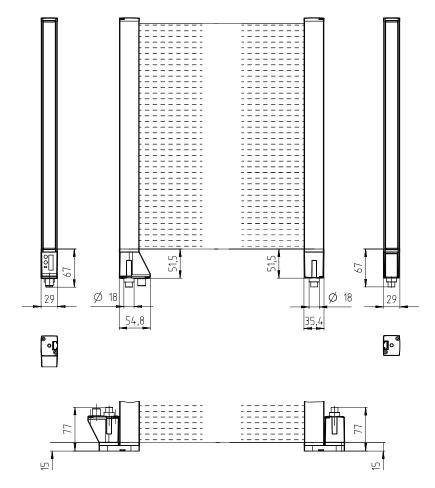

- Integrated Profibus, CANopen, RS485 and IO-Link interfaces for direct configuration via the control
- Large, easy-to-read display with robust membrane keyboard and bar graph display for easy alignment
- Reliable detection of even transparent media up to 3.5 m
- Operating range of up to 8 m for larger function reserves
- Extremely short response time of 10 µs per beam for the reliable detection of even fast processes
- Maximum measurement field length of nearly 3 m for measurement on large objects
- Sturdy metal housing also for use in rough industrial environments
- Connection via M12 connector for fast installation

#### FORK IS JUST ANOTHER WORD FOR EXACT

/ MEASURING FORKED SENSORS

The forked shape offers measurement resolutions as great as 0.014 mm with high reproducibility without time-consuming alignment. An infrared light-band illuminates a line-scan camera (CCD line) and returns analog or digital output signals depending on the illuminated pixels and configuration.

#### /// GS 754B

With mouth widths of 27 or 100 mm, this forked photoelectric sensor delivers accurate measurement results over a 25 mm long measurement range thanks to its CCD line. Depending on the configuration, it is possible to measure transparent edges, the diameters of wires, threads and much more.

#### Benefits:

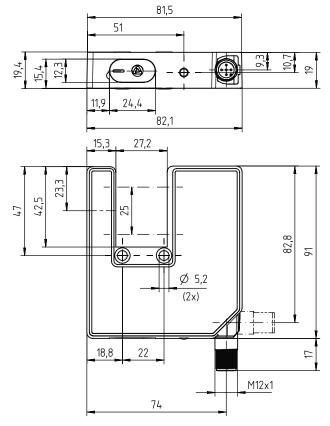

- Measurement range 25 mm
- Resolution: 14 µm
- Configurable measurement range and measure mode
- Teach-in function, switching or warning output
- Multiple object detection
- Standard interface (RS 232) for configuration and visualization
- M12 data interface (process interface) with analog or digital data output
- M12 turning connector

#### **EVERYTHING FOR SAFETY**

Whether individual devices or optimally matched sets: in our extensive line of safety sensors, you will always find a suitable and efficient safety solution for point-of-operation, danger-zone and access guarding. All devices satisfy the applicable legal regulations and standards.

## //SAFETY LIGHT CURTAINS

#### CURTAIN FOR EFFICIENT SAFETY

Reliable and interference-immune sensor safety technology ensures high system availability and productivity. Wherever man and machine work "hand in hand", our safety light curtains can be used vertically as hand and finger protection, as access guarding as well as horizontally as area protection. With respect to integration capability, availability and cost effectiveness, they meet the highest requirements.

#### /// MLC 500

The MLC 500 series includes the newest generation of extremely sturdy type 4 safety light curtains. Three function classes - Basic, Standard and Extended - enable the most efficient use of devices from simple standard applications to complex controlled safeguarding processes. The devices can be used universally, due to the flexible fastening concept and the option of form-locking installation. In addition, the series offers custom solutions for further areas of application. These include AIDA (Automation Initiative of German automobile manufacturers)compliant pin assignment, integrated AS-i interface, safety classes IP67/69K as well as especially impact-resistant, cascadable or EX-certified models.

#### **MLC 510**

This Basic model of the type 4 safety light curtains provides the most important functions. Range reduction on the transmitter, reversible transmission channels, a LED display as well as an automatic start/restart interlock round out the range of service. The type 4 Basic model is suitable for a range of applications and is optionally available with AS-i interface or safety class IP 67/69K.

#### Benefits:

- Automatic start/restart
- Optimal handling
- Prevention of mutual interference of the sensors by selectable transmission channels and range reduction, if applicable
- Universal application due to standard functions
- Short delivery times and global availability
- QR code on the sensor for quick service information

Available resolutions: 14 mm, 20 mm, 30 mm, 40 mm, 90 mm.

#### **MLC 511**

The devices have a plug connection with AIDA-compliant M12 pin assignment (Automatisierungs-Initiative deutscher Automobilisten (AIDA) = Automation Initiative of German automobile manufacturers).

#### Benefits:

- Automatic start/restart
- Optimal handling
- Range reduction on demand
- Universal application due to standard functions
- Short delivery times and global availability
- QR code on the sensor for quick service information

#### **MLC 520**

The Standard version of these type 4 safety light curtains features a start/restart interlock (RES) and contactor monitoring (EDM) for increased performance – and it is simple to handle and integrate into your systems.

#### Benefits:

- Basic functions such as automatic start/restart, start/restart interlock (RES), contactor monitoring (EDM)
- Optimal handling due to function selection without PC as well as LED and 7-segment display with integrated 3-zone alignment aid
- Prevention of mutual interference of the sensors by selectable transmission channels and range reduction, if applicable
- Short delivery times and global availability
- QR code on the sensor for quick service information

SMARTER CUSTOMER SERVICE

#### User knowledge about machine safety topics

The online adviser, Safety know-how, provides a selection of European directives and important standards relating to machine safety and offers assistance with the selection and application of protective devices.

- 1. Introduction
- 2. Machine safety in the EU
- 3. Machine safety in the USA
- 4. Protective devices
- Videos
- Calculation wizards

Detailed information regarding machine safety: www.leuze.com/en/safetyknow-how

#### **MLC 530**

Whenever you need additional control functions, the MLC 530 Extended version is the perfect choice. With its 5 different operating modes, the integrated muting function and 3 different scan modes, the sensor leaves almost nothing to be desired. Device linking enables the construction of 2-channel, contactbased safety circuits as well as serial connections of several devices with safety-related switching outputs (OSSD).

#### Benefits:

- Integrated function for timing controlled muting for temporary proper bridging of the protective function, e.g. when transporting materials through the protective field
- Fixed or floating beam blanking, reduced resolution: necessary whenever objects must be in the protective field for operational reasons
- Different scan modes: to adjust availability, select SingleScan, DoubleScan or MaxiScan
- Teaching without PC: configuration and teaching, e.g. of floating beam blanking, is quick and easy

#### **MLC 530 SPG**

The MLC 530 SPG Smart Process Gating variant is the specialist for access guarding with material transport. It allows for a particularly compact system design as it works without the use of muting sensors. Process control takes place here in combination with the system controller. This provides a high level of protection against tampering and at the same time a high degree of availability.

#### Benefits:

- Integrated Smart Process Gating function for process control together with the system controller, no muting sensors necessary
- Allows the system to be very compact and thus saves valuable space
- Optimal handling due to function selection without PC as well as LED and 7-segment display with integrated 3-zone alignment aid
- Reduced risk of tampering and increased reliability for a high degree of system availability

#### MLC 520 Host

The so-called Host-Guest devices enable the combination of access guarding or point of operation guarding with area protection. In this way, it is possible, for example, to eliminate additional measures such as guards to protect against stepping behind machines. The variants with AS-i interface facilitate the direct and economical integration in an AS-Interface network. Furthermore, the MLC HG devices offer all of the advantages of the MLC 500 series.

#### Benefits:

- Point of operation guarding with area protection
- Multi-side guarding thanks to optimized cable routing

#### **MLC 520 MiddleGuest**

The so-called Host-Guest devices enable the combination of access guarding or point of operation guarding with area protection. In this way, it is possible, for example, to eliminate additional measures such as guards to protect against stepping behind machines. The MiddleGuest devices can be used as the middle segment of a three-link chain.

#### Benefits:

- Point of operation guarding with area protection
- Multi-side guarding thanks to optimized cable routing

#### **MLC 520 EX**

The MLC 520 EX2 series is certified for use in potentially explosive areas of group II, category 3, zone 2 (gas) and zone 22 (dust). The function range of these type 4 safety light curtains corresponds to the MLC 520 standard version and thus also offers a start/restart interlock (RES) and contactor monitoring (EDM) for increased performance - with very simple handling and integration.

#### Benefits:

- Basic functions such as automatic start/restart, start/restart interlock (RES), contactor monitoring (EDM)
- Optimal handling due to function selection without PC as well as LED and 7-segment display with integrated 3-zone alignment aid
- Prevention of mutual interference of the sensors by selectable transmission channels and range reduction, if applicable
- Short delivery times and global availability
- QR code on the sensor for quick service information
- Approved for use in potentially explosive areas of group II, category 3, zone 2 (gas) and zone 22 (dust)

### /// MLC 300

The 300 series MLC safety light curtains are the latest generation of extremely slim and robust type 2 devices with slightly set back front screen and reinforced side walls. The devices are available in the Basic and Standard versions, thereby fulfilling various requirements. They can be used universally, due to metal end caps, a flexible fastening concept and the option of form-locking installation. There are also variants which have an AIDA-compliant pin assignment.

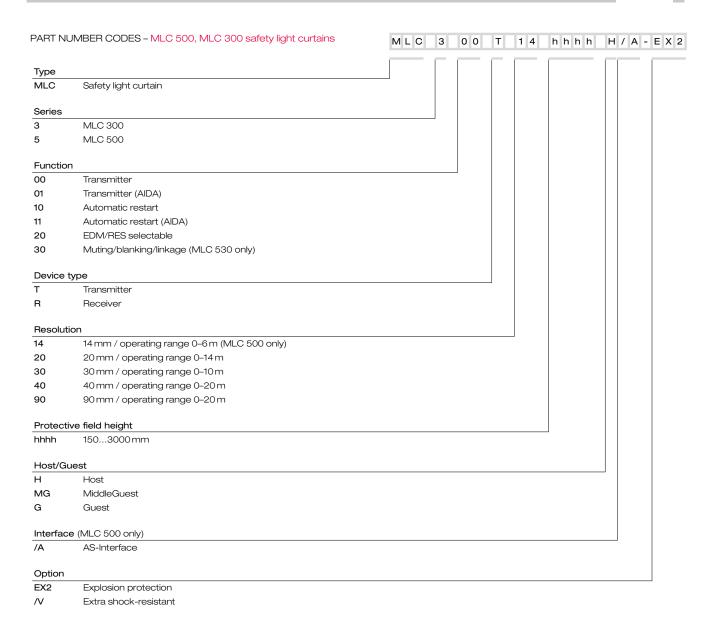

Direct access to the online product selector at www.leuze.com/en/mlc300

### **MLC 310**

This type 2 Basic model provides the most important functions: Range reduction on the transmitter, reversible transmission channels, a LED display as well as an automatic start/restart interlock round out the range of service.

#### Benefits:

- Automatic start/restart
- Optimal handling
- Prevention of mutual interference of the sensors by selectable transmission channels and range reduction, if applicable
- Universal application due to standard functions
- Short delivery times and global availability
- QR code on the sensor for quick service information

Available resolutions: 40 mm.

#### **MLC 320**

The Standard version of this type 2 safety light curtain, with a start/restart interlock (RES) and contactor monitoring (EDM), also features practical function extensions for increased performance – still being simple to handle and integrate into your systems.

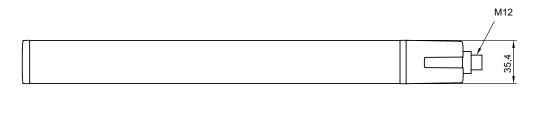

#### Benefits:

- Basic functions such as automatic start/restart, start/restart interlock (RES), contactor monitoring (EDM)
- Optimal handling due to function selection without PC as well as LED and 7-segment display with integrated 3-zone alignment aid
- Prevention of mutual interference of the sensors by selectable transmission channels and range reduction, if applicable
- Universal application due to standard functions
- Short delivery times and global availability
- QR code on the sensor for quick service information

# //MULTIPLE LIGHT BEAM SAFETY DEVICES

# WHEN FUNCTIONALITY BECOMES ECONOMICAL

Multiple light beam safety devices with muting function ensure constant personnel protection (access guarding) with unobstructed material infeed, e.g., in conveyor systems. Options such as the integrated laser alignment aid, an integrated muting indicator and the patented swivel mount for easy fastening and alignment round out the program.

### /// MLD 500 transmitter/receiver

This type 4 series can be used both for access guarding as well as for applications with muting. Through various function classes (MLD 510, 520, 530, 535), the optimum design can always be selected. Configuration via PC or DIP switch is not necessary.

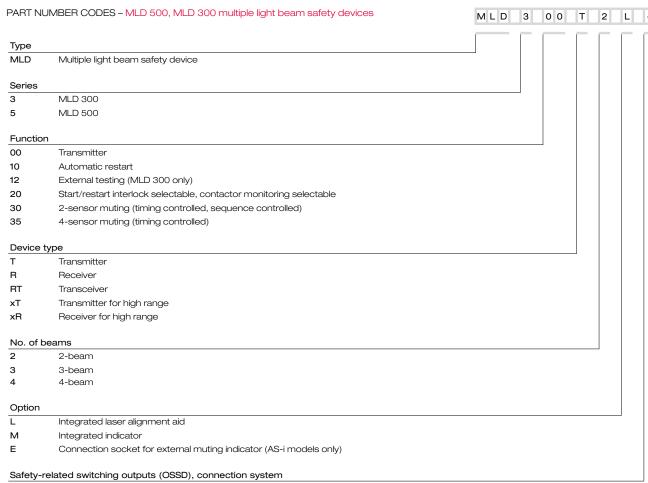

Direct access to the online product selector at www.leuze.com/en/mld500

Integrated AS-i interface, M12 plug, (safety bus system)

These multiple light beam safety devices are equipped with an automatic restart.

# Benefits:

- The configuration is simply performed by means of wiring, i.e. no software, PC or DIP switch are necessary
- Use at ambient temperatures as low as -30 °C is possible
- Options: integrated laser alignment aid, integrated muting indicator

► receiver / ◀ transmitter Included in delivery: sliding blocks

These multiple light beam safety devices offer a selectable start/restart interlock (RES) and contactor monitoring (EDM).

# Benefits:

- The configuration is simply performed by means of wiring, i.e. no software, PC or DIP switch are necessary
- Use at ambient temperatures as low as -30 °C is possible
- Start/restart interlock (RES), selectable
- Contactor monitoring (EDM), selectable
- Options: integrated laser alignment aid, integrated muting indicator

Many functions, such as start/restart interlock, contactor monitoring, timing controlled 2-sensor muting and sequence controlled 2-sensor muting, ensure great flexibility.

### Benefits:

- The configuration is simply performed by means of wiring, i.e. no software, PC or DIP switch are necessary
- Use at ambient temperatures as low as -30 °C is possible
- Start/restart interlock (RES), selectable
- Contactor monitoring (EDM), selectable
- Configurable operating modes
- Integrated muting function, no additional muting module is necessary
- 2-sensor muting, (timing controlled, sequence controlled)
- Options: integrated laser alignment aid, integrated muting indicator, 7-segment display

# SMARTER CUSTOMER SERVICE

# Added value made attainable!

We offer specific and measurable added value in the areas of usability, application know-how and service - to make our customers more successful. In the future, these areas will also be our yardstick for new product developments, innovative service offerings and extensive market expertise.

More information on our active customer orientation: www.leuze.com/en/ssb

### /// MLD 500Transceiver

With this type 4 design, all active components, such as transmitter, receiver and the integrated evaluation unit, are contained in a common housing. This reduces wiring considerably.

<sup>►</sup> Transceiver / ◀ Deflect. mirror Included in delivery: sliding blocks

These multiple light beam safety devices offer a selectable start/restart interlock (RES) and contactor monitoring (EDM).

### Benefits:

- The configuration is simply performed by means of wiring, i.e. no software, PC or DIP switch are necessary
- Use at ambient temperatures as low as -30 °C is possible
- Start/restart interlock (RES), selectable
- Contactor monitoring (EDM), selectable
- Options: integrated status indicator

Many functions, such as start/restart interlock, contactor monitoring, timing controlled 2-sensor muting and sequence controlled 2-sensor muting, ensure great flexibility.

#### Benefits:

- The configuration is simply performed by means of wiring, i.e. no software, PC or DIP switch are necessary
- Use at ambient temperatures as low as -30 °C is possible
- Start/restart interlock (RES), selectable
- Contactor monitoring (EDM), selectable
- Configurable operating modes
- Integrated muting function, no additional muting module is necessary
- 2-sensor muting, (timing controlled, sequence controlled)
- Options: integrated muting indicator, 7-segment display

### **MLD 535**

Through extensive functions, such as start/restart interlock, contactor monitoring, timing controlled 2-sensor muting, sequence controlled 2-sensor muting and timing controlled 4-sensor muting, these multiple light beam safety devices can be used in different areas.

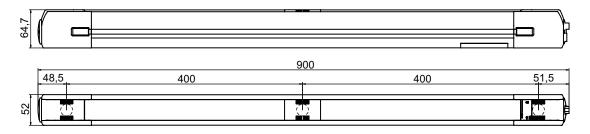

#### Benefits:

- The configuration is simply performed by means of wiring, i.e. no software, PC or DIP switch are necessary
- Use at ambient temperatures as low as -30 °C is possible
- Start/restart interlock (RES), selectable
- Contactor monitoring (EDM), selectable
- Configurable operating modes
- Integrated muting function, no additional muting module is necessary
- 2-sensor muting, (timing controlled, sequence controlled)
- Timing controlled 4-sensor muting
- Options: integrated muting indicator, 7-segment display

### **MLD 312**

These multiple light beam safety devices are equipped with an automatic restart. The receivers are equipped with a test input for the periodic function test by means of an external safety monitoring device.

# Benefits:

- The configuration is simply performed by means of wiring, i.e. no software, PC or DIP switch are necessary
- Use at ambient temperatures as low as -30 °C is possible
- Test input for periodic function test
- Options: integrated muting indicator

Many functions, such as start/restart interlock, contactor monitoring, timing controlled 2-sensor muting, sequence controlled 2-sensor muting, ensure great flexibility.

#### Benefits:

- The configuration is simply performed by means of wiring, i.e. no software, PC or DIP switch are necessary
- Use at ambient temperatures as low as -30 °C is possible
- Start/restart interlock (RES), selectable
- Contactor monitoring (EDM), selectable
- Configurable operating modes
- Integrated muting function, no additional muting module is necessary
- 2-sensor muting, (timing controlled, sequence controlled)
- Options: integrated laser alignment aid, integrated muting indicator, 7-segment display

# //SINGLE LIGHT BEAM SAFETY DEVICES

# SAFETY CAN ALSO BE FLEXIBLE

Due to their compact dimensions, single beam safety devices are able to make full use of their advantages in constrained spaces or where no flat planar areas exist. They can be very flexibly integrated in various installation heights as well as in existing machine designs and very reliably perform a wide range of detection, identification and protection tasks here.

# Type 4 single light beam safety devices

The single beam safety devices of the MLD series are self-monitoring and have operating ranges of up to 100 m. They can, thus, be used very flexibly in a wide range of applications. Configuration is simply performed without a PC via the wiring. The single beam safety devices of the SLS series are operated in combination with a suitable test unit. Together with it, they form type 4 electrosensitive protective equipment. They are a cost-optimized alternative if shorter ranges are needed. With their compact housing dimensions, they can be easily integrated.

#### /// SLS 46C

These single beam safety devices are operated in combination with the MSI-TRM monitoring device. Together with this, they form type 4 electro-sensitive protective equipment for applications that require PL d or PL e. With their compact housing dimensions, the SLS 46C can be easily integrated.

#### Benefits:

- Red light and infrared light models with operating ranges of up to 40 m or up to
- Solid plastic housing, degree of protection IP 67 / IP 69K
- Use at temperatures as low as -30 °C is possible
- Status LEDs visible from all sides
- brightVision®: quick alignment due to an especially bright light spot
- Clearly visible alignment indicator in the front screen of the receiver
- Integration via M12 plug or cable

#### /// SLSR 46B

The SLSR 46B protective sensor convinces with ranges of up to 40 m at an attractive price. With the aid of the LED on the receiver, it can very easily be aligned and adjusted. Its status display is highly visible over the entire range for reliable operation.

#### Benefits:

- Single light beam safety device with visible red light and high function reserve
- Solid plastic housing, degree of protection
   IP 67 for industrial application
- Wide voltage range from 10 to 30 V with pnp transistor output for PLC applications
- Clearly visible alignment indicator in the front screen

# /// SLSR 25B

The SLSR 25B protective sensor scores with its optimized light beam propagation (opening angle) with time-saving alignment. In combination with a safety-relevant control system (testing according to EN IEC 61496-1), it forms a category 2 contactless protective device and works with a range of up to 22 m.

# Benefits:

- Single light beam safety device with visible red light and high function reserve
- Solid plastic housing, degree of protection IP 67 for industrial application
- Wide voltage range from 10 to 30 V with pnp transistor output for PLC applications
- All common connection variants

# Alignment aids

Part no.	Part description
50109545	SAT 5

■ Protective throughbeam photoelectric

Benefits:

- Activation input for testing and interlinking of the sensor
- Complementary switching outputs for light/ dark switching or as a control function
- Very short construction for application in limited spaces
- LED display in transmitter and receiver

It is common that single beam safety devices have to be integrated into very tight installation areas. In this instance, SLS 318 protective sensors are the preferred choice. Because of their slender cylindrical construction they can be mounted quickly and easily, even in areas where space is restricted.

# //SAFETY LASER SCANNERS

# UNIVERSAL ALL-ROUNDER FOR YOUR SAFETY TASKS

Danger zone guarding, access guarding or point of operation guarding: you can use safety laser scanners in all areas of personnel protection effectively and for a range of applications. With their freely definable and individual protective fields and their compact design, they enable a very flexible installation position as well as use in mobile applications.

#### /// RSL 400

The RSL 400 family of safety laser scanners comprises 16 device types in four staggered operating ranges and function variants. As a result, you can always select the best scanner at the best price performance ratio – if necessary, with a scanning range of 160 square meters thanks to a scanning angle of 270° and operating range of 8.25 meters. Whether mobile or stationary – the RSL 400 family covers all conceivable applications.

Direct access to the online product selector at www.leuze.com/en/rsl400

#### **RSL 410**

For safeguarding large areas of up to 160 m<sup>2</sup>, the RSL 410 safety laser scanners convince with very simple integration in the machine control thanks to an 8-pin, M12 connection.

#### Benefits:

- Any type of protective/warning field contours (1 field pair/ quad)
- Basic functions such as automatic start/restart, start/restart interlock (RES) and selectable contactor monitoring (EDM)
- Optimum handling by means of separate intelligent connection unit and large, plain-text display with integrated electronic spirit level
- Ethernet TCP/IP and Bluetooth interface for simple and convenient configuration and diagnosis

# **RSL 420**

The RSL 420 safety laser scanners expand the monitoring function to include flexible safety requirements adapted to the automation process.

#### Benefits:

- Monitored changeover of 10 field pairs/quads
- Basic functions such as automatic start/restart, start/restart interlock (RES) and selectable contactor monitoring (EDM)
- Optimum handling by means of separate intelligent connection unit and large, plain-text display with integrated electronic spirit level
- Ethernet TCP/IP and Bluetooth interface for simple and convenient configuration and diagnosis
- 4 configurable signal outputs
- E-Stop linkage

#### **RSL 430**

Two independent protective functions and OSSD pairs with individual response time make the RSL 430 safety laser scanner interesting for many area safeguarding and access guarding applications with separate machine parts.

#### Benefits:

- Two independent protective functions and OSSD pairs with monitored changeover of 10 field pairs/quads each
- Optimum handling by means of separate intelligent connection unit and large, plain-text display with integrated electronic spirit level
- Ethernet TCP/IP and Bluetooth interface for simple and convenient configuration and diagnosis
- Automatic start/restart, start/restart interlock (RES) and selectable contactor monitoring (EDM)
- 9 configurable signal outputs
- E-Stop linkage
- Safe, internal switch-off delay (Stop 1)
- Configurable data output with UDP

#### **RSL 440**

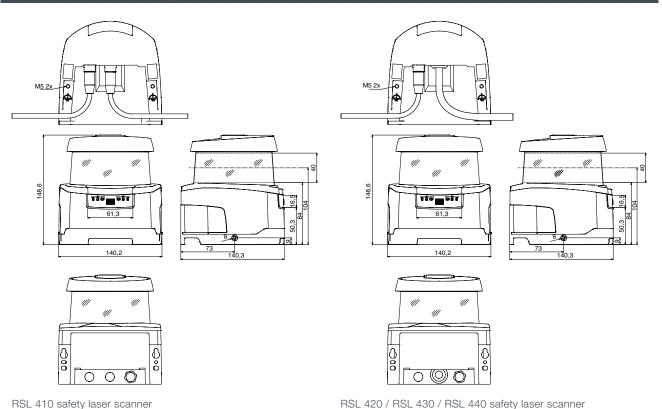

With two independent protective functions, up to 100 field pairs or 10 independent safety configurations, the RSL 440 safety laser scanners offer a solution for the most demanding safety tasks.

#### Benefits:

- Two independent protective functions and OSSD pairs with monitored changeover of 100 field pairs / 50 quads
- 10 independent safety configurations for monitoring with different operating modes
- Optimum handling by means of separate intelligent connection unit and large, plain-text display with integrated electronic spirit level
- Ethernet TCP/IP and Bluetooth interface for simple and convenient configuration and diagnosis
- 9 configurable signal outputs
- E-Stop linkage
- Safe, internal switch-off delay (Stop 1)
- Configurable data output with UDP

# //PROTECTIVE SENSOR SETS

# PLUG & PLAY FOR EFFICIENT ACCESS GUARDING

If you would like to more easily and more quickly implement access guarding with reduced logistical work, protective sensor sets are an attractive solution. Components that are electronically and mechanically optimized to one another and which are equipped with connectors ensure fast start-up of the Plug & Play complete solutions.

#### /// MLDSET

These are muting systems for access guarding with 2- and 3-beam MLDTransceiver devices, pre-mounted in Leuze electronic device columns.

#### Benefits:

- Pre-mounted and aligned muting sensors with complete wiring
- Configuration without PC via wiring in the switch cabinet
- Various muting modes (parallel, sequential, partial)
- Also for low-temperature applications down to -30 °C

# /// MLD-UDC

MLD 500Transceiver or transmitterreceiver systems with different numbers of beams and ranges which are premounted in device columns facilitate the installation of the most diverse constructional systems even in combination with deflecting mirror columns. They are suitable for single- and multiple-sided access guarding.

#### Benefits:

- Pre-mounted safety sensors in sturdy device columns
- Configuration without PC via wiring in the switch cabinet
- Extremely diverse access guarding systems with the addition of deflecting mirror columns
- All columns with automatic resetting after mechanical impacts
- Also for low-temperature applications down to -30 °C

# / SAFE LOCKING DEVICES, SWITCHES AND PROXIMITY SENSORS

# FROM EXTREMELY ECONOMICAL TO EXTREMELY TOUGH

Safety switches and magnetically coded safety systems are used for monitoring movable safety guards, such as safety doors, sliding grilles or flaps. Opening the protective devices triggers an E-STOP command. Safety locking devices keep the protective doors locked, thereby preventing the inadmissible access of people until the guarded machine no longer poses a danger.

Safety switches	Page 302
Safety locking devices	Page 312
Safety command devices	Page 320
Magnetically coded sensors	Page 323
Safety transponders	Page 325

# //SAFETY SWITCHES

# **OPEN IS OFF**

For doors, flaps and covers that must be closed during the operation of machines, safety switches for position monitoring and for the protection of personnel and systems are required. In addition to standard designs for universal use, safety hinge switches and safety position switches are available as alternatives to hinge switches on flaps.

#### Safety switches with separate actuator

Standard designs with separate actuators allow different approach directions and thereby facilitate universal use.

#### /// S20

The S20 is a safety switch without locking device that can be used, e.g., on machines and systems where the operator is protected from the point of operation by grid doors or sliding gates.

#### Benefits:

- Housing made of glass fiber reinforced plastic - degree of protection IP 67
- Suited for normal duty applications
- Easy mounting with standard construction
- Universal use with 5 actuator approach directions
- Self-centering through funnel-shaped insertion opening

63000721	AC-AH-A	Angled	In key direction	Stainless steel	Through-hole mounting	

#### Safety position switches

Because of their construction design, these switches are used for the position monitoring of machines or as an alternative to hinge switches – always with the prerequisite that appropriate actuation tappets or notches can actuate the switch when friction closed.

# /// **S300**

The S300 safety position switches have a metal housing in accordance with degree of protection IP 67. The models equipped with various contact sets enable integration in control circuits up to category 4 in accordance with EN ISO 13849. In addition, models are available with different actuators and supports and connection options.

#### Benefits:

- Metal housing for heavy duty applications
- Switching direction selectable
- Universal use with individually set actuator approach directions and angles
- Stable lever fastening in 10° raster
- Models with plunger and roller actuator, extremely long-life and robust

# Safety hinge switches

Safety hinge switches are used for the position monitoring of hard guards that can rotate (e.g. protective hoods) by means of a monitoring switch (without guard interlocking) integrated into the hinge.

# /// S400

The S400 safety hinge switches unite the safety switch and door hinge functions in one component. Because external actuators are not required with this switch, it can also be used problem-free in environments with high dust concentration levels or with heavy particle loads (degrees of protection IP 67). By means of a repeatable setting (switching angle alignment), fault-free function is ensured even with warped or misaligned doors.

#### Benefits:

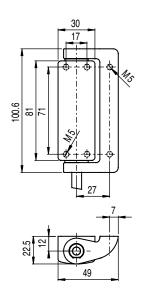

- 180 ° maximum opening angle of the protective device
- Repeatable setting (switching angle alignment) with skewed or misaligned doors
- Compact, rounded-off construction design in robust metal version, degree of protection IP 67
- Encapsulated, internal actuator guarantees proper functioning, even under difficult conditions
- Highly tamper proof due to covered screws
- Cable or M12 connection

#### Mounting

Part no.	Part description	Description	Material	Design	Type of fastening	Dimensions
63000770	AC-H-S400	Additional hinge	Metal, ZAMAK		Mounting thread	49 mm × 22.5 mm × 100.6 mm
63000775	AC-H-S400-S	Additional hinge	Metal, ZAMAK		Mounting thread	44.5 mm × 22.5 mm × 65 mm
63000772	AC-MP1-S400	Mounting plate set	Metal	Mounting plate with L-angle		
63000771	AC-MP3-S400	Mounting plate set	Metal	Mounting plate		
63000774	AC-SEPL-S4xx	Safety plug				

With its wider mounting fork, this safety hinge switch is suitable above all for use with glass or plastic parts, as larger support surfaces are needed for stability in these cases.

#### Benefits:

- Wide fork dimensions for stability on glass and plastic
- 180 ° maximum opening angle of the protective device
- Repeatable setting (switching angle alignment) with skewed or misaligned doors
- Degree of protection IP 67
- Compact, rounded-off construction design in robust metal version
- Encapsulated, internal actuator guarantees proper functioning, even under difficult conditions
- Highly tamper proof due to covered screws
- Cable or M12 connection

#### /// S420

Owing to their highly tempered stainless steel housing and the degree of protection IP 69K, the series S420 safety hinge switches are particularly suited to tasks which have extremely high requirements with regard to hygiene. From a technical viewpoint, the unique switch impresses with its sensor-based OSSD, four multicolor LEDs for on-site diagnosis and its high safety level (SIL 3, PL e).

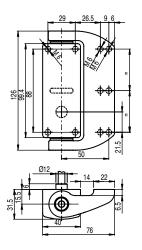

#### Benefits:

- Hinge switch in a conventional variant with contact allocation (S420-9x) or in a variant with on-site diagnosis and OSSDs (S420-OSx)
- Series connection of devices with SIL3 and PLe (S420-OSx) allows low-cost interconnection with an extremely high safety level
- Long mission time even with heavy doors or difficult materials (e.g. acrylic glass) owing to the robust housing and 6 screwed connections along its arm
- High-grade standard-compliant surfaces (< 0.8 µm) which can be cleaned easily even under hygienically difficult conditions
- Degrees of protection IP 67 and IP 69K ensure reliable operation even in the case of intensive cleaning and dust accumulation
- Optical information about the hinge status is provided on site by four multicolor LEDs
- Concealed screwed connections to protect against tampering and to enable easier cleaning
- Long-term identifiability owing to the robust laser print
- Reduced installation requirements and fast connection due to integrated cable or M12 connector with 0,2 m cable
- Additional signal output used to actuate signal lamps or for signaling status to control units
- High level of investment protection owing to simple and extensive adjustability to almost 0  $^{\circ}$  e. g. in the case of door

# SMARTER APPLICATION KNOW-HOW

Trade shows

Reliable systems for 2D- and 3D-measurement of distances and objects

Positioning

Sensor technology for quick positioning accurate down to the millimeter

Additional application highlights can be found under: www.leuze.com/en/practice

# //SAFETY LOCKING DEVICES

# THE DOOR STAYS CLOSED!

Safety locking devices keep protective doors securely locked and thereby prevent the inadmissible access of people until the guarded machine no longer poses a danger. Not until there is no longer a danger to the machine or to the workers is access released by an electric signal. With their robust design, all Leuze electronic safety switches and locking devices are designed for rough industrial applications.

#### /// L10

The compact and economical L10 safety locking device reduces wiring through manual locking and releasing.

#### Benefits:

- Particularly economical locking solution for rarely-used maintenance doors and applications without electrical control signals
- Hardly any wiring and cabling costs due to manual locking and unlocking
- 6 different heavy duty actuators for the most diverse installation conditions

# /// L200

The L200 safety locking device designed for highly demanding applications is predestined for guarding large protective doors and sliding gates, in logistics operations, for example, or with very big machinery, and under harsh conditions.

#### Benefits:

- Heavy duty access guarding on big machinery and systems in harsh ambient conditions
- Emergency unlock function (ergonomically optimized panic button) for manually opening the protective devices in the event of an emergency
- Suitable for extreme mechanical loads
- Auxiliary unlocking (for spring locking)
- LED status indicators

#### /// L300

The robust L300 safety locking devices for safety applications up to SIL 3/PL e are used to guard large safety doors or sliding gates as well as very large machines that have stopping times. The actuator is detected electronically by means of RFID technology. Through millions of different encodings, the actuators achieve a high encoding level acc. to EN ISO 14119 and thereby reliably prevent possible attempts at tampering. The L300 series is designed for use under rough environmental conditions.

#### Benefits:

- RFID actuator for maximum protection against tampering
- Robust design with 7,500 N locking force and degree of protection IP 67 / IP 69K for use under rough environmental conditions and under extreme stress
- 5-LED display for simple status overview
- Emergency unlock function (ergonomically optimized panic button) for manually opening the protective devices in the event of an emergency

# //SAFETY COMMAND DEVICES

# AND OFF!

For stopping in emergencies, EN ISO 12100-1 stipulates protective devices and supplementary measures such as E-Stop buttons or emergency rope switches. Leuze electronic offers solutions that are optimized with respect to safety and ergonomics.

#### /// ERS200

The ERS200 E-Stop rope switch is a safety command device in accordance with EN ISO 13850 and EN 60947-5-5 and is used with preference with expansive points of operation. The rope-pull activation guarantees that it is easy to reach all along the point of operation.

#### Benefits:

- Pulling the rope or rope fracture safely stops the machine
- Clicks in on both sides with friction-locking contacts
- Easy alignment with switching point indicator
- Easy integration with 3 cable approach directions
- Compact metal housing, degree of protection IP 67
- Reset button with status display
- Temperature compensation for longer rope lengths

#### /// ESB200

E-Stop buttons of the ESB200 series are used at points of operation where it makes sense to be able to enter a stop command at a specific location. The diversity of the series allows the devices to be installed, for example, on profiles as well as in control panels, etc.

#### Benefits:

- Contact sets for integration up to cat. 4 in accordance with EN ISO 13849
- 2 safety circuits, 1 signal circuit
- Either screw terminals or M12 connection
- Ergonomically optimized
- Degree of protection IP 67 and IP 69K

# //MAGNETICALLY CODED SENSORS

# **ACTIVE WITHOUT CONTACT**

The magnetically coded safety system is predestined for use under critical environmental conditions, i.e. wherever stress due to dust and humidity is high. Easy start-up, compact housing and extremely low costs characterize this robust series.

#### /// MC3

The MC3x magnetically coded sensor contains specially combined reed contacts that are contactlessly activated by the coded magnetic field of the actuator. With their cast housing, the extremely tamper proof switches are suitable for demanding applications in dusty or humid environments.

# Benefits:

- Monitoring of moving guards on machines with sufficiently short stopping times for demanding applications
- For dusty or humid environments
- High-strength plastic housing
- Highly tamper proof
- Designs for many different types of applications
- PVC or PUR cable, M8 plug

//SAFETY TRANSPONDERS

# PURE FLEXIBILITY!

Safety transponders are well-suited for applications in which a very high level of safety and the highest protection against manipulation are necessary. Their high-strength plastic housings offer reliable protection against contamination and humidity in rough environmental conditions.

# /// RD800

No matter if you require the RD800-S for single connections or the RD800-M for multiple applications – depending on the degree of risk, you can select ready-configured systems with standard or unique code detection (S- or U-variants). Teachable P-variants are a good choice if, for example, increased flexibility on-site is necessary.

# Benefits:

- Standard code, unique code or flexibly programmable code
- M12 connection on the left or right for the most possible freedom during assembly
- Three-sided actuator mounting for quick and easy attachment
- 4 multicolored LEDs for detailed diagnostics and effective installation and testing routines
- Degree of protection IP 67 and IP 69K with smooth, stable plastic housing for easy cleaning
- Permanent laser print for the long-term readability of product data

# / SAFE CONTROL COMPONENTS

# A SENSOR ALONE DOES NOT MAKE A SAFE WORKPLACE

Not until the safety sensors are efficiently and reliably integrated in the machine safety circuit can the topic of safety at work be implemented in such a way that the sensors do not interfere with the machine processes and yet still offer the best-possible protection. Our safety relays and AS-Interface solutions open all possibilities to you here.

Safety relays Page 328

Programmable safety controllers Page 337

AS-Interface Safety at Work Page 341

# //SAFETY RELAYS

# MORE SPACE IN THE CABINET

With a width of just 17.5 mm and 22.5 mm, these safety relays are characterized by very narrow housings. As a result, you can realize the one- or two-channel connection of safety-related sensors in a space-saving and simple manner over up to 3 switch-off circuits. The devices have interchangeable connection terminals.

# /// MSI-CM

The MSI-CM safety relay is used as a contact extension module in accordance with DIN EN 60204-1/VDE 0113 Part 1 for contact extension for E-Stop relays and two-hand control units. Depending on the wiring and proper integration of the feedback path, a Performance Level PL e in accordance with EN ISO 13849-1 is achieved.

### Benefits:

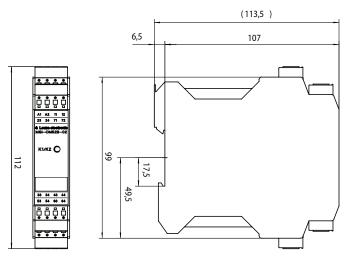

- Contact extension module with extension block in accordance with DIN EN 60204-1/ VDE 0113 Part 1
- Contact extension for E-Stop relays and two-hand control units
- 1- or 2-channel wiring
- Designs with screw terminals as well as with spring-cage terminals
- 5 release contacts, 1 signal contact,1 feedback contact
- Detachable connection terminals for simple device swap-out

# **Dimensioned drawings: MSI-CM**

MSI-CM52B-02 safety relay, spring-cage terminal

This safety relay with adjustable delay time is equipped with two release current paths which release undelayed in accordance with stop category 0. Two additional release current paths release in accordance with stop category 1 with adjustable delay time.

# Benefits:

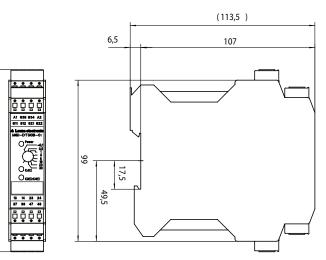

- Adjustable delay time (can be steplessly preset from 0.1 ... 30 s)
- Monitoring of E-Stop buttons, safety doors, AOPDs
- Monitoring of safety circuits in accordance with DIN EN 60204-1/VDE 0113-1
- 1- or 2-channel wiring with cross-circuit detection
- Designs with screw terminals as well as with spring-cage terminals
- Two undelayed and two slow-release contacts
- Automatic and manual start circuit
- Detachable connection terminals for simple device swap-out

# /// MSI-SR4

The MSI-SR4 is used for evaluating safetysensor input signals. Light curtains, E-Stop buttons and safety switches, for example, can thereby be integrated in the machine process in a safety-oriented manner.

## Benefits:

- Standard link between machine control and optoelectronic protective devices as well as safety switches
- Flexibly covers a wide range of applications
- Monitored start/restart button,
- Automatic start/restart
- Short reaction time of just 10 ms, easy connection and time-saving mounting
- Detachable connection terminals for simple device swap-out
- Designs with screw terminals as well as with spring-cage terminals

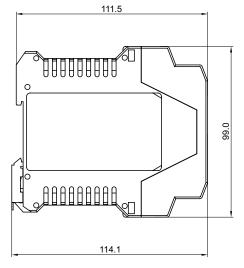

Direct access to the online product selector at www.leuze.com/en/msi-sr4

# /// MSI-RM2

With the MSI-RM2 relay module, a compact and – at the same time – economical solution is available in combination with safety sensors for applications up to Performance Level PLe. The relay module, only 17.5 mm wide, has two potential-free make contact circuits with a response time of only 10 ms.

## Benefits:

- For converting electronic switch-off signals from safety sensors to potential-free, contact-based signals
- Detachable connection terminals for simple device swap-out
- Designs with screw terminals as well as with spring-cage terminals

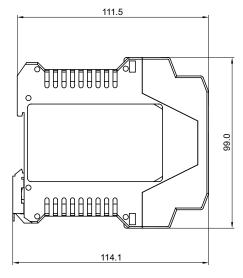

Direct access to the online product selector at www.leuze.com/en/msi-rm2

# 11111111; 1<u>122</u>

The MSI-2H is the link between two-hand command devices and the machine control. The device checks the simultaneous activation of the two, 2-channel buttons and ensures a controlled process start. The module is used everywhere that feeding-in is not automatic, but rather has to be performed manually by people.

## Benefits:

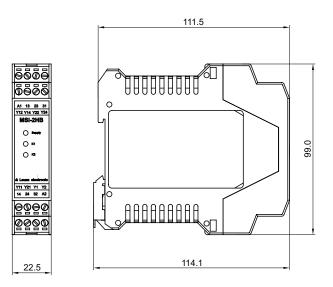

- Two-hand control unit for presses, punching machines and other machines that are manually loaded
- Extended simultaneity monitoring for an increased level of acceptance of the safeguards
- Can also be used as a protective door monitor acc. to EN 60204-1 STOP-0
- Detachable connection terminals for simple device swap-out
- Designs with screw terminals as well as with spring-cage terminals

MSI-TRMB-02 safety relay, spring-cage terminal

# /// MSI-MC3x

MSI-MC300 safety relays are suitable for integration of MC3x magnetically coded sensors in control circuits up to category 4 and Performance Level PLe in accordance with EN ISO 13849-1. These kinds of magnetically coded safety systems are used, for example, to monitor movable guards such as protective doors, sliding grids or flaps.

## Benefits:

- Compact controller with long mechanical life time (10 million switching cycles)
- All magnetically coded sensors (1NC/1NO) from Leuze electronic are connectable
- Automatic and start/restart operation

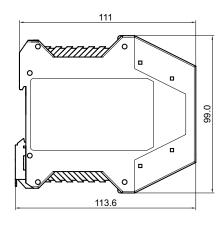

Direct access to the online product selector at www.leuze.com/en/msi-mc3x

# //PROGRAMMABLE SAFETY CONTROLLERS

# PROGRAMMED FOR SAFETY

With the MSI 100 and MSI 200 programmable safety controllers, you obtain a system solution for small- to medium-size machines with maximum flexibility. Extension with I/O and communication modules possible. Configuration and start-up is simple and fast with the convenient MSIsafesoft programming software and its function modules.

# /// MSI 100

The relay monitors E-Stop buttons, twohand controls, safety doors or safety sensors with 2 transistor outputs in machines and systems. With an overall width of just 67.5 mm, the device makes available 20 safe inputs, 4 signal outputs for diagnostics and 4 safe outputs (OSSDs).

# Benefits:

- Freely configurable safety base module
- Monitoring of all safe functions in machines and systems
- Transfers diagnostic data to the PLC via MSI-FB fieldbus modules (option)
- Free choice of connection system: screw terminal blocks or spring-cage terminal blocks; both can be pulled off and interchanged as desired

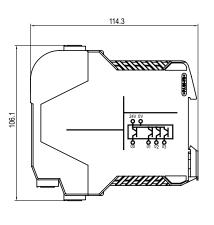

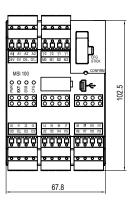

Direct access to the online product selector at www.leuze.com/en/msi100

Part no.	Part description	Connection	Number of safe inputs	Number of safe semiconductor outputs	Number of ground-switching outputs	Number of signal outputs	Number of cycle outputs

547812	MSI102	Spring-cage terminal	20x (up to SIL 3 / IEC 62061)	4x	2x	4x	2x

Included in delivery: 1 terminal set, 1 data memory module, 1 TBUS safety connection plug Note: Commissioning set must be ordered separately

# **Dimensioned drawings: MSI 100**

MSI 100 programmable safety controller

# /// MSI 200

The relay features the same functionality as the MSI 100. In addition, it can be expanded with dockable extension modules to up to 140 safe inputs or 100 inputs and 44 safe outputs – quickly and easily with the TBUS DIN rail connection system.

# Benefits:

- Up to 10 safe MSI-EM I/O extension modules can be connected, i. e., up to a maximum of 140 inputs or 100 inputs and 44 outputs are feasible
- Convenient and fast extension or modular exchange of the components via the TBUS connection system

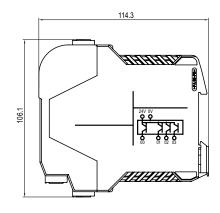

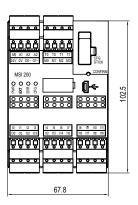

Direct access to the online product selector at www.leuze.com/en/msi200

Included in delivery: 1 terminal set, 1 data memory module, 2 TBUS safety connection plugs Note: Commissioning set must be ordered separately

# Dimensioned drawings: MSI 200

MSI 200 programmable safety controller

The MSI-EM extension module expands the MSI 200 programmable safety controller with 8 safe inputs and 4 freely configurable channels. These may be either safe inputs or outputs (OSSDs).

# Benefits:

- 4 freely configurable channels-either safety outputs (OSSDs) of safe inputs
- Connect up to 10 MSI-EM and realize up to 140 inputs or 100 inputs and 44 outputs
- Designs with screw terminals as well as with spring-cage terminals – both types of terminal blocks can be freely interchanged
- Simple connection via TBUS DIN rail connector
- Compact housing width 22 mm

# **//AS-INTERFACE SAFETY AT WORK**

# LEADER FOR A GOOD REASON

Compared to conventional point-to-point wiring, AS-Interface (AS-i) excels with its low installation, wiring and connection costs. The very simple retrofitability of the safety technology with larger AS-i systems can further greatly reduce installation costs.

# **Safety monitor**

The ASM1 AS-i safety monitor is the core component of the AS-Interface safety at work system. Using configuration software, it monitors the safety-related network devices that are assigned to it, e.g., command devices, multiple light beam safety devices and safety switches.

## /// ASM1

The ASM1 AS-i safety monitor is the core component of the AS-Interface safety at work system. Using configuration software, it monitors the safety-related network devices that are assigned to it, e. g., command devices, multiple light beam safety devices and safety switches.

- Housing width 45 mm
- Height/installation depth: 102/120 mm
- Degree of protection IP 20
- Performance Level PL e and category 4 acc. to EN ISO 13849-1, SIL 3 acc. to IEC 61508 as well as SILCL 3 acc. to EN IEC 62061
- Up to 31 safe AS-i slaves can be connected
- 48 system components can be configured (e. g. E-Stop monitoring devices, OR, AND, turn on/off delays)
- RS 232 interface for PC-supported system configuration and system diagnostics as well as configuration data transfer to replacement device
- SERVICE button for automatic system integration (teach-in) of AS-i sensors on sensor exchange
- Immediate switch-off STOP 0 and delayed switch-off STOP
   1 of the release circuits can be configured

# / MACHINE SAFETY SERVICES

# SYSTEM SAFETY IS PLANNING AND MAINTENANCE

Sustainable safety at work begins with professional planning and doesn't end with the start-up of the corresponding systems. With our engineering tools, you can efficiently plan safety at work right from the start. During operation, periodic inspections and trainings are necessary and prescribed in order to ensure proper function and operation of the systems. We offer you an extensive and convenient package of all of these services for all of your safety at work measures.

# /// Safety inspections

Safety at work is a management issue – this applies in principle around the world. In Germany, periodic testing of the machine is required by law. Safety inspections ensure compliance with safety and quality standards and serve as preventive maintenance measures.

## Benefits:

- EU conformity and legal certainty with proof of safety and quality standards
- Solution proposals for the rapid removal of safety deficiencies
- Comprehensible and well-documented test results in accordance with DIN ISO 9001:2000
- Standards-specific test protocol
- Accident risk and machine downtime minimization
- High availability of the machine due to regular inspections

Direct access to the online product selector at www.leuze.com/en/inspections

S991018	CS-SSH/FR	Start-up support / service deployment for components from Leuze electronic, half-day flat-rate per person.

For work abroad: travel costs and accommodation extra, according to expenditure

# /// Stopping time measurement

Only with a sufficiently dimensioned safety distance that corresponds with the stopping time of the machine it can be guaranteed that the dangerous movement will stop before the person reaches the point of operation. Stopping time measurements are therefore an important part of a properly carried out safety inspection.

# Benefits:

- Standards-compliant performance of 10 measurements per dangerous movement
- Graphic evaluation of the brake behavior on request
- Stop activation with "Autohand" without electrical intervention in the machine control system
- Use of appropriate measurement transducers for the respective machine type: Rotary encoder for rotation movements (e. g. rotary indexing table) and rope length transmitter for linear movements
- State-of-the-art calibrated measurement devices; documented test results in accordance with DIN ISO 9001:2000

# /// Safety consulting

Our experts are always up-todate on the latest technology and standards. You can therefore be certain that our safety consulting offers you legal security. Pass the responsibility on to us – we find safety risks in good time and provide you with qualified assistance in initiating the necessary measures.

## Benefits:

- Safety consulting helps prevent safety-related errors and also saves time and money while improving machine safety and giving the system operator legal certainty
- Responsibility is transferred to our experts for risk assessment as well as SISTEMA calculations and tests
- All Machinery Directive and CE requirements are upheld and all documents are also checked for completeness and fulfillment of legal requirements
- Our experts are independent, experienced and always up-to-date concerning standards and directives; they work effectively because they know systems both within and across sectors as well as their associated hazards and methods of resolution

# /// Seminars and workshops

In addition to product training courses, our training program also includes seminars on the basics of machinery directives, CE certification and practical safety technology. We will also gladly provide instruction on-site at your facilities or in English.

# Benefits:

- Compact knowledge of everything to do with safety at work
- Safety seminars cover all key points concerning retrofitting and operation of machines
- After standards workshops, the participant is always upto-date when it comes to the current standards situation
- Product trainings guarantee optimal knowledge of a product, meaning you can detect application problems and prevent production downtimes
- Direct dialog between our specialists and participants for exchanges of experiences, application tips and problem-solving
- A certificate confirms participation in our seminars

# ALWAYS THE RIGHT SERVICE FOR YOUR PROCESS

Legal security and efficient safety at work are successfully combined quickly and easily with our range of services.

For many people, complex planning or engineering tasks or the management of functional safety make the set of issues related to safety at work a closed book. In the area of legal security in particular, information gaps often exist. With our extensive, qualified offer on safety at work, you are on the safe side legally and can fulfill all of your legal guidelines easily.

We support your service department and, in the event of limited resources, make available the appropriately qualified team. We work with our experts to ensure the safety of your machines and systems. Your production and service team is free to perform its actual tasks. Our offerings are accompanied by an extensive range of training courses tailored to your needs.

# **IDENTIFICATION**

# CODES SIMPLIFY COMMUNICATION IN AUTOMATION

The identification of bar codes, 2D-codes and RFID transponders is among our core competencies. Our broad product spectrum of IDENT technologies opens up maximum flexibility to our customers. These products ensure absolute reliability and maximum system availability. Discover our world of IDENT products.

/ Bar code identification	Page 350
/ 2D-code identification	Page 385
/ RF identification	Page 396

# / BAR CODE IDENTIFICATION

# BAR CODE READING MADE EASY

In production and logistics, the identification of goods and materials through universally usable bar codes controls many processes. The area of application of readers is correspondingly broad – from mobile hand-held operation to high-speed scanners for industrial applications.

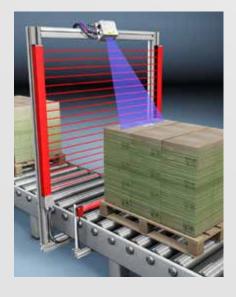

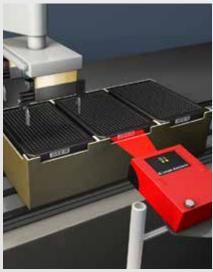

Stationary bar code readers

Mobile bar code readers

Page 382

safety at work

# //STATIONARY BAR CODE READERS

# FAST AND EXACT SOLUTIONS

Select the right line and raster scanner from various sizes, designs and performance levels. Scanning rates of up to 1,000 scans/s, the smallest installation dimensions, robust housings and integrated heating for use in deep-freeze areas meet the individual requirements of your application.

# /// BCL 8

The BCL 8 bar code reader is a bar code reader with integrated decoder for all common bar codes including Pharmacode. Available as a robust industrial version in a metal housing.

### Benefits:

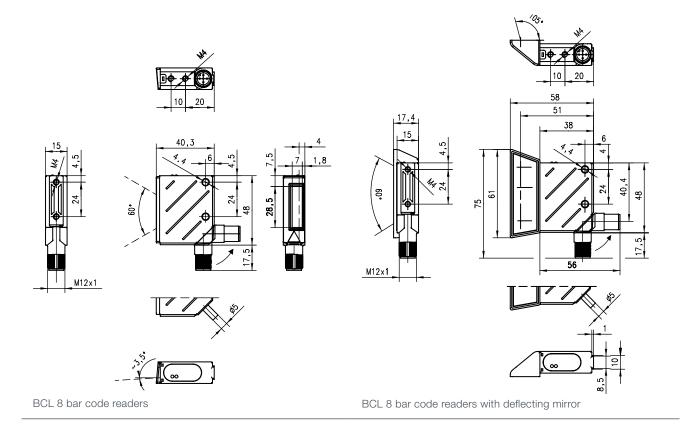

- Compact construction for confined space conditions, e.g. in printers or packaging systems
- Large reading field with great depth of field for variable modulus sizes
- autoConfig automatically detects the code type that is to be read
- autoReflAct enables automatic triggering without additional photoelectric sensor
- M12 connection technology and readymade cables
- Numerous connection units from the MA 8 / MA 200i series for all well-known bus systems (PROFIBUS, PROFINET, DeviceNet, EtherNet TCP/IP, Ethernet/IP, Ethercat or CANopen).
- RS 232 interface (with option of changing to the integrated daisy chain)

At the front

These stationary high-speed scanners offer a space-saving solution for industrial environments and are equipped with a fail-safe parameter memory.

## Benefits:

- Various optics models for optimum use of the installation space
- Depending on the code alignment, single-line or raster scanners offer optimized reading capacity
- Large depth of field and wide opening angle
- autoConfig automatically detects the code type that is to be read
- The BCL Config Tool simplifies all configuration tasks

# Dimensioned drawings: BCL 21/22

BCL 21 / BCL 22 bar code readers

# ACCESSORIES: BCL 21/22

# **Mounting systems**

Rod mounts

Part no.	Part description	Design	Fastening at device	Fastening at system	Material
50111391	BT 20-D10	Mounting system	Screw type	For 10 mm rod, sheet-metal mounting	Metal
50060503	BT 20-D12	Mounting system	Screw type	For 12 mm rod, sheet-metal mounting	Metal

Further rod mounts can be found on our website

# /// BCL 300i

These modular, stationary bar code readers feature code fragment technology and numerous equipment features. Also unique is the modular connection technology.

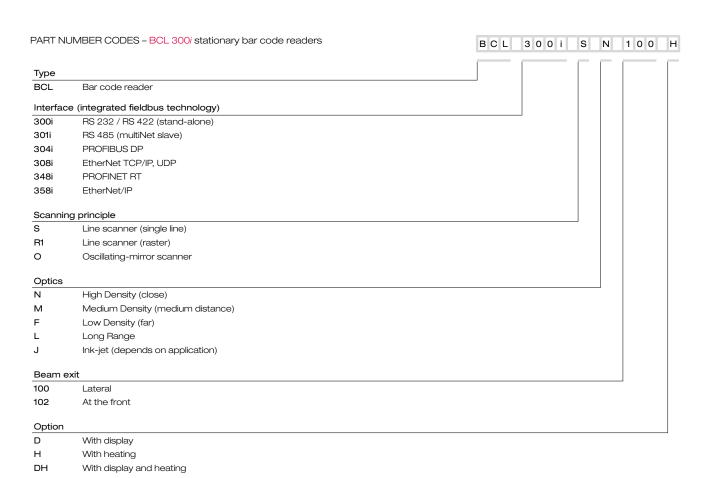

## Benefits:

- Integrated fieldbus connectivity (PROFIBUS, PROFINET, EtherNet, EtherNet/IP, TCP/IP, multiNet RS 232/422/485) with Ethernet switch function (for linear topology)
- Full CRT (code reconstruction technology) also detects heavily damaged or soiled codes
- webConfig an operating-system independent, browser-based configuration tool
- High-quality optics with great depth of field and large opening angle
- Compact housing design for problem-free placement directly at the conveyor line
- Modular connector hood, terminal hood and terminal box and graphical display
- All optics models are also available with optional heating

Direct access to the online product selector at www.leuze.com/en/bcl300i

BCL 300i bar code readers with front beam exit

BCL 300i bar code readers with deflecting mirror

## ACCESSORIES: BCL 300i

## **Connection technology**

### Terminal boxes

Part no.	Part description	Connections	Connection	Suitable for interface
50116463	MK 300	3x	Terminal, M16	RS 232
50116464	MK 301	4x	Terminal, M16	MultiNet Plus

Further terminal boxes can be found on our website

Part no.	Part description	Connections	Connection	Suitable for interface
50116465	MK 304	4χ	Terminal, M16	PROFIBUS DP
50116466	MK 308	4χ	Terminal, M16	Ethernet
50116467	MK 348	4x	Terminal, M16	PROFINET
50120796	MK 358	4x	Terminal, M16	EtherNet IP
50116468	MS 300	3x	Connector, M12	RS 232
50116469	MS 301	5x	Connector, M12	MultiNet Plus
50116470	MS 304	4x	Connector, M12	PROFIBUS DP
50114823	MS 308	4x	Connector, M12	Ethernet
50116471	MS 348	4x	Connector, M12	PROFINET
50120797	MS 358	4x	Connector, M12	EtherNet IP

Further terminal boxes can be found on our website

### Connection units

Part no.	Part description	Suitable for	Interface	Degree of protection
50114369	MA 100	BCL 300i, BCL 301i	RS 232 RS 485	IP 54

### Connection cables

Part no.	Part description	Connection 1	No. of pins	Cable length	Interface	Sheathing material
50104557	K-D M12A-5P-5m-PVC	Connector, M12, axial, female	5-pin	5,000 mm		PVC
50104171	KB SSI/IBS-5000-BA	Connector, M12, axial, female	5-pin	5,000 mm	SSI, Interbus-S	PUR
50104187	KB PB-5000-SA	Connector, M12, axial, male	5-pin	5,000 mm	PROFIBUS DP	PUR
50104180	KB PB-5000-BA	Connector, M12, axial, female	5-pin	5,000 mm	PROFIBUS DP	PUR

Further connection cables can be found on our website

### Interconnection cables

Part no.	Part description	Connection 1	Connection 1, no. of pins	Connection 2	Connection 2, no. of pins	Cable length	Interface	Sheathing material
50130631	KSS ET-M12-4A-M12-4A-P7-010	Connector, M12, axial, male	4-pin	Connector, M12, axial, male	4-pin	1,000 mm	Ethernet	PUR
50130632	KSS ET-M12-4A-RJ45-A-P7-010	Connector, M12, axial, male	4-pin	RJ45		1,000 mm	Ethernet	PUR
50109881	KB ET-5000-SA-RJ45	Connector, M12, axial, male	4-pin	RJ45		5,000 mm	Ethernet	PUR
50106900	KB ET-5000-SSA	Connector, M12, axial, male	4-pin	Connector, M12, axial, male	4-pin	5,000 mm	Ethernet	PUR
50104098	KB PB-5000-SBA	Connector, M12, axial, female	5-pin	Connector, M12, axial, male	5-pin	5,000 mm	PROFIBUS DP	PUR
50114571	KB 301-3000	Socket connector		JST ZHR		3,000 mm	RS 232	PVC

Further interconnection cables can be found on our website

### User-configurable connectors

Part no.	Part description	Connection	No. of pins	Interface
50108991	D-ET1	RJ45		Ethernet
50112155	S-M12A-ET	Connector, M12, axial, male	4-pin	Ethernet
50038538	KD 02-5-BA	Connector, M12, axial, female	5-pin	PROFIBUS DP, multiNet Plus
50038537	KD 02-5-SA	Connector, M12, axial, male	5-pin	PROFIBUS DP, multiNet Plus
50020501	KD 095-5A	Connector, M12, axial, female	5-pin	

Further connectors can be found on our website

### **Mounting systems**

### Mounting brackets

Part no.	Part description	Design	Fastening at device	Fastening at system	Material
50121433	BT 300 W	Angle, L-shape	Screw type	Through-hole mounting	Metal

Further mounting brackets can be found on our website

### Rod mounts

Part no.	Part description	Design	Fastening at device	Fastening at system	Material
50027375	BT 56	Mounting system	Clampable	For 16 mm rod, for 18 mm rod, for 20 mm rod	Metal
50121435	BT 56 - 1	Mounting system	Clampable	For 12 mm rod, for 14 mm rod, for 16 mm rod	Metal
50121434	BT 300 - 1	Mounting system	Screw type	For 12 mm rod, for 14 mm rod, for 16 mm rod	Metal

Further rod mounts can be found on our website

### /// BCL 500i

Integrated fieldbus networking is one of the key features of this series of trend setting bar code readers. Configuration is performed via a web technology-based graphic user interface.

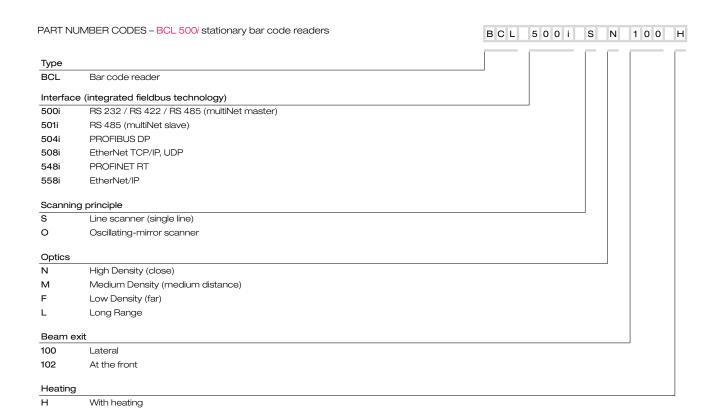

### Benefits:

- Integrated fieldbus and Industrial Ethernet connectivity (PROFIBUS, PROFINET, EtherNet, EtherNet/IP and MULTINET)
- Full CRT (code reconstruction technology) also detects heavily damaged or soiled codes
- High-quality optics with great depth of field and large opening angle, also with heating for use at temperatures down to -35 °C
- Simple commissioning and connection using M12-Ultra-LockTM connection technology and intelligent fastening concept
- Intuitive, multi-language display with menunavigation
- webConfig an operating-system independent, browser-based configuration tool

## **Mounting systems**

### Rod mounts

Part no.	Part description	Design	Fastening at device	Fastening at system	Material
50027375	0027375 BT 56 Mounting system Clampable		Clampable	For 16 mm rod, for 18 mm rod, for 20 mm rod	Metal
50111224	BT 59		Clampable	Groove mounting	Metal

Further rod mounts can be found on our website

### /// BCL 600i

The new BCL 600i device family operates with blue laser light and thereby attains a depth of field up to 50 % greater with small modulus widths and eliminates the need for expensive focus adjustment. Furthermore, the integrated fieldbus technology simplifies integration in the control.

### Benefits:

- Large reading field with small modulus widths
- No focus adjustment necessary
- Integrated interfaces: PROFIBUS, PROFINET and Ethernet TCP/IP
- Configure via GSDML file or webConfig
- multiScan over PROFINET or Ethernet TCP/IP

### /// BCL 900i

High-end bar code readers with 1,000 scans/s, an opening angle of 60° and a max. reading range of 1,700 mm for reading 1D-codes with small modulus widths.

### Benefits:

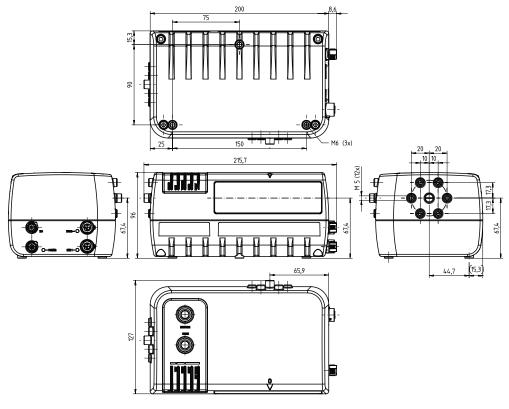

- Integrated interfaces: Ethernet IP, Ethernet TCP/IP, RS 232, RS 422
- No focus switchover
- Configuration and diagnostics via webConfig
- Integrated switch
- Simple teaching-in of codes using a button

Direct access to the online product selector at www.leuze.com/en/bcl900i

### /// CR50 / CR55

As a module for integration or in light aluminum housing. The scanner is very easily configured by means of PC software.

### Benefits:

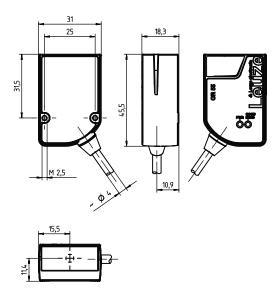

- Available as a module for direct integration or in aluminum housing with a small and light construction
- Ready to read all common codes
- RS 232 and/or USB interface
- Simple configuration with the Sensor Studio PC software tool

Direct access to the online product selector at www.leuze.com/en/cr50\_cr55

CR 55 bar code readers

### /// CR100

With a reading field height of 80 mm and more at short distances, the CR100 is predestined for readings in analysis automation.

### Benefits:

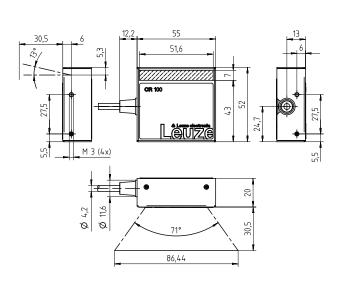

- High-performance CCD scanner with front or lateral beam exit
- Compact design for simple integration, even in constrained spaces
- Scanning rate of 700 scans/s facilitates reliable reading, even while in motion
- Reading of all common codes of modulus sizes
   150 500 µm at a reading field height of
   ≥ 80 mm
- Robust metal housing with cable connection
- RS 232 interface, 1 input, 1 switching output
- Desired configuration can be easily configured via online commands

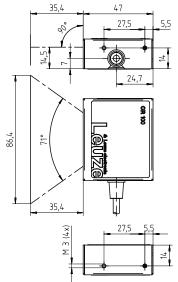

Direct access to the online product selector at www.leuze.com/en/cr100

## Dimensioned drawings: CR100

CR 100 bar code readers with front beam exit

Reading unaligned bar code labels generally requires two or more bar code scanners that are aligned with respect to one another. The new MSP systems from Leuze electronic are modularly structured and mechanically premounted scanner portals that can read codes omnidirectionally.

### Benefits:

- Modular scanner portal for the integration of up to 32 bar code readers of models BCL 500i and BCL 501i for omnidirectional reading
- Object tracking capability based on the BCL 900i
- Full CRT (code reconstruction technology) also detects heavily damaged or soiled codes
- webConfig is an operating-system independent, browser-based configuration tool
- Fast and simple RS 232, RS 422 and Ethernet interface connection to the primary host system
- High-quality optics with great depth of field and opening angle, also with heating for use at temperatures down to -35 °C
- Set parameters are stored fail-safe
- Simple commissioning and connection through M12-Ultra-LockTM connection technology

Direct access to the online product selector at www.leuze.com/en/mspi

## //MOBILE BAR CODE READERS

## YOU HAVE IT IN YOUR HANDS

Mobile bar code readers can read all common bar codes at various positions in warehousing and logistics omnidirectionally. Depending on the area of application, models with wireless transmission or even combi devices, which can handle 2D-codes as well as RFID, can be chosen.

### /// General applications

Mobile bar code readers can read all common bar codes at various positions in warehousing and logistics omnidirectionally. Versions with RF transmission and different reading technologies can be selected according to the specific area of application.

#### Benefits:

- Various optics models for optimum reading range
- Cable-connected or with Bluetooth for RS 232 or USB interface
- Devices for universal use
- Degree of protection up to IP 42
- Temperature range from 0 to +50 °C

Direct access to the online product selector at www.leuze.com/en/bar-code-reader\_aa

# / 2D-CODE IDENTIFICATION

## RELIABLE SOLUTIONS FOR READING CODES

Two-dimensional codes mostly consist of square-shaped groups of data cells (matrix) with a typical orientation symbol from which the code type can be recognized. Thus, 2D-identification is ideally suited for additional applications, such as parts tracking, in which codes are directly affixed to the work piece.

### Mobile 2D-code readers

Page 392

## //STATIONARY 2D-CODE READERS

## FOR STATIONARY USE - BUT STILL HIGHLY DYNAMIC READERS

Our code readers capture 1D- and 2D-codes without fail; depending on the type, printed to directly marked, omnidirectional, static or in fast motion, inverse or mirrored codes. The reference code comparison function is an additional benefit. With us, you'll find the optimum solution: whether small and robust, extremely fast and fully equipped for direct integration into a machine.

### /// DCR 200i

An integrated setup wizard simplifies commissioning of the camera-based code reader for fast and easy 1D- and 2D-code reading. Thanks to its modular design it offers an attractive price/performance ratio and guarantees a high reading performance even with demanding detection tasks.

#### Benefits:

- Setup wizard intuitively guides you through the basic settings to speed up commissioning and avoid errors
- Teach-in function via buttons on the device for simple applications (90 % of all applications can be configured without a PC)
- Configuration via a smartphone app
- Integrated interfaces: Ethernet, RS 232/422
- High reading performance through powerful LED illumination
- Three optics models cover reading distances from approx. 40–360 mm
- With its modular design, the DCR 200i can be flexibly adapted to the respective requirements
- Changeable polarization filter and diffusor foils help reduce interfering reflections

### /// LSIS 220

The LSIS 220, with its optimized optics and resolution, offers large function reserves for reliable code reading, even while in motion. It quickly and reliably detects bar codes, stacked codes and 2D-codes.

### Benefits:

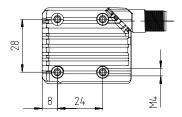

- Improved optics for larger read field and in-focus detection all the way to the edge areas, optimized resolution of 844 x 640 pixels for fast code reading
- Detection of 2D-codes, stacked codes and bar codes
- RS 232 or USB interface
- Switching input (trigger)
- Trigger button for manual activation and configuration
- Construction without mechanically moved parts, robust metal housing with glass window and degree of protection IP 65 make the devices very well suited for industrial use
- Extremely small construction size, also for installation under difficult conditions

## /// LSIS 422i

This device combines innovative camera technology and decades of know-how from 1D-code reading. It functions omnidirectionally, with fast motion and even with low contrast.

### Benefits:

- Optimized camera resolution of 752 x 480 pixels for fast identification, even of low-contrast codes
- CMOS code reader for 1D- and 2D-codes with high resolution
- External triggering
- Multiple code reading
- Omnidirectional reading
- Motor-driven focus adjustment
- Construction with integrated illumination for industrial use
- Indicator for completed read operations

DCR 80 stationary 2D-code reader

# //MOBILE 2D-CODE READERS

## SCANNING MADE EASY

Weighing between 147 and 380 g, the hand-held scanners of this series are also ideally suited for continuous use.

### /// General applications

In addition to 2D-codes, all mobile code readers from Leuze electronic also read bar codes (1D-codes) and are therefore extremely flexible and versatile. Typical interfaces are RS 232 or USB, and Bluetooth as the wireless interface.

### Benefits:

- Various optics models for optimum reading
- Cable-connected or with Bluetooth for RS 232 or USB interface
- Devices for universal use
- Degree of protection up to IP 41
- Temperature range from 0 to +50 °C

Direct access to the online product selector at www.leuze.com/en/2D-code-reader\_aa

### /// Industrial applications

Even with low contrast and on surfaces such as metal or plastic, the high-quality reading technology functions absolutely reliably.

Due to their enormous depth of field, the autofocus versions in particular provide an extremely high degree of flexibility with regard to their application.

# (€

### Benefits:

- Various optics models for optimum reading range

### /// Directly marked codes (DPM)

Codes that are engraved, dot-peened or lasered directly on the object pose a real challenge because such codes usually have only a low contrast. The special industrial hand-held scanners in this category are able to perform even the most difficult of detection tasks.

### Benefits:

- Various types of optics and illumination for optimum read results
- Cable-connected or with Bluetooth for RS 232 or USB interface
- Devices for robust or rough areas of application also available
- Degree of protection up to IP 65
- Temperature range from -30 to +50 °C

## SMARTER PRODUCT USABILITY

395

# / RF IDENTIFICATION

## EVERYTHING CLEAR EVEN WITH POOR VISIBILITY

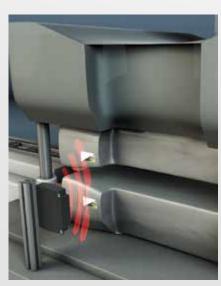

With RFID, no direct "visual contact" between the read-write unit and transponder is necessary. Information from the transponder is received by means of electromagnetic waves. As a result, these systems can be used practically and reliably under even the most adverse conditions.

Stationary RFID read/write systems	Page 397
Mobile RFID read/write systems	Page 399
Transponders	Page 400

# //STATIONARY RFID READ/WRITE SYSTEMS

## **NEARLY INVISIBLE INTEGRATION**

With stationary systems, proximity to the reader suffices for the detection of objects. As a result, readers can be integrated at nearly any location in the system. Our RFID solutions offer various operating ranges and simplify integration in existing systems through maximum connectivity.

#### /// RFI 32

This stationary reader for fixcode transponders can be used for universal reading tasks, even at high ambient temperatures.

(€

#### Benefits:

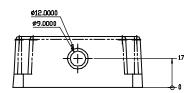

- Max. reading speed up to 0.6 m/s
- Reliable detection in adverse environments to 200 °C
- Max. reading distance up to 80 mm
- Highly visible status LEDs, PCB connectors
- Industrial transponder selection
- RS 232 with trigger input and switching output

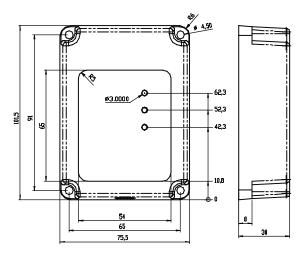

Direct access to the online product selector at www.leuze.com/en/rfi32

#### /// RFM 12 / 32 / 62

For ISO15693 transponders, Leuze electronic offers three read/write devices that support the right range for typical applications. One of the devices is also available in Ex-design.

#### Benefits:

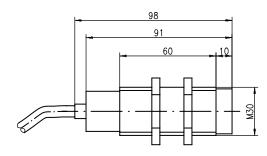

- Max. reading speed of 2.0...6.0 m/s
- Max. reading distance 50...500 mm
- Reliable detection with database updating in adverse environments to 220 °C
- Highly visible status LEDs, PCB connectors
- Large selection of industrial transponders with up to 1024 bytes
- RS 232 with trigger input and switching output
- Configuration via Leuze RF Config

# //MOBILE RFID READ/WRITE SYSTEMS

### **FUNCTIONS IN MANY AREAS**

RFID is also ideally suited for mobile use. One favorite area of application is, for example, in freight traffic at logistics hubs. But mobile devices are often advantageous in warehousing as well and guarantee smooth and fast identification. Moreover, our RFID solutions also read bar codes and 2D-codes.

#### /// HFM 35xxD

Mobile combi device for RFID transponders (RF 13.56 MHz) and bar codes, specially designed for reading bar code information and then writing this information on a transponder.

#### Benefits:

- Mobile read/write device with pistol handle for short operating ranges combined with bar codes
- With a stable trigger button, it is suitable for industrial use
- RS 232 interface or USB COM port emulation, Bluetooth optional
- Selectable display and data output (hex/ASCII)
- Function selection by means of keyboard or PLC and simple feedback on the display

# //TRANSPONDERS

# FROM FLAT TO ROBUST, EVERYTHING IS POSSIBLE

The areas of application for RFID are as broad as the requirements placed on transponders. Leuze electronic offers an extensive and high-quality product segment for all conceivable applications. It includes transponders for fault-free use on metal, high-temperature transponders, self-adhesive SmartLabels or chip cards.

#### /// TFI

This transponder with EM4002 chip is suitable for readers of the RFI series.

#### Benefits:

- Fixcode transponder with EM4002 chip (8 bytes), suitable for write/read units of the RFI series
- Industry transponder for temperatures up to 200 °C available as disk

Direct access to the online product selector at www.leuze.com/en/tfi

#### /// **TFM**

The HF transponder with various memory sizes is suitable for the RFM / HFM readers as a self-adhesive/disc/card or high-temperature transponder, with Ex certification if necessary.

#### Benefits:

- ISO15693 transponder with 112 to 1024 bytes (I-CodeSLI/HFI or MyD) suitable for write/read units of the RFM.../ HFM... series
- Industry transponder for temperatures up to 220 °C, available as disk, stickers and cards
- Special transponders on request

# DATA TRANSMISSION / CONTROL COMPONENTS

## ACCESS DATA QUICKLY AND SIMPLY

In addition to the actual device technology, the transfer of data and the connection of devices in a wide range of fieldbus environments are also given high priority and decisively influence the user friendliness and flexibility of your system. Discover innovative connection concepts and universal configuration solutions that also reveal unexpected efficiency potentials.

"We recognized early on that our sensors are only useful in practice if they can be integrated as simply as possible in the control systems of our customers. This is why we place great importance to directly integrating as many relevant fieldbus interfaces as possible in the devices so that they can fulfill their tasks quickly and in an uncomplicated manner without additional gateways and expense."

Tilo Wolf,
Technical Head of Product Center
Measuring Sensors

Page 425

# / MODULAR CONNECTION UNITS

# **PUTTING IT ALL TOGETHER**

All peripheral devices – such as sensors, protective switches and cameras – are not worth much without networking to the fieldbus or a control unit. Depending on device type and area of application, our modular connection units offer variable interfaces that enable simple connection of the identification devices directly to the fieldbus and thus ensure simple integration of new devices in the system.

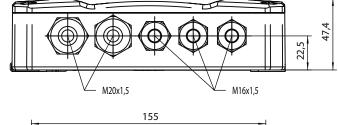

External terminal box for BCL 300/301i
 with cable hood and address switch

MA 8 modular connection unit

Connection unit with clamp connection for BCL 900i.

#### Benefits:

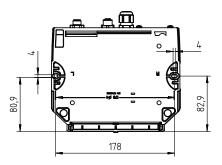

- Easy wiring and configuration
- RS 232 service interface
- Voltage supply terminals dual-installed for wiring through
- 4 LEDs for visualization at the device
- Hardware reset
- Large wiring terminal compartment

Interconnection cables

Part no.	Part description	Connection 1	Connection 1, no. of pins	Connection 2	Connection 2, no. of pins	Cable length
50131531	KB 900-1000	Connector, M12, axial, female	17-pin	Sub-HD, male, axial	25-pin	1,000 mm
50131529	KB 900-3000	Connector, M12, axial, female	17-pin	Sub-HD, male, axial	25-pin	3,000 mm
50131532	KB 900-5000	Connector, M12, axial, female	17-pin	Sub-HD, male, axial	25-pin	5,000 mm

Connection unit with clamp connections for BCL 21/22 and BCL 32 with parameter memory.

#### Benefits:

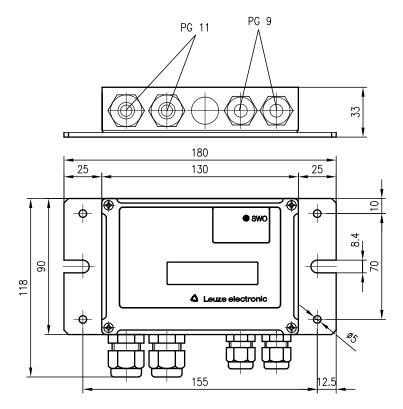

- Parameters of the BCL 21/22 are saved in a fail-safe manner on an EEPROM
- Rotary switch for setting the address for networking via Leuze multiNet plus
- Additional RS 232 service interface (9-pin Sub-D plug)
- Integrated two-line display with 16 characters each (MA 4D only)
- PG screw fittings on mounting plate
- Terminals for connecting the switching inputs/outputs, the voltage supply and the communication interface

## Dimensioned drawings: MA 4

MA 4 modular connection unit

Connection unit with clamp connections for BPS 37.

#### Benefits:

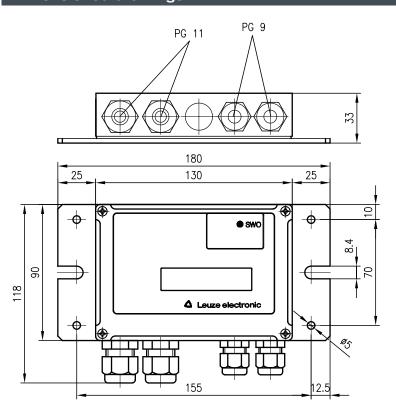

- Parameters of the BPS 37 are saved in a fail-safe manner on an EEPROM
- Rotary switch for adjusting the resolution / speed and jumper for Gray/binary selection
- Additional RS 232 service interface (9-pin sub-D connector)
- PG screw fittings on mounting plate
- Integrated two-line display with 16 characters each (MA 4D.7 only)
- Terminals for connecting the switching input/output, the voltage supply and the communication interface

# / DATA TRANSMISSION

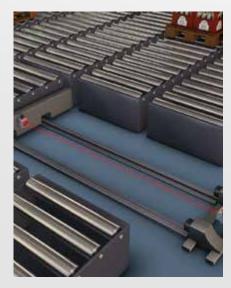

# CONTACT-FREE TRANSMISSION OF INFORMATION BY MEANS OF INFRARED LIGHT

Whenever data needs to be communicated without contact, optical devices for data transmission are the right choice. The optical data transceivers are used primarily in plant engineering, especially in applications where industrial networks such as PROFIBUS, DeviceNet or Ethernet etc. are connected to system components which are moved.

The DDLS 500 is a data transmission photoelectric sensor that, in addition to a high transmission rate of 100 Mbit/s, sets new standards – above all with respect to usability.

#### Benefits:

- 100 Mbit/s transparent data transmission of all Ethernet protocols such as PROFINET, EtherNet IP, EtherCat, etc.
- Laser alignment aid
- Monitoring of availability
- Interference-free parallel operation with AMS 300i
- Integrated "one-man" alignment device
- Optionally with heating (down to -30°C)

#### /// DDLS 200

Infrared data transmission protects this series from interference. Systems are available for all common industrial interfaces. The ranges are stepped and reach a maximum transmission distance of 500 m.

#### Benefits:

- Ranges up to 500 m possible
- Transmission rates up to 2 Mbit/s
- Network interfaces with integrated repeater function
- Low ambient light sensitivity through special FSK method
- Interfaces: PROFIBUS, Interbus and CAN/ DeviceNet

# SMARTER CUSTOMER SERVICE

24 h support
On-Call Service and technical support

all around the clock

"In our Service Center in Owen, we have a lot of expert colleagues who, as sensor people, can reliably handle your questions and problems - and are happy to help you around the clock."

Simone Fischer, Customer Care Center

You can reach the sensor people around the clock: www.leuze.com/en/support

# INDUSTRIAL POWER SUPPLIES AND MODULES FOR LOAD CIRCUIT MONITORING AND LOAD DISTRIBUTION

A reliable and machine-independent power supply is part of an efficient sensor system. PSU switching power supply units have a maximum efficiency of up to 95 % with minimum power loss. The combination of the power boost function and current limiter enables the starting of loads with high inrush currents. The power supply units are suitable for use all around the world due to the wide input voltage range.

#### /// PSU

Controlled 1 and 3 phase power supply units with alarm contact in diverse performance levels for installation in cabinet provide the basis for reliable sensor systems.

#### Benefits:

- Efficiency up to 95 %
- 150 % power boost for at least four seconds
- Derating happens only at 60 °C
- Metal housing with narrow overall width and optimal EMC characteristics
- High power-failure bridging
- Alarm contact for overvoltage, short-circuit and temperature for PSU 210 / 230
- Parallel mode: performance increase of up to 5 switching power supply units
- With push-in terminals (no tool required),
   LED-status display

50132585	PSU-05A-1P-24V-H	1x	2428 V DC adjustable; 5 A	85 265 V AC / 90 250 V DC 1.3 A (100 V AC) / 0.61 A (240 V AC)	I out N × 150 % (min. 4 s)	94.5 % (230 V AC)
50132586	PSU-10A-1P-24V-H	1x	2428 V DC adjustable; 10 A	85 265 V AC / 90 250 V DC 2.6 A (100 V AC) / 1.1 A (240 V AC)	I out N × 150 % (min. 4 s)	94.3 % (230 V AC)
50132587	PSU-20A-1P-24V-H	1x	2428 V DC adjustable; 20 A	90 265 V AC / 90 250 V DC 5.2 A (100 V AC) / 2.2 A (240 V AC)	I out N × 150 % (min. 4 s)	94.1 % (230 V AC)
50132588	PSU-05A-3P-24V-H	3x	2428 V DC adjustable; 5 A	3 × 324 572 V AC / 450 750 V DC 0.45 A (3 × 360 V AC)	I out N × 150 % (min. 5 s)	92.5 % (3 × 400 V AC)
50132589	PSU-10A-3P-24V-H	3x	2428 V DC adjustable; 10 A	$3\times324\dots572\mathrm{V}$ AC / $450\dots745\mathrm{V}$ DC 0.75 A (3 $\times360\mathrm{V}$ AC) / 0.45 A (3 $\times500\mathrm{V}$ AC)	I out N × 150 % (min. 5 s)	93.7 % (3 × 400 V AC)
50132590	PSU-20A-3P-24V-H	3x	2428 V DC adjustable; 20 A	3 × 324 572 V AC / 450 745 V DC 1.3 A (3 × 360 V AC) / 1.0 A (3 × 500 V AC)	I out N × 150 % (min. 5 s)	94.1 % (230 V AC)
50132591	PSU-40A-3P-24V-H	3x	2428 V DC adjustable; 40 A	3 × 324 572 V AC / 450 745 V DC 2.3 A (3 × 360 V AC) / 1.6 A (3 × 500 V AC)	I out N × 150 % (min. 5 s)	93.7 % (3 × 400 V AC)

Accessories

Identification

# INDUSTRIAL IMAGE PROCESSING

## BECAUSE SEEING IS SOMETIMES BETTER

In the automated industrial landscape, the use of industrial image processing will increasingly become standard. Our modern camera systems are already used for many tasks, thereby significantly increasing the reliability and availability of your plant systems.

# / SMART CAMERA

# THE INTELLIGENT EYE FOR AUTOMATION

LSIS 400i smart cameras for industrial image processing can be integrated quickly and at low cost. They are used in quality assurance, object detection and position determination, for identification and for production process monitoring. With their sophisticated range of features, LSIS 400i cameras can also reliably handle complex tasks.

#### /// LSIS 412i / LSIS 462i / LSIS 472i

High-performance smart camera for reliable and convenient quality control, code reading and measurement tasks. For checking for presence, completeness, type, position and orientation. The device offers omnidirectional reading of the most important 1D-/2D-codes with reference code comparison. As an additional function, the device can also be used for compartment fine positioning in the X and Y direction.

#### Benefits:

- Degree of protection IP 65/67
- Operation via webConfig with any standard browser or display
- The integrated, very homogeneous illumination makes possible working distances of up to 1,900 mm
- All interfaces (Ethernet, RS 232, 8x digital I/O) are integrated, no connection units are necessary
- Simple mounting with dovetail or threaded holes

# / CONNECTION TECHNOLOGY

#### YOUR CONNECTION TO THE WORLD

Sensors are only as good as the options for integrating them in your controls. For this reason, we offer you an extensive selection of accessories, including everything from the cables, to the plugs to the optional connection box. You can easily find the right parts for your application.

#### /// Connection cables

Cables with open end, unshielded and shielded with various numbers of wires and various lengths for voltage supply and networks.

# / MOUNTING SYSTEMS

#### OPTIMUM SUPPORT AT ALL TIMES

For sensor mounting, we offer a large selection of standard mounting materials to help you reliably mount and – if necessary – easily align the devices.

#### /// Mounting brackets

Selection of mounting brackets for the simple and fast mounting of a sensor on the machine or system. Versions in galvanized material or stainless steel in different sizes for various sensors.

Direct access to the online product selector at www.leuze.com/en/m-brackets

Further mounting brackets can be found on our website

#### /// Rod mounts

Various mounting systems for comfortable mounting and alignment of a sensor on a rod. Versions in galvanized material or stainless steel for different diameters of 10 to 20 mm.

Direct access to the online product selector at www.leuze.com/en/r-fastening

Part no.	Part description	Suitable for	Design	Fastening at device	Fastening at system	Material
50111391	BT 20-D10	BCL 2x series bar code readers, 25 series sensors	Mounting system	Screw type	For 10 mm rod, sheet-metal mounting	Metal
50060503	BT 20-D12	BCL 2x series bar code readers, 25 series sensors	Mounting system	Screw type	For 12 mm rod, sheet-metal mounting	Metal

### SMARTER PRODUCT USABILITY

## powerreserve.

Stable processes as a result of the largest possible function reserves

## availability control.

Early warnings in case of dirty devices prevent costly system downtime

## think modular.

Freely selectable function range comprising various equipment features

## easyhandling.

Intelligent ideas for installation and alignment and easy operation of the devices

## integrated connectivity.

Integrated interface diversity for simple integration in your fieldbus

Additional usability highlights can be found at: www.leuze.com/en/products

## / DEVICE COLUMNS

#### **ROCK SOLID MOUNTING**

Owing to their different designs and heights, our robust device columns offer flexible options for freestanding mounting of our safety light curtains and multiple light beam safety devices. Muting mounting systems can be attached extremely easily on the outside.

Direct access to the online product selector at www.leuze.com/en/device-columns

# / DEFLECTING MIRRORS / **DEFLECTING MIRROR COLUMNS**

#### LETTING LIGHT SHINE - EVEN AROUND CORNERS

It is sometimes necessary for safety at work, to deflect sensor beams on account of structural circumstances. Our deflecting mirrors and columns enable inexpensive solutions for multi-side guarding of danger zones.

#### /// Deflecting mirror columns / continuous

The continuous mirror surface is suitable for the beam deflection of safety light curtains such as the MLC series. Special spring elements offer an automatic resetting after mechanical impacts. For easy alignment, the mirror column can be adjusted in 3 directions.

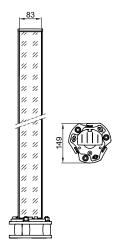

Direct access to the online product selector at www.leuze.com/en/uss-d

Part no.	Part description	Mirror length	Height	Mechanical reset function
549780	UMC-1000-S2	970 mm	1,060 mm	Yes
549781	UMC-1300-S2	1,270 mm	1,360 mm	Yes
549782	UMC-1600-S2	1,570 mm	1,660 mm	Yes
549783	UMC-1900-S2	1,870 mm	1,960 mm	Yes

Included in delivery: mounting kit for floor assembly

#### Dimensioned drawings: Deflecting mirror columns / continuous

Deflecting mirror column UMC-S2, continuous mirror

#### /// Deflecting mirror columns / individual mirrors

The deflecting mirror columns with individual mirrors are suitable for the beam deflection of multiple light beam safety devices such as the MLD series. Special spring elements offer an automatic resetting after mechanical impacts. For exact alignment, each mirror can be adjusted in 3 axes.

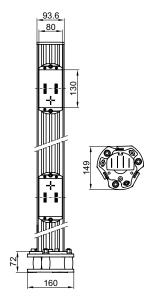

Direct access to the online product selector at www.leuze.com/en/uss-e

Part no.	Part description	Column height without foot	Height	Number of individual mirrors	Center-to-center spacing of individual mirrors
549790	UMC-902-S2	900 mm	960 mm	2x	500 mm

347082	MLC-PS1800	1,798 mm	1,800 mm	PMMA, clear	MLC 500, MLC 300 safety light curtains

Notice: If protective screens are used, the range of the safety sensor is reduced by approx.  $10\,\%$  per screen!

## SMARTER CUSTOMER SERVICE

#### Added value made attainable!

We offer specific and measurable added value in the areas of usability, application know-how and service – to make our customers more successful. In the future, these areas will also be our yardstick for new product developments, innovative service offerings and extensive market expertise.

More information on our active customer orientation: www.leuze.com/en/ssb

#### **CLEAR SIGNALS FOR AUTOMATION**

At many critical points in automated systems and installations, the signaling of status information helps to keep productivity and efficiency at a high level. For this purpose, we offer an extensive range of signal columns, single-color and multicolor signal lamps and acoustic signalers – preassembled and individually combinable.

The configurable signaling columns can be mounted horizontally and vertically for 40 mm (E4) and 70 mm (E7).

# / REFLECTORS AND REFLECTIVE TAPES

#### REFLECTORS TO RETURN THE LIGHT

Sensors that operate according to the reflection principle need high-quality reflectors in order to function. The reflector quality directly influences the reliability of the sensor solution. We offer reflectors for all conceivable applications and environmental conditions to ensure an optimum detection result at all times.

#### /// Standard reflectors

Different reflectors in various designs with triad-type reflector sizes from 2.3 mm to 4 mm for sensors with medium to large light spot.

#### /// Micro-triad-type reflectors

Different reflectors in various designs with triad-type reflector sizes from  $0.3\,\mathrm{mm}$  to  $1.2\,\mathrm{mm}$  for sensors with small light spot and laser.

Direct access to the online product selector at www.leuze.com/en/microtr-refl

Part no.	Part description	Design	Reflective surface   Triple reflector size   Fa		Fastening	Material
50106209	MTKS 14x23	Rectangular	11 mm × 21 mm	11 mm × 21 mm 1.2 mm Through-		Plastic
50114185	REF 6-S-20x40	Rectangular	16 mm × 38 mm	0.3 mm	Screw type	Plastic
50104130	MTKS 20x40.1	Rectangular	17 mm × 38 mm	1.2 mm	Through-hole mounting, adhesive	Plastic
50040894	MTKS 20x30	Rectangular	$19  \text{mm} \times 29  \text{mm}$	$m \times 29 \text{ mm}$ Through-hole mounting, adhesive		Plastic
50040895	MTKS 20x20	Rectangular	$20  \text{mm} \times 20  \text{mm}$	20 mm Through		Plastic
50124004	REF 6-S-26x280	Rectangular	$22 \text{ mm} \times 276 \text{ mm}$	0.3 mm M4 threaded pin		Plastic
50104132	MTKS 30x50.1	Rectangular 27 mm × 44 mm		1.2 mm Through-hole mounting, adhesive		Plastic
50104131	MTKS 40x60.1	Rectangular	$37 \text{ mm} \times 56 \text{ mm}$	1.2 mm Through-hole mounting, a		Plastic
50117583	MTKS 50x50.1	Rectangular	$50 \text{ mm} \times 50 \text{ mm}$		Through-hole mounting, adhesive	Plastic
50109828	MTK 20	Round	17 mm	1.2 mm	Adhesive	Plastic

Dimensional tolerances for all specified dimensions: ± 0.2 mm Further micro-triad-type reflectors can be found on our website

#### /// Reflectors for the pharmaceutical industry

Reflectors in different constructions for applications in which alcohol or  $\rm H_2O_2$  are used intensively for cleaning.

Direct access to the online product selector at www.leuze.com/en/refl-pharma

Part no.	Part description	Design	Reflective surface	Triple reflector size	Fastening	Material
50106961	MTKS 14x23.P	4x23.P Rectangular 11 mm × 21 mm 1.2 mm Through-hole mounting, adhesive		Through-hole mounting, adhesive	Plastic	
50106960	TKS 20x40.P	Rectangular 16 mm × 38 mm 2.3 mm Through-hole mounting, adhesive		Through-hole mounting, adhesive	Plastic	
50112142	TK BR 53	Rectangular	angular 29 mm × 10 mm		Housing fit	Plastic
50106957	TKS 40x60.P	Rectangular	Rectangular $37  \text{mm} \times 56  \text{mm}$ 4 mm Through-hole mounting, adh		Through-hole mounting, adhesive	Plastic
50116939	TK 10.P	Round	8.5 mm	1.5 mm	Adhesive	Plastic
50106958	TKS 20.P	Round	und 17 mm 2.3 mm M4 threaded pin		M4 threaded pin	Plastic

Dimensional tolerances for all specified dimensions:  $\pm~0.2\,\mathrm{mm}$  Further standard reflectors can be found on our website

Reflectors equipped with integrated heating for outdoor use or deep-freeze warehouses.

50111772	REF 4-A-50x45700	Rectangular	50 mm × 45,700 mm	Self-adhesive	Plastic
50106119	REF 4-A-100x100	Rectangular	100 mm × 100 mm	Self-adhesive	Plastic
50104657	REF 4-A-100x45700	Rectangular	100 mm × 45,700 mm	Self-adhesive	Plastic
50038117	REF 4-A-920x749	Rectangular	920 mm × 749 mm	Self-adhesive	Plastic

Further reflective tapes can be found on our website

#### /// Reflective tapes for laser and clear-glass applications

Reflective foils in various dimensions for sensors with small light spot and laser as well as for clear glass applications.

Direct access to the online product selector at www.leuze.com/en/refl-fo-laser

Part no.	Part description	Design	Reflective surface	Fastening	Material
50123899	REF 6-A-9x9	Rectangular	9 mm × 9 mm	Self-adhesive	Plastic
50123861	REF 6-A-14x45	Rectangular	15 mm × 45 mm	Self-adhesive	Plastic
50110191	REF 6-A-25x25	Rectangular	25 mm × 25 mm	Self-adhesive	Plastic
50110192	REF 6-A-50x50	Rectangular	$50 \text{ mm} \times 50 \text{ mm}$	Self-adhesive	Plastic
50111829	REF 6-A-77x77	Rectangular	77 mm × 77 mm	Self-adhesive	Plastic

Further reflective tapes can be found on our website

#### /// Reflective tapes for distance sensors

Reflective foils in various dimensions for distance sensors, various models as foil, mounted on mounting plate or even with heating.

Direct access to the online product selector at www.leuze.com/en/refl-fo-distance

Part no.	Part description	Design	Reflective surface	Fastening	Special design
50111527	REF 7-A-100x100	Rectangular	100 mm × 100 mm	Self-adhesive	
50115020	Reflective tape 200x200mm-H	Rectangular	200 mm × 200 mm	Mounting plate, through-hole mounting	Heating
50104364	Reflective tape 200x200mm-M	Rectangular	200 mm × 200 mm	Through-hole mounting, mounting plate	
50104361	Reflective tape 200x200mm-S	Rectangular	200 mm × 200 mm	Adhesive	
50116687	REF 7-A-200x300	Rectangular	300 mm × 200 mm	Self-adhesive	
50115021	Reflective tape 500x500mm-H	Rectangular	500 mm × 500 mm	Mounting plate, through-hole mounting	Heating
50104365	Reflective tape 500x500mm-M	Rectangular	500 mm × 500 mm	Through-hole mounting, mounting plate	
50104362	Reflective tape 500x500mm-S	Rectangular	$500  \text{mm} \times 500  \text{mm}$	Adhesive	
50104363	Reflective tape 749x914mm-S	Rectangular	749 mm × 914 mm	Adhesive	
50115022	Reflective tape 914x914mm-H	Rectangular	914 mm × 914 mm	Mounting plate, through-hole mounting	Heating
50104366	Reflective tape 914x914mm-M	Rectangular	914 mm × 914 mm	Through-hole mounting, mounting plate	
50108988	Reflective tape 914x914mm-S	Rectangular	914 mm × 914 mm	Adhesive	
50115444	REF 7-A-1000x600	Rectangular	1,000 mm × 600 mm	Self-adhesive	

Further reflective tapes can be found on our website

# / ALIGNMENT AIDS

#### KEEPING SIGHT OF THE TARGET

Sensor alignment is generally very unproblematic and can even easily be performed without additional tools. For some devices and application cases, it can still sometimes be helpful to make use of one of our alignment aids.

## **/ BAR CODE TAPES**

#### BAR FOR BAR, FOR MORE PRECISION

Bar code positioning systems use bar code tapes to determine positions with millimeter accuracy. For our systems, we offer such tapes in standard lengths from 30 mm to 200 m. In addition, special lengths of up to 10 km are possible. The self-adhesive plastic tape is UV resistant, extremely resilient and mechanically durable.

Direct access to the online product selector at www.leuze.com/en/bar-code-tapes

Part no.	Part description	Suitable for	Dimensions	Grid dimension
50040041	BCB 010	Bar code positioning system, BPS 300i series	47 mm × 10,000 mm	40 mm
50037489	BCB 020	Bar code positioning system, BPS 300i series	47 mm × 20,000 mm	40 mm
50038894	BCB 050	Bar code positioning system, BPS 300i series	47 mm × 50,000 mm	40 mm
50104792	BCB 8 010	BPS 8 series bar code positioning system, BPS 300i series bar code positioning system	47 mm × 10,000 mm	30 mm

# NOTES

# **GLOSSARY**

<i>a</i> beam	Calibrated <b>a</b> beam optics system (precise beam alignment max. $\pm$ 0.25° spread) eliminates complicated alignment of the sensor after mounting
ALC	Automatic switching-threshold correction for maximum function reserve
Alignment mode	A command can be used to activate the bar code reader to read and output the decoding capability on the interface
AOPD	Active Optoelectronic Protective Device
AOPDDR	Active Optoelectronic Protective Device responsive to Diffuse Reflection
AS-Interface Safety at Work	For economical, complete solutions including sensor and safety monitor
AutoReflAct (reflector polling)	A stationary bar code reader with this function facilitates control of the reading gate without an external, triggering photoelectric sensor
availabilitycontrol	Function which outputs a warning message even before contamination-related failure of a sensor occurs
A <sup>2</sup> LS	Active Ambient Light Suppression for reliable detection
Blanking	A function with which one or more areas of the protective field of an ESPE is/ are made ineffective so that work pieces in the ESPE's protective field do not cause the protective device to switch off. Blanking can be stationary or floating
<i>bright</i> vision <sup>®</sup>	Simplifies the handling and commissioning of sensors by means of a bright, highly visible light spot
Contactor monitoring (EDM)	The contactor monitoring monitors the NC contacts of downstream positive-guided contactors and relays
CDRH	Laser products which are imported into the USA are to be specified by the manufacturer to the CDRH (Center for Devices and Radiological Health), a branch of the FDA
C€	The CE certification certifies conformity with the applicable guideline(s)
CRT	Code reconstruction technology (CRT) – enables reliable detection, even with soiled or damaged codes
c UL us	Products with this certification have been tested by Underwriters Laboratory Inc. (UL) in compliance with the relevant regulations for USA and Canada
c UL us	Products with this certification have been tested by the Canadian Standards Association (CSA) in compliance with the relevant regulations for Canada
c <b>'AL</b> 'us	Products with this certification are components tested by Underwriters Laboratory Inc. (UL) and comply with the relevant regulations for USA and Canada.
Cycle time	Sum of the response times of all beams of a light curtain plus the internal evaluation
Dark switching	With dark switching optical sensors, the transistor is disabled if the light path is free and switched through if the light path is interrupted

easyhandling	Sophisticated fastening concepts enable simple and robust mounting of the devices. Should replacement be necessary, the devices can be exchanged position-neutral, i.e., without realigning.
ECOLAB+	Under the ECOLAB+ designation, the products are subjected to an entire series of additional aggressive cleaning agents at temperatures of 50°C before being forced to demonstrate their leak-proofness under the mechanical load of a steam-jet cleaner
EDM	External Device Monitoring
ESPE	Electro Sensitive Protective Equipment (German: BWS)
ESPE	Electro-Sensitive Protective Equipment (ESPE) offers protection by telling the machine to move into a safe operating state before a person can get into a dangerous situation
Fieldbus gateways	For field use for connection of bar code readers and identification systems
Function reserve	Receivers of optical sensors require a minimum amount of light to be able to switch (switching threshold). All light over and above this minimum amount is designated as "function reserve"
HI	LPS HI - High resolution versions (HI) with laser line 60 170 mm
HYGIENE design	For the pharmaceutical test, the 53 series sensors are tested against H <sup>2</sup> O <sup>2</sup> and 70 % alcohol to ensure that they satisfy these special requirements as well
integrated connectivity	The devices can be integrated problem-free in all common fieldbus systems and configured directly via the control
integrated laseralignment	Convenient alignment function for large distances
Interfaces	Variety of interfaces for the common industrial interface systems – among others, PROFIBUS, PROFINET, EtherNet TCP/IP and INTERBUS
IO-Link	Standardized interface for the lowest field level for quick and convenient configuration and inspection of sensors directly via the control
T	In order to make the protection of housings against foreign objects and water comparable, the degrees of protection have been defined in DIN 40050
Light switching	With light switching optical sensors, the transistor is switched through if the light path is free and disabled if the light path is interrupted
Machine Safety Services	Our "machine safety" service package
Muting	Temporary safety-related automatic suspension of the ESPE's protective function during the material transport through the ESPE (see also IEC TS 62046)
Muting override	Manual activation of the muting function by actuating a command device.  Moving material out of the muting area (at least one muting sensor must be activated for this, see also IEC TS 62046)
NPN transistor output	The NPN transistor output is a high-impedance switching output.  It switches GND to the connected load
<i>omni</i> mount	Integrated mounting and alignment concept without additional components
Operating range	Distance between transmitter and receiver, and with reflex systems between sensor and reflector (with light curtains also called protective field width)
Operating range	The range recommended for typical installation situations for a sensor with corresponding function reserve
Operating range limit	Describes the maximum possible range of the sensor
Operating range Sa (inductive switches)	Also assured operating distance. Value that is guaranteed under all specified operating conditions.

512

OSSD	Output Signal Switching Device
PNP transistor outputs	The PNP transistor output is a high-impedance switching output.  It switches positive potential to the connected load
Point to Point multiNet slave	For easy wiring and configuration
Potentially explosive area	Potentially explosive environments
Protective field	The area in which the defined test object is detected by the ESPE
Protective field height	Height of the active protective field with safety light curtains
Readiness delay	The delay before start-up suppresses sensor operation until all device-internal preparations have been concluded
Reproducibility	The deviation in measurement distance in the case of repeated measurement using an identical object under identical environmental conditions
RES	Start/restart interlock, prevents the automatic restarting of the machine after addressing a safety sensor, after switching on the supply voltage or changing the machine's operating or actuation mode
Response time	Time between penetration/entry into the active protective field and the actual switching off of the OSSDs.  Time from entry of an object into the light path to switching of the output.
Sensitivity adjustment	The electrical gain is adjusted using an operational control, e.g. potentiometer or teach button. This adapts the function reserve to the application
<i>slim</i> line-design	Slimline-design of an optical forked sensor for installation directly on the dispensing edge
System integration	Clever and simple with protective sensor sets
Teach-in	For optimum sensitivity adjustment
<i>think</i> modular	Freely selectable range of functions
Tracking	Automatic contamination compensation (tracking function). It compensates the gradual fouling of the sensor, determines the current reception level and compares this with the initial reference value
Typ. operating range limit	Maximum possible operating range of a sensor. If the sensor is used at this operating range limit, the sensor functions without function reserve
Typ. operating range limit Sn (inductive switches)	Also: "rated switching distance". The switching distance for which a sensor is configured
User guidance	User guidance is used to configure detection of highly transparent objects reliably without an object
WASH-DOWN design	For the pharmaceutical test, the 53 series sensors are tested against $\rm H_2O_2$ and 70 % alcohol to ensure that they satisfy these special requirements as well
webConfig	Browser-based software solution for convenient, computer-independent sensor configuration via Ethernet

# **SALES LOCATIONS WORLDWIDE**

With our staff of qualified field representatives and capable Customer Support Centers, we are able to provide you with service worldwide. Our dedication to qualified service and focus on the customer have always been among our distinguishing characteristics.

Contact information of our subsidiaries and sales partners worldwide can be found online: www.leuze.com/worldwide

### SMARTER PRODUCT USABILITY

We place emphasis on the especially good usability of all devices.

### SMARTER APPLICATION KNOW-HOW

We optimize our solutions for selected focus industries and applications and offer an extensive product portfolio for these areas.

#### SMARTER **CUSTOMER SERVICE**

We offer service that is closely aligned with your needs with emphasis on personal closeness and technical competence.

#### **Switching Sensors**
